

A 10-Point Introduction

Global
Sustainable
enterprise system

The world is in a transition to a **healthy planet and fair society.**

The challenge:

The world is in a transition to a healthy planet and fair society. However, people and institutions that want to accelerate this shift are often stranded in the clutter of sustainability certifications and labels. We are facing an overload of complex information and regulations. That makes it challenging to understand, measure and manage your (and your supply chain's) sustainability performance.

GSES is the **solution:**

The Global Sustainable Enterprise System (GSES) offers a holistic platform for verified sustainability ratings of your organisation, products, assets, and more.

Our system easily and cost-effectively aligns over 550 ecolabels and sustainable certificates and uses worldwide accepted standards to holistically measure sustainability performance. Resulting in one universal language to measure sustainability.

The GSES SaaS platform serves to support you in improving the sustainability rating and performance across your entire value chain. Leverage our platform and invite your stakeholders & suppliers and create the ultimate supply chain management tool.

At the bottom line, GSES turns sustainable governance and data management of your organization and products from a complex burden, into an opportunity. GSES empowers sustainable change for companies in all sectors and industries, of all sizes, for the good of people and planet!

A Summary of our **USPs**

01. **One-stop solution** for sustainability measurement and monitoring
02. A **customizable** SAAS platform and dashboard for your ratings
03. Easy to follow assessments to **measure sustainability performance**
04. **A virtual safe** to store your data securely
05. **Independent verifications** that prove your sustainability claims
06. **A supply chain dashboard** to help you make sustainable impact across your value chain
07. **Quantify** and **verify** your carbon footprint
08. Go beyond sustainability rating at **organization level**
09. **Keep up to date** with upcoming legislation
10. **Support** from the **GSES team** along the way

How GSES helps you to be **successful**

01.

A system that combines all your sustainability certifications and labels within one verified date management tool.

The GSES System and platform was founded upon our Global Sustainable Enterprise Standard as the universal language to measure sustainability. This overarching standard, translates and aligns more than 550 widely accepted standards and certificates into KPIs making them measurable and comparable.

02.

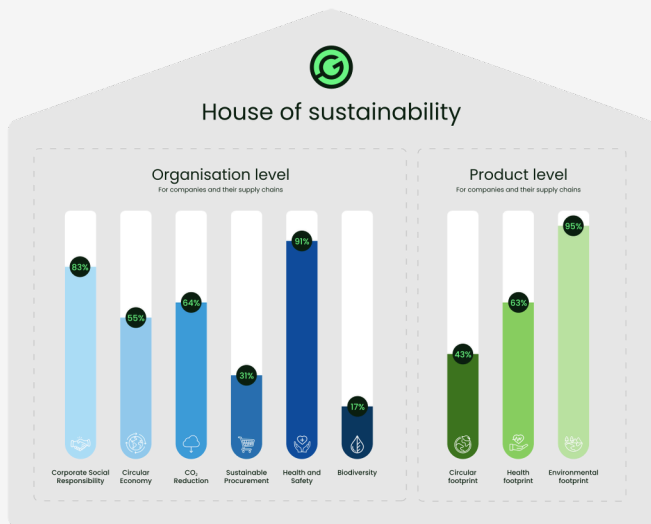

A customizable SAAS platform and dashboard of your ratings

Our platform is designed to offer easy dashboarding tools to measure and monitor your sustainability performance in a wide range of facets.

A breakdown of your organizational level score in shown in the Scorecard. The scorecard (right) provides a concise and standardised snapshot of your scores per GSES Pillar, SDGs supported, future sustainability targets and sustainability certificates obtained.

This verified 'sustainability business card' showcases your sustainability rating to your stakeholders! The Scorecard is published in the GSES database, along with scores from other GSES members around the globe.

03. Easy to follow assessments to measure sustainability performance

With GSES, measure your sustainability on a broad range of topics or pillars as we call them, that together create our 'House of Sustainability' (left). Each pillar of the House can be measured, verified and certified separately. The pillar assessments take the form of an easy-to-follow questionnaire.

04. A virtual safe to store your data securely

When providing evidence for the pillar assessments, the GSES system works with the uploading of your documents and proof within our encrypted 'Virtual Safe'. Only you and the auditors will be able to access the content in this safe.

05. Independent verifications that prove your sustainability claims

The GSES system works only with third-party verification of data powered by Audit Independender. This means that any of your ratings on the GSES Platform can be trusted by internal management, external stakeholders and regulators.

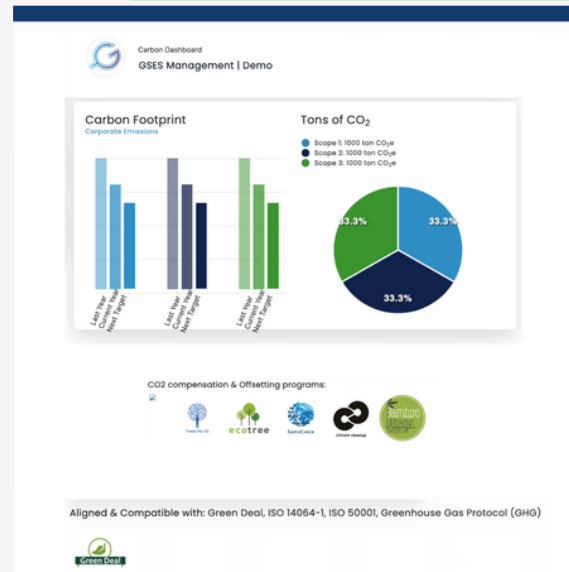

06. A supply chain dashboard to help you make sustainable impact across your value chain

All organisation's have the potential to increase sustainability across their value chains. GSES empowers organisations utilising the platform to extend invitations to their supply chains and stakeholders to get rated on specific GSES pillars or on other modules. Our database of organizations allows you to check and compare scores of any supplier using our platgotm, allowing you to keep track and optimize the sustainability of your value chains using our Supply Chain Dashboard tool.

07.

Quantify and verify your carbon footprint

The Carbon Dashboard is a tool designed to monitor and manage CO2 emissions. It comprehensively assesses an organisation's emissions across scopes 1, 2, and 3, providing a clear overview of achieved targets and areas for enhancement. This enables organisations to grasp their carbon footprint, considering distinct emission sources such as heating and travel.

08.

Go beyond sustainability rating at the organization level

The GSES platform offers a wide range of solutions and tools to measure sustainability performance. Going beyond sustainability ratings at the organizational levels can mean: rating your product sustainability using our product-rating method, measuring your assets with our asset module, and even your events and venues with our innovative events and venue standard.

09.

Keep up to date with upcoming legislation

Our GSES platform provides our clients a solution to get a clear handle on understanding their current CSRD reporting status, a clear guide to required next steps, and a digital space to streamline their CSRD data management processes.

10.

Support from the GSES team along the way

The road to sustainability is not without challenges but you can ensure that the GSES team will help you make the most of the platform and system with onboarding support hours. We are always happy to help. Reach out to our I.T. team representative, Remco Hottenthot for your question today: remco@gses-system.com

Rating process

Organisational level

Upload certificates *Step 01*

Upload any sustainability certificates you may already have onto the GSES platform.

Get validated *Step 02*

Your sustainability certificates are validated against our Meta Standard, and contribute to your 0-point ESG level measurement.

Online assessments *Step 03*

Complete the pillar assessments (online questionnaires) to provide proof of your organization's sustainability.

Request verification *Step 04*

Request verification of these assessments by an independent auditing organisation through the GSES Platform.

Your rating *Step 05*

Receive your organization's verified sustainability scorecard which is published within the GSES database.

Check out the video: How to measure sustainability of your organisation!

Rating process

Product/ Project level

Register (product/ Project)

Step 01

Insert your product credentials and supporting evidence or upload your LCA on the GSES Platform.

Unverified product rating

Step 02

Your unverified GSES Score is published in the GSES database. You can decide whether this product appears as private.

Choose your pillars

Step 03

Choose your pillars you want to improve; Circular and/or Environmental and/or Health.

Request verification

Step 04

Request product verification (desk review / external audit) by an independent audit organization connected to the GSES Platform.

Verified product rating

Step 05

The Scorecard of your product(s) is complete and you can choose to publish your product within the GSES database.
