

Q2 2014 results

roadshow presentation

Investor Relations
22 August 2014

Clear signs of a turnaround in Dutch economy, strategic ambitions on track

- ▶ Continued optimism about developments seen in Dutch economy and housing market
- ▶ Strategic ambitions and 2017 targets on track; H1 2014 - ROE 10.1%, C/I 59%, CET1 12.8%
- ▶ Interest income continued the steady rise, stable fee income
- ▶ Costs flat compared with 2011 notwithstanding additional bank tax
- ▶ ROE and Cost/Income improved 2-2.5 percentage points compared with first half last year
- ▶ Fully loaded CET1 above Basel III requirements and above 2017 target

Q2 results highlights

Q2 profit increased by 47% compared to last year

- ▶ Underlying net profit for Q2 2014 amounted to EUR 322m, compared to EUR 220m for Q2 2013, an increase of 47%
- ▶ Interest income up 6%, fee income flat, lower other operating income
- ▶ Lower loan impairments - down by 32% - especially for mortgages and Commercial Banking
- ▶ Reported profit amounted to EUR 39m due to a EUR 216m impact of a new pension system and EUR 67m levy for SNS Reaal
- ▶ CET1 ratio amounted to 12.8%

Q2 Highlights

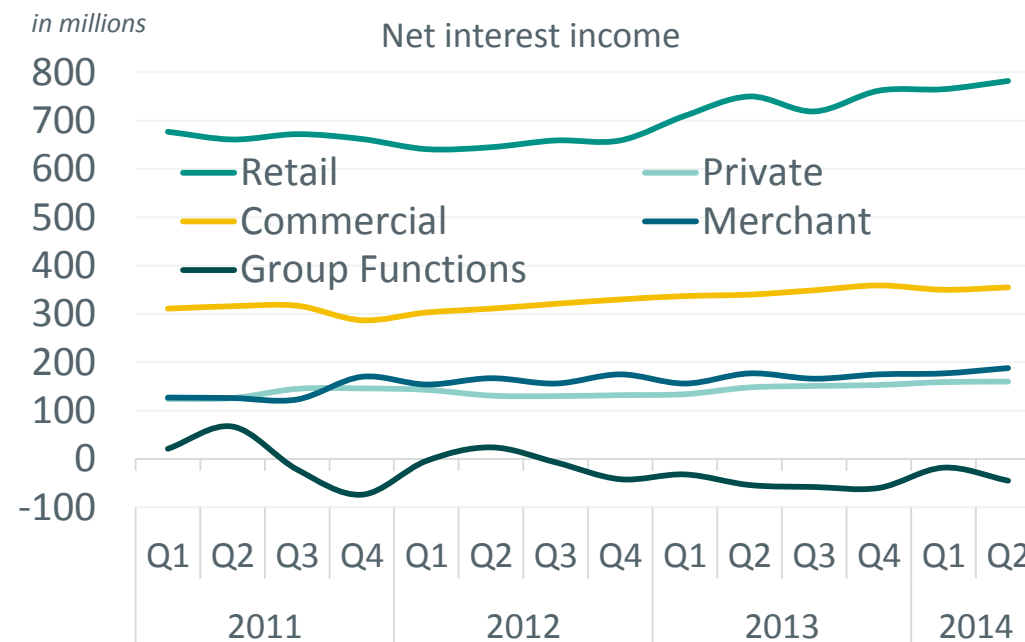

Quarterly result

Lower loan impairments drive profit improvement

| <i>In EUR m</i> | Q2 2014 | Q2 2013 | <i>Delta</i> | Q1 2014 | <i>Delta</i> |
|---|----------------|----------------|--------------|----------------|--------------|
| Net interest income | 1,441 | 1,360 | 6% | 1,432 | 1% |
| Net fee and commission income | 420 | 417 | 1% | 421 | 0% |
| Other operating income | 56 | 167 | -66% | 129 | -57% |
| Operating income | 1,917 | 1,944 | -1% | 1,983 | -3% |
| Operating expenses | 1,162 | 1,141 | 2% | 1,143 | 2% |
| Operating result | 755 | 803 | -6% | 840 | -10% |
| Impairment charges | 342 | 506 | -32% | 361 | -5% |
| Income tax expenses | 91 | 77 | 19% | 101 | -10% |
| Underlying profit for the period | 322 | 220 | 47% | 378 | -15% |
| Special items and divestments | - 283 | 182 | | - 67 | |
| Reported profit for the period | 39 | 402 | | 311 | |
| Underlying cost/income ratio (%) | 61% | 59% | | 58% | |
| Underlying return on avg. IFRS equity (%) | 9.2% | 6.4% | | 10.9% | |
| Net interest margin (bps) | 146 | 134 | | 148 | |

Interest Income

Interest income growing further due to higher margins and continuing increase in deposits

- ▶ NII showing a steady increase (CAGR¹ Retail +8.4%, Commercial Banking +6.4%)
- ▶ New production margins above average portfolio margin for mortgages and commercial loans leading to steady improvement of overall margin
- ▶ Deposits continuing to show decent volume growth (CAGR¹ 4.1%)
- ▶ Mortgage volume decline slowing down as a result of house price developments

1. CAGR over period 2012 through 2014 Q2

Fee and other income

Stable fee income but results for Markets are declining

- ▶ Fee income has been stable over the last few years
- ▶ Other operating income for Q2 2014 declined compared to last year due to lower results within markets and high positive CVA/DVA in Q2 2013
- ▶ Declining trend in other operating income mainly due to lower income within Markets

Expenses

Expenses are under control

- ▶ Personnel expenses at similar level to 2011 as declining FTEs have compensated for wage inflation and move towards higher-grade workforce
- ▶ Trend distorted by much lower pension costs in 2012
- ▶ Other expenses clearly show the impact of the bank tax (as of 2012) which is due in the fourth quarter

Loan impairments

Return of loan impairments to normal levels will take some time

- ▶ Loan impairments remain heightened, but first signs of the recovery of the Dutch economy are visible
- ▶ Impairments for mortgages in Q2 were significantly below previous quarters

Segment results

Net profit by business

- ▶ Retail improvement predominantly as a result of higher margins and lower impairments
- ▶ Private Banking operating result unchanged
- ▶ Decreasing (but still high) loan impairments and further improved operating efficiency drive the higher result for Commercial Banking
- ▶ Merchant Banking has lower results from Markets and Private Equity
- ▶ As of 2014 the cost of the liquidity buffer made within Group Functions and a higher proportion of overhead expenses are passed on to the businesses

Impaired and coverage ratios stabilising at heightened levels

- ▶ Coverage ratio for mortgages is flattening-off in line with house price developments

- ▶ Note that disposals of Greek loans and Madoff collateral in 2012-2013 have had a positive effect on the coverage and impaired ratio for commercial loans

Mortgage loans

Past due & impaired

In billions

- ▶ Past due ratio and impaired ratio remained unchanged at 2.7% and 1.1%

Impairments

In bps, loan impairments over mortgage loan book

- ▶ Q2 impairments significantly lower

Loan to Value

- ▶ Average LtMV 85% as of 30 June 2014 (Q1 84%)

Financial targets

Cost / Income target

Cost / Income ratio over H1 2014 lower compared with last year

The bank tax is due in Q4. If booked on a linear basis the Q1 – Q3 cost/income would be higher by 1.3% - 1.5%

Target range 2017: 56%-60%

- ▶ Cost / income impacted by the annual bank tax as of Q4 2012 and low pension costs in 2012
- ▶ Next few years EUR 0.7 billion to be invested in modernising the core IT systems and corresponding processes
- ▶ Towards 2017 these efficiency gains are expected to offset wage inflation

Return on Equity target

ROE is rising thanks to improving results

- ▶ ROE over first half was 10.1%, however bank tax will be due in fourth quarter (if booked on a linear basis, YTD ROE would have amounted to 9.5%)
- ▶ Private Banking and especially Retail are performing well above target ROE
- ▶ Commercial Banking to benefit strongly from pick-up in Dutch economy

CET1 capital target

Capital position strong and already above target level on a fully-loaded basis

- ▶ CET1 ratio declined due to pension agreement. In future, revaluations of pension liabilities will no longer directly impact CET1
- ▶ Fully loaded CET1 already above target of 11.5% - 12.5% for 2017
- ▶ Leverage ratio amounted to 3.6% as of Q2 2014 on a fully loaded (IFRS) basis

It's the economy

Economic indicators

GDP

Q-o-Q, source Thomson Reuters Datastream, CBS

- ▶ Weak Q1 GDP result due to exceptionally mild winter (and hence lower natural gas revenues)

Exports

EUR billions, source Datastream

- ▶ Exports have held up relatively well since the beginning of the downturn

PMI

PMI indices, source Thomson Reuters Datastream

- ▶ PMI indices still marginally shows expansion (>50)

Economic indicators

Domestic demand

In EUR bn, source ABN AMRO Group Economics

- ▶ Q1 affected by low gas sales due to soft winter
- ▶ Excluding gas, trend is pointing upwards as of Q2 2013

Housing & confidence

The Netherlands, seasonally adjusted confidence, house sales in '000, source CBS

- ▶ Dutch house sales picked up y-o-y
- ▶ Dutch consumer confidence at -6 per August 2014

Unemployment

The Netherlands, source Eurostat

- ▶ Dutch unemployment appears to have peaked

Forecast shows growth in the Netherlands for this year, despite weak Q1

- ▶ GDP forecasted to grow in 2014
- ▶ Unemployment trailing GDP by one year as domestic firms still weak
- ▶ Low inflation forecasted, but no deflation

At a glance

The long term strategy focuses on five priorities and sets targets for 2017

To prepare for the challenges of the future, we made clear choices locally and internationally to ensure sustainable profit. These choices are crystallised through five strategic priorities

Priorities

...bringing

| | |
|--|--|
| <p>1 Enhance client centricity</p> <ul style="list-style-type: none"> Quality and relevance of advice Using technology to better serve our clients Continue Customer Excellence | <ul style="list-style-type: none"> Long lasting client relationships Client satisfaction driving sustainable top line growth |
| <p>2 Invest in our future</p> <ul style="list-style-type: none"> Re-engineer IT landscape & optimising processes Recognised position in sustainability Recognised as top class employer | <ul style="list-style-type: none"> Operational efficiency Client satisfaction driving sustainable top line growth Employee satisfaction |
| <p>3 Strongly commit to moderate risk profile</p> <ul style="list-style-type: none"> Optimise balance sheet Further diversification Good capital position | <ul style="list-style-type: none"> CET1 ratio 11.5-12.5% by 2017 Maintain strong balance sheet |
| <p>4 Pursue selective international growth</p> <ul style="list-style-type: none"> Capability led Fitting moderate risk profile Fitting efficiency focus | <ul style="list-style-type: none"> Diversification and a 20-25% contribution to operating income by 2017 |
| <p>5 Improve profitability</p> <ul style="list-style-type: none"> Improve top line revenues Continuous focus on costs Strive for a sustainable risk – return | <ul style="list-style-type: none"> Top line growth Improved efficiency (C/I ratio between 56-60% by 2017) RoE between 9-12% |

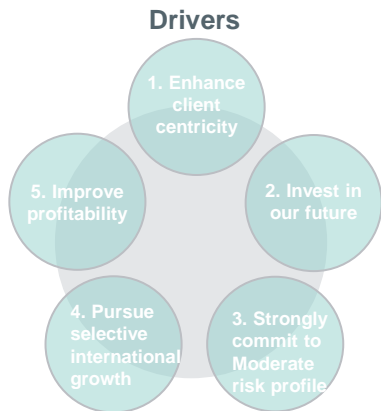

Targets 2017

Cost/income ratio 56-60%

Return on Equity 9-12%

CET1 ratio 11.5-12.5%

Management has shown - by finalising the integration on time and on budget - that we can be confident to succeed in delivering this strategy, while preparing for the IPO

At a glance

Core focus on Dutch market with selective international presence

ABN AMRO's core focus is on the Netherlands with a limited international presence in selected markets around key capabilities

- A full range of products and services is available to clients in the core Dutch market
- International focus is on specific expertise with leading market positions, where risk-taking is well-understood and aligned to the moderate risk profile
- In addition, the international network services Dutch clients abroad

Full client coverage in Dutch home market

- Retail Banking c. 340 branches of which 200 financial advisory centres
- Private Banking 20 dedicated branches
- Commercial Banking 24 offices (EUR 1-30m) and five regional units (EUR 30-250m)
- Two central offices, a dealing room and regional treasury desks serve our Merchant Banking clients
- Digitalisation 24/7 online and mobile banking, telephone and webcare service

81%
of revenues

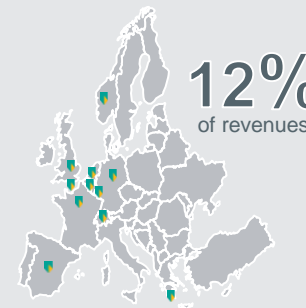

Selective international presence

Selective and focused footprint in several time zones and all major financial hubs based on key capabilities:

- To serve **Dutch clients** abroad
- **Private Banking clients** mainly in W-Europe, as well as in Asia
- **C&MB clients** in the fields of Energy, Commodities & Transportation clients globally, Clearing clients globally, Commercial Finance & Lease in NW-Europe

Partner agreements with selected banks to ensure coverage (payments) where ABN AMRO is not present

12%
of revenues

7%
of revenues

The Moderate Risk Profile is part of the corporate strategy

Maintaining a moderate risk profile is reflected in the balance sheet composition, in the clients, products and geographies served, and translates in sound capital and liquidity management. A clear governance is set up to support the moderate risk profile

| | |
|---------------------------------------|---|
| A moderate risk profile | Strongly commitment to a moderate risk profile It is one of the five strategic priorities that define the strategy |
| Risk Appetite | The moderate risk profile is expressed in risk appetite statements The risk appetite is cascaded down in more detail to all business lines and all markets where we are present |
| Embedding in the organisation | The moderate risk profile is embedded in the organisation Strong risk governance and risk management processes are based on an integrated risk management approach which is executed by dedicated risk experts for the risk types |
| Risk Governance | Governance framework ensures high level of management & managing board involvement <ul style="list-style-type: none">▪ Governance is in place to safeguard and control the risk profile, support effective and efficient risk management throughout all levels of the bank and to steer risk management processes in line with the risk appetite▪ Governance is based on clear risk strategy and appetite, embedded in the risk organisation, policies and methods▪ The Supervisory Board approves the risk governance and oversees execution of the strategy▪ Both the Supervisory and Managing Board have risk and sub-committees in place▪ The CRO is a member of the Managing Board and safeguards an accurate monitoring of the Risk Appetite |
| Three Lines of Defence Model | The model is a core discipline for the bank and its employees <ul style="list-style-type: none">▪ 1st Line of Defence: risk ownership, primarily business responsibility▪ 2nd Line of Defence: risk control, primarily group functions (e.g. Risk Management) responsibility▪ 3rd Line of Defence: risk assurance, Group Audit responsibility |
| Risk Measurement and Reporting | ABN AMRO has a comprehensive internal risk reporting hierarchy of regular reports <ul style="list-style-type: none">▪ Monthly Enterprise Risk Management reports provide integrated views on the risk profile, are benchmarked against risk appetite limits and strategic targets. It is discussed in board and risk committees. It supports effective and efficient risk management and it enables to prioritise identified risk issues and appropriate actions▪ Business Line risk reports are discussed monthly in the appropriate risk committees |

Balance sheet composition reflects moderate risk profile

The moderate risk profile is underpinned by

- A focus on collateralised lending
- A loan portfolio that is matched by deposits, long-term debt and equity
- A limited reliance on short-term debt
- Securities Financing which by the nature of its business is a fully collateralised activity: e.g. repo transactions and stock borrowing & lending activities
- Limited market risk and trading portfolios
- No exposure to CDOs or CLOs
- Financial Investments relate to liquidity management activities

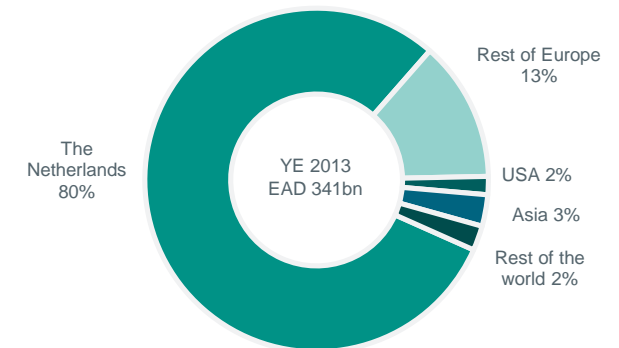

Balance sheet total per 30 June 2014: EUR 395.8bn (31 Dec 2013: EUR 372.0bn)

Geographic concentration

- Credit risk exposure is with 80% concentrated in the Netherlands and 13% in rest of Europe
- Majority of exposure in Rest of Europe is concentrated in the corporate sector (44%) and in institutions¹ (23%)
 - No material exposures to Italy, Spain, Portugal in corporates and institutions
 - Limited exposure to Russia and negligible exposure to Ukraine, primarily collateralized commodity transactions
 - Most government exposures relate to financial investments held for liquidity purposes
- Asian, and rest of the world exposures are mostly concentrated in ECT and the USA exposures relate mainly to Clearing, ECT and securities financing

Breakdown by geography YE2013

Gross EU government exposures per 30 June 2014

Note(s)

1. Institutions (COREP class definition) includes banks and pension funds

Risk management

Industry concentration

Exposure at Default (EaD)

- EAD is mainly exposure to private individuals (mostly Dutch residential mortgages) and relates for 80% of EaD to clients domiciled in the Netherlands (YE 2013)
- Largest industry sector exposure is to Industrial Goods and Services, (5.3% of total EaD – YE 2013) which includes industrial transportation, support services and industrial engineering
- Impaired exposures in Financial Services also includes the remainder of the fully impaired Madoff exposures for an amount of EUR 0.5bn

Top industry exposures as % total EAD, YE 2013

Impaired loans by industry

Operating income composition

Clearing: a global player in derivative and equity clearing

- Clients**
 - On-exchange traders and professional trading groups
- Services**
 - Global market access and clearing services to more than 85 of the world's leading exchanges; no proprietary trading
- Products**
 - Integrated package of direct market access, clearing and custody services covering futures, options, equity, commodities, energy and fixed income
- Operations**
 - In 11 locations across the globe through ABN AMRO Clearing Bank N.V. (subsidiary of ABN AMRO Bank)

Leading global player on >85 exchanges out of 12 financial hubs

- **Global reach** in direct clearing and 3rd party clearing, connecting all major CCPs and central security depositories
- **Earnings:** primarily NFC. Secondary margin financing, securities financing and access to infrastructure
- **Strong operational and risk controls** with a unique real-time global multi-asset risk management model

ECT: Global knowledge, global network

Energy

Clients

Products & services

Operations

Commodities

Transportation

- Internationally active mid-sized to large corporate clients active in ECT sectors
- Offering plain vanilla lending products, trade finance, Debt Solutions, M&A advice, ECM solutions, Equity solutions
- In 10 countries (including the Netherlands)

Leading global player in lending to energy, commodities and transportation clients

- *Deep insight and knowledge of the full value chain underpins risk awareness and provides a competitive edge*
- *Earnings: mostly NII and NFC on cash management and trade finance*
- *Robust risk & portfolio management: deep sector knowledge and experience contribute to excellent risk track record.*
- *ECT loan portfolio (in EUR) dominated by Commodities. Shipping (financing of ocean going vessels) is the main component of Transportation*

Funding & Liquidity

Comments

- Funding is primarily raised through savings and deposits from R&PB and C&MB clients, through ABN AMRO, Neufilize OBC, Bethmann Bank and MoneYou
- At 2Q2014, client deposits represented 81% of client loans (excluding securities financing, YE2013: 81%)
- As a substantial part of Dutch consumer savings is placed with pension funds or invested in insurance products ABN AMRO meets remaining funding requirements through wholesale funding
- Both the LCR and NSFR comply to the minimum Basel III requirement of $\geq 100\%$

Liability breakdown

RB: Retail Banking, PB: Private Banking, CB: Commercial Banking, MB: Merchant Banking, GF: Group Functions

Loan-to-deposit (LtD) ratio

LtD further improved, due mainly to increased savings levels

Drivers of Size

Internal risk appetite/guidelines: based on desired survival period

Core buffer: determined by regulatory requirements, and includes a mix of stress assumptions regarding wholesale and retail funding for a 1 month period, rating triggers and off balance requirements

Additional buffer: for adhering to internal metrics, depending on risk appetite or upcoming Basel III metrics

Encumbered assets: to support ongoing payment capacity and collateral obligations

Drivers of Composition

Regulations: such as new and pending Basel III developments (e.g. level1, level2)

Core buffer: determined by internal risk appetite (e.g. split into maturities, countries, instruments)

Additional buffer: influenced by ECB eligibility criteria (e.g. ratings, currency, haircuts), market circumstances and operational capabilities (e.g. time to execute, testing (dry run) of contingency plans)

Franchise: balance sheet composition and businesses of the bank. Part of the buffers held outside the Netherlands as a result of local requirements

- The liquidity buffer functions as safety cushion in case of severe liquidity stress. In addition, sufficient collateral is retained for e.g. daily payment capacity and collateralisation.
- Regular reviews assess the buffer size based on multiple stress events
- The liquidity buffer, consists of unencumbered assets at liquidity value: c. 50% of the buffer is eligible for LCR (retained RMBSs not eligible)
- The level of the liquidity buffer is in anticipation of new LCR guidelines and the focus of regulators on strengthening the buffers in general
- Going forward focus is on optimising the buffer composition and reducing the negative carry in liquidity buffer

Funding strategy & focus

- Successful implementation of the funding strategy
 - through lengthening average maturities
 - diversifying funding sources
 - steering towards more foreign currencies

Diversification issued term funding

In H1 2014 EUR 6.9bn was raised in senior unsecured, and EUR 1.7bn in covered bonds. Approx. 30% of the term funding was raised in non-EUR currencies

Maturing vs. issued term funding¹

Note(s):
1. For 2014 the figure for matured funding shows the total amount of wholesale funding maturing in 2014

Issued long term wholesale funding amounted to EUR 8.6bn in H1 2014: EUR 6.9bn raised in senior unsecured, EUR 1.7bn in covered bonds. Approx. 31% of the term funding was raised in non-EUR currencies.

Funding risk mitigation by lengthening maturities

Average maturity of long-term funding (incl. subordinated liabilities) 4.5yrs. Average original maturity of funding issued year-to-date was 5.5 years

Funding & Liquidity

Maturity calendar and funding profile

Funding profile strengthened

- Significant shift from secured funding to senior unsecured funding: use of RMBS declined strongly, while use of covered bonds remains stable
- A smooth and controlled redemption profile in term wholesale funding
- No use was made of LTRO and guaranteed funding
- The outstanding amount of wholesale programme funding, as percentage of total assets, is stable around a quarter of the balance sheet
- Improving asset encumbrance

Improved and declining asset encumbrance YE2013

Total encumbered assets as % of total assets

Note(s):

1. No CP government guaranteed nor ECB facilities outstanding
2. Securitisation = Residential Mortgage Backed Securities and other Asset Backed Securities and includes long-term repos

Maturity calendar LT programme funding at 30 June 2014⁽²⁾

In EUR billions

Funding structure by funding type

ST funding 4%

LT programme funding: 21%

% of balance sheet

Highlights

- Maintain excellent market access and long-term funding position and liquidity profile
- Be active with issuances in core funding markets in Europe, US and Asian-Pacific region
- Create and enhance strong relationships with investor base through active marketing and issuance
- Optimise balance between private placements and (public) benchmark deals
- Present attractive investment proposition to investors
- Build and manage the credit curve and issuance levels for both Senior Unsecured and Covered Bonds
- Decrease funding costs within the targets set for volume, maturity and diversification in anticipation of Basel III liquidity requirements

Ratings hybrid capital instruments (S&P/Moody's/Fitch/DBRS):

- T1: BBB-/Ba2(hyb)/BB+/A^{low}
- UT2: BBB-/Ba1(hyb)/BBB-/A^{low}
- LT2: BBB/Baa3/BBB+/A

Note(s):

1. Ratings of ABN AMRO Bank NV on 21 August 2014
2. DBRS also assigned ratings to ABN AMRO Group NV: A/Stable/ R-1^{low}, latest change on 18 Oct 2013

Standard & Poor's

30/04/2014: "Netherlands-Based ABN AMRO Outlook Revised To Negative On Potential Government Support Reduction; 'A' Rating Affirmed."

4/11/2013: "The ratings on ABN AMRO reflect its 'bbb+' anchor and ... "adequate" business position, "adequate" capital and earnings, "adequate" risk position, "average" funding, and "adequate" liquidity... The ratings also factor in ABN AMRO's "high" systemic importance in The Netherlands."

"...business position as "adequate" reflects the dominance of relatively stable activities in its business mix ... supported by sound market positions..."

"...capital and earnings as "adequate" based on our expectation that the bank's RAC ratio before diversification should remain in the 7.0%-7.5% range in the coming two years."

"...risk position as "adequate" incorporates our view that the bank's risk management and exposure are in line with that of its domestic industry and that risks are well captured by our RAC framework. Our opinion takes into consideration our economic risk on the Netherlands that stands now at '3' from its previous score of '1' three years ago."

"...funding as "average" factors in a large customer deposit base and good access to the domestic and international capital markets ... The bank has strongly improved its funding over the past four years ..."

"...liquidity as "adequate" factors in our new metric of broad liquid asset to short term wholesale funding, that stood at a satisfactory 1.2x level at June 2012 and December 2012. We also take into account our view of the bank's liquidity management as prudent."

"The improvement in our funding and liquidity metrics for ABN AMRO have been particularly noteworthy since 2009."

Moody's

30/05/2014: "We assign long-term global local-currency ratings of A2 to ABN AMRO N.V. (ABN AMRO), which incorporate a three-notch uplift for systemic support from the bank's baa2 baseline credit assessment (BCA)."

The ratings' uplift is based on (1) our assessment of a very high probability of systemic support from the Dutch government, due to ABN AMRO's size and importance in the domestic banking sector, and to a lesser extent (2) the Dutch state's full ownership of ABN AMRO, which is temporary in nature. "

"We assign a C- bank financial strength rating (BFSR) ..., which is equivalent to a baa2 BCA, reflecting the bank's overall good financial fundamentals including solid capitalization and comfortable liquidity position. It further captures the bank's strong franchise in the Dutch market, its balanced business mix – between retail and commercial banking - and the full operational integration of the two former banks..."

"Nevertheless, the standalone BFSR is constrained by (1) the bank's modest financial performance, which has been impacted by large integration and separation costs until 2012 and rising impairment charges in recent quarters; and (2) ABN AMRO's structural reliance on wholesale funding, which we view as a credit weakness in the current funding environment. Furthermore, we anticipate that a challenging business environment on ABN AMRO's credit fundamentals will continue to lower its asset quality profile with negative effects on its already weak profitability throughout 2014 and possibly beyond."

Fitch Ratings

24/07/2014: "...Fitch has upgraded ABN AMRO's Viability Rating (VR) to 'a' from 'a-'. The upgrade of ABN AMRO's VR reflects Fitch's view that management has built a solid track record in successfully implementing its chosen strategy since the 2010 merger ..."

11/11/2013: "ABN AMRO Bank N.V.'s (ABN AMRO) IDRs are at their Support Rating Floor (SRF), reflecting Fitch Ratings' belief that the Dutch state would support the bank if required given its importance to the domestic economy and financial system."

"ABN AMRO's Viability Rating (VR) is driven by its strong franchises in retail and commercial banking in the Netherlands and in private banking in its core markets, providing it with resilient income streams. The VR reflects ABN AMRO's solid capitalisation and moderate risk appetite, but also considers funding reliance on capital markets, a confidence-sensitive funding source."

"The VR incorporates the expected gradual easing in asset quality strains and improved underlying profitability, which will contribute to strengthen capital and liquidity."

"On 11 September 2013, Fitch outlined its approach to incorporating support into its bank ratings in light of evolving support dynamics for banks. ABN AMRO's SRF would be revised down, and hence its IDRs and senior debt rating downgraded, if Fitch concluded that potential sovereign support had weakened relative to its previous assessment. Given that ABN AMRO's VR is 'a-', any downgrade of the IDRs and senior debt rating would be limited to two notches."

DBRS²

13/12/2013: "DBRS views the Bank's "A" intrinsic assessment as underpinned by the strong franchise in the Netherlands, the still solid underlying earnings generation ability and its improved liquidity and capital position. Importantly, in DBRS's view, the combination of ABN AMRO and the former Fortis Bank (Nederland) (FBN) has created a full service bank with a solid franchise and good market position in the Netherlands."

"DBRS views the Dutch State's ownership positively as it has provided the time needed to improve the Bank's financial profile and franchise. "

"DBRS would not expect any privatisation to occur until 2015 at the earliest."

"Despite the challenging economic environment in the Netherlands, ABN AMRO continues to report good underlying earnings generation capacity, underpinned by its well-positioned franchise in the Netherlands."

"ABN AMRO's asset quality has deteriorated reflecting the on-going weak economic environment in its domestic market."

"The Group's funding profile is viewed by DBRS as solid, reflecting the strong core retail funding base and well diversified wholesale funding sources. The Group has strongly improved its funding profile by increasing its deposit base while the loan book has grown more moderately."

"In DBRS's view, capital remains solid."

Mortgages & CRE

Risk management

Additional mortgage portfolio parameters

Portfolio product split

As of Jan 2013, new production shows sharp increases in linear, annuity & savings mortgages (52% of new production in Q2 2014). Other types decline. This gradually changes the mortgage book composition over time

Breakdown portfolio per year of origination

New tax legislation causes I/O mortgages production to trend down, while the share of Annuity & Linear mortgages increases

Past due, impaired & forbore exposures

Past due exposures remained at 2.7% while impaired exposures remained stable. Forborne exposures declined mainly due to refined assumptions. Applying these to 2013 figures, forbearance exposures would have increased marginally

Note(s):
1. Interest-Only (mixed) mortgages are mixed mortgages and include an interest-only tranche

Recent changes in the mortgage market

Tax and amortisation features

| Mortgage type | Coupon tax deduction for mortgages | | Amortisation | Accrual for redemption |
|-----------------------------|------------------------------------|------------------------|--------------|------------------------|
| | existing mortgages (≤2012) | new production (≥2013) | | |
| Annuity & Linear | ✓ | ✓ | ✓ | ✗ |
| Savings | ✓ | ✗ | ✗ | ✓ |
| Interest only | ✓ | ✗ | ✗ | ✗ |
| Life, hybrids & investments | ✓ | ✗ | ✗ | ✓ |

Tax rules impact new mortgage production: mortgages originated prior to 2013 are grandfathered from impact of new rules for coupon tax deduction. The tax rate declines for all mortgages by 0.5% p.a. from 52% in 2013 to ultimately 38%

Other regulatory developments

- Stricter Bank's Mortgage Code of Conduct (as of August 2011)
- Transfer tax has been set permanently at 2% (from 6%)
- Maximum LTV at origination: 104% (102% + 2% transfer tax) in 2014, which declines by 1% per annum to 100% in 2018
- Interest-only mortgage tranche maximum 50% LTV
- Stricter regulations for non-compliance (on a comply or explain basis)

Source:
1. Nationale Hypotheek Garantie (NHG)

Development NHG ceiling⁽¹⁾

NHG ceiling declines to the original amount of EUR 265,000 by mid 2014 and declines further as of mid 2016. New NHG rules require annuity/linear mortgages with max. 30 years maturity

NHG loans and outstandings⁽¹⁾

In 2013, NHG recorded a 14% decline in new NHG mortgages. The number of calls for compensation rose 27%. Calls for compensation are mostly caused by cancelled relationships (65% in 2013) and to a lesser extent to unemployment (16% in 2013)

Latest developments in Dutch market

- A competitive and mature market of almost EUR 630bn¹ in total size (March 2014)
- House prices have increased marginally from year-end 2013. But prices are still down 19% since high point in August 2008³
- New mortgage production of EUR 20.0bn in H1 2014, up from 16.2bn in H1 2013²
- House sales show a 39% improvement in H1 2014 (63,037) from a low level in 2013 H1 (45,201)

Unique aspects of Dutch residential mortgage market

- Dutch consumers generally prefer fixed interest rates: 5 and 10 years being the most popular fixed-rate periods
- Interest paid on mortgages is tax-deductible (subject to requirements)
- Thorough underwriting process: e.g. notary required, verification of credit quality of loan applicants using national credit registry (BKR), strict code of conduct and duty of care principles to prevent over-indebtedness of the borrower
- Full recourse to borrowers upon default
- The NHG fund can grant guarantees (for principal and interest) to borrowers provided requirements are met
- Historically the Dutch residential mortgage market has seen very low defaults and foreclosures remain at low levels

Key messages

Commercial Real Estate (CRE) is a part of the Real Estate Sector and is defined as: 'land and property owned by project developers or investors with the purpose to develop, to trade or to rent'

Market

- The Dutch property market remained under pressure in 2013
- Offices in particular have structurally higher vacancy risk. Vacancy levels for offices were 14.5%, while levels in retail were 7.3% ⁽¹⁾ at YE2013

ABN AMRO Portfolio

- Includes Social Housing, partly guaranteed by WSW⁽²⁾, and Private Banking clients (real estate for investment purposes)
- The C&MB portfolio consists of:
 - Corporate based real estate: lending to (listed) institutional real estate funds & investment companies, mainly residential/retail
 - Asset based real estate lending to real estate investment or development companies. Exposure to developers is limited. Financing to developers can take place when pre-let and/or pre-sold requirements are met
 - Real estate exposures to SME companies, with fully secured senior loans. Has relatively low LtVs, almost exclusively Dutch properties, mainly investment loans diversified across asset types. Limited exposures to offices and land banks. Loans may have additional collateral, e.g. parent company guarantees
- Policies do not approve equity stakes nor direct exposure to development risk. New intake requires 60-65% LtMV in Private Banking and Commercial Banking, 70-75% in Merchant Banking

Important notice

For the purposes of this disclaimer ABN AMRO Group N.V. and its consolidated subsidiaries are referred to as "ABN AMRO".

This document (the "Presentation") has been prepared by ABN AMRO. For purposes of this notice, the Presentation shall include any document that follows and relates to any oral briefings by ABN AMRO and any question-and-answer session that follows such briefings. The Presentation is informative in nature and is solely intended to provide financial and general information about ABN AMRO following the publication of its most recent financial figures.

This Presentation has been prepared with care and must be read in connection with the press release in relation to the financial figures. In case of differences between the press release and this Presentation the press release is leading.

The Presentation does not constitute an offer of securities or a solicitation to make such an offer, and may not be used for such purposes, in any jurisdiction (including the member states of the European Union and the United States) nor does it constitute investment advice or an investment recommendation in respect of any financial instrument.

Any securities referred to in the Presentation have not been and will not be registered under the US Securities Act of 1933. The information in the Presentation is, unless expressly stated otherwise, not intended for residents of the United States or any "U.S. person" (as defined in Regulation S of the US Securities Act 1933).

No reliance may be placed on the information contained in the Presentation. No representation or warranty, express or implied, is given by or on behalf of ABN AMRO, or any of its directors or employees as to the accuracy or completeness of the information contained in the Presentation. ABN AMRO accepts no liability for any loss arising, directly or indirectly, from the use of such information. Nothing contained herein shall form the basis of any commitment whatsoever.

ABN AMRO has included in this Presentation, and from time to time may make certain statements in its public statements that may constitute "forward-looking statements". This includes, without limitation, such statements that include the words 'expect', 'estimate', 'project', 'anticipate', 'should', 'intend', 'plan', 'probability', 'risk', 'Value-at-Risk ("VaR")', 'target', 'goal', 'objective', 'will', 'endeavour', 'outlook', 'optimistic', 'prospects' and similar expressions or variations on such expressions. In particular, the Presentation may include forward-looking statements relating but not limited to ABN AMRO's potential exposures to various types of operational, credit and market risk. Such statements are subject to uncertainties. Forward-looking statements are not historical facts and represent only ABN AMRO's current views and assumptions on future events, many of which, by their nature, are inherently uncertain and beyond our control. Factors that could cause actual results to differ materially from those anticipated by forward-looking statements include, but are not limited to, (macro)-economic, demographic and political conditions and risks, actions taken and policies applied by governments and their agencies, financial regulators and private organisations (including credit rating agencies), market conditions and turbulence in financial and other markets, and the success of ABN AMRO in managing the risks involved in the foregoing. Any forward-looking statements made by ABN AMRO are current views as at the date they are made. Subject to statutory obligations, ABN AMRO does not intend to publicly update or revise forward-looking statements to reflect events or circumstances after the date the statements were made, and ABN AMRO assumes no obligation to do so.
