Amsterdam, 15 juli 2011

ABN AMRO slaagt ruimschoots voor Europese stresstest 2011

- **ABN AMRO blijft aanmerkelijk boven het minimumvereiste van de stresstest van een Core Tier 1-ratio van 5%¹ zoals vastgesteld door de EBA**
- **Op basis van het stress scenario zou de Core Tier 1 ratio eind 2012 uitkomen op 9,2%, in vergelijking met 9,9%² ultimo 2010**

ABN AMRO heeft deelgenomen aan de Europese stresstest 2011 die is uitgevoerd door de European Banking Authority (EBA), in samenwerking met De Nederlandsche Bank (DNB), de Europese Centrale Bank (ECB), de Europese Commissie (EC) en de European Systemic Risk Board (ESRB).

De EU-brede test wordt uitgevoerd bij 90 banken die samen goed zijn voor meer dan 65% van de totale activa van het Europese bankstelsel. Deze test beoordeelt in welke mate Europese banken ernstige problemen ('schokken') kunnen opvangen en of de solvabiliteit van die banken bestand is tegen hypothetische stress omstandigheden onder bepaalde beperkende voorwaarden.

Op basis van de geformuleerde aannames en methodiek wordt de solvabiliteit van de deelnemende banken beoordeeld aan de hand van de kapitaal benchmark zoals die door de EBA is gedefinieerd (Core Tier 1 van 5%). Het doel van de stresstest is om het vertrouwen in de veerkracht van de getoetste banken te herstellen. Het stress scenario is opgesteld door de ECB en bestrijkt een termijn van twee jaar (2011-2012). In de test wordt uitgegaan van een onveranderde balans³ per december 2010 en wordt geen rekening gehouden met toekomstige bedrijfsstrategieën en management acties. De uitkomst van de stresstest is geen prognose van de winstontwikkeling van ABN AMRO.

Op basis van het stress scenario zou de geschatte ratio voor het geconsolideerde Core Tier 1 vermogen van ABN AMRO volgens de definitie van de EBA uitkomen op 9,2% in 2012 in vergelijking met 9,9%² ultimo 2010.

In het kader van de EU-brede stresstest wordt van de deelnemende banken vereist dat, indien de uitkomsten hiertoe aanleiding geven, zij actie ondernemen ter verbetering van de algehele veerkracht van het financiële stelsel. Uit de uitkomst van de stresstest blijkt dat ABN AMRO ruimschoots voldoet aan de solvabiliteitsvereisten zoals die voor de stresstest zijn vastgesteld. De bank zal blijven zorgen voor een toereikend vermogensniveau. Deze stresstest vormt een aanvulling op de risicobeheerprocedures en de reguliere stresstest programma's door ABN AMRO opgezet.

¹ Zie de toelichting van de EBA op de methodiek voor de definitie die er voor het kern Tier 1-vermogen is gehanteerd.

² De ratio van het kernvermogen (Tier 1) onder Basel 2 zoals verantwoord in het ABN AMRO Jaarverslag 2010 bedroeg 10,4%.

³ Voor de gehanteerde aannames in de stresstest scenario's wordt verwezen naar EBA note over de methodiek.

Uitkomsten van de EU-brede stresstest 2011 van de EBA: samenvatting ⁽¹⁻³⁾

Naam bank: ABN AMRO Group N.V.

Gepubliceerde resultaten ultimo 2010		in EUR miljoen, %
Operationele winst voor bijzondere waardeverminderingen		613
Bijzondere waardeverminderingen op financiële en niet-financiële activa in het bankenboek		-973
Naar risico gewogen activa ⁽⁴⁾		116.328
Core Tier 1 vermogen ⁽⁴⁾		11.574
Core Tier 1 kapitaalratio in % ⁽⁴⁾		9,9%
Benodigd aanvullend kapitaal om te voldoen aan de Core Tier 1-benchmark van 5%		-
Uitkomsten stress scenario per 31 december 2012, exclusief in 2011 getroffen schadebeperkende maatregelen		%
Core Tier 1-kapitaalratio		9,2%
Uitkomsten stress scenario per 31 december 2012, inclusief per 30 april 2011 verantwoorde schadebeperkende maatregelen		in EUR miljoen, %
2-jaar cumulatieve operationele winst voor bijzondere waardeverminderingen		1.957
2-jaar cumulatieve bijzondere waardevermindervingsverliezen op financiële en niet-financiële activa in het bankenboek		-2.563
2-jaar cumulatieve verliezen na het stressscenario in het handelsboek		-50
<i>waarvan waardeverlies door staatsschuldencrisis</i>		-38
Naar risico gewogen activa		120.901
Core Tier 1 vermogen		11.130
Core Tier 1 ratio in %		9,2%
Benodigd aanvullend kapitaal om te voldoen aan de Core Tier 1-benchmark van 5%		-
Impact door erkende mitigerende maatregelen t/m 30 april 2011 ⁽⁵⁾		
<i>Aangekondigde en volledig gecommitteerde financiering eigen vermogen in de periode 1 januari t/m 30 april 2011 (in EUR mln Core Tier 1)</i>		-
<i>Effect aangekondigde en volledig gecommitteerde overheidsfinanciering in de periode 1 januari t/m 30 april 2011 in Core Tier 1-ratio (procentpunten van Core Tier 1-ratio)</i>		-
<i>Effect verplichte herstructureringsplannen, aangekondigd en volledig gecommitteerd in periode 1 januari t/m 30 april 2011 in Core Tier 1-ratio (procentpunten van Core Tier 1-ratio)</i>		-
Aanvullende getroffen of geplande mitigerende maatregelen		bijdrage aan vermogensratio in procentpunten
Gebruik voorzieningen en/of overige reserves (inclusief vrijval contracyclische voorzieningen)		-
Tot en met 30 april 2011 ondernomen desinvesteringen en overige managementacties		-
Overige desinvesteringen en herstructureringsmaatregelen, waaronder ook toekomstige verplichte herstructureringen die nog niet met de Europese Commissie zijn afgestemd in het kader van de regels met betrekking tot de staatssteun		-
Geplande toekomstige uitgaven van gewone eigenvermogensinstrumenten (particuliere uitgaven)		-
Geplande toekomstige staatsinschrijvingen op kapitaalinstrumenten (inclusief hybride leningen)		-
Overige (bestaande en toekomstige) instrumenten door nationale toezichthouders aangemerkt als gepaste achtervangmaatregelen		-
Door de toezichthouder erkende vermogensratio na alle lopende en toekomstige mitigerende acties per 31 december 2012, in % ⁽⁶⁾		9,2%

Toelichting

(1) De stresstest is uitgevoerd volgens de gebruikelijke methodiek van de EBA. Uitgegaan wordt van een ongewijzigde balans en door de toezichthouder opgelegde overgangslimieten, waar bindend (zie voor meer informatie over de EBA-methodiek ook <http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx>).

(2) Alle kapitaalelementen en ratio's worden gepresenteerd in overeenstemming met de EBA-definitie van Core Tier 1-kapitaal zoals geformuleerd voor de EU-brede stresstest. Deze definitie kan afwijken van de door nationale toezichthouders gehanteerde definities en/of de definities die door instellingen in publieke informatie worden gerapporteerd.

(3) Het basisscenario, het stress scenario en de uitkomsten van de stresstest dienen op generlei wijze te worden opgevat als een prognose van de bank of direct te worden vergeleken met overige door die bank gepubliceerde informatie.

(4) Uitgaand van een ongewijzigde balans en exclusief eventuele mitigerende managementacties, verplichte herstructurering of kapitaal financiering na 31 december 2010 (alle steunmaatregelen van de staat en opgehaalde gelden voor 31 december 2010 zijn in de berekeningen verwerkt).

(5) Effect opgehaald vermogen, staatssteun en verplichte herstructureringsplannen die in de periode 1 januari tot en met 30 april zijn aangekondigd en volledig verstrekt, zoals verwerkt in de kern Tier 1-ratio die is gepubliceerd als de uitkomst van de stresstest.

(6) De door de toezichthouder erkende vermogensratio berekend na alle lopende en toekomstige mitigerende acties gepresenteerd in deze sectie. De ratio is voornamelijk gebaseerd op de EBA definitie, maar kan ook andere mitigerende acties omvatten die niet erkend zijn in de EBA methodiek als impact hebbende op de Core Tier 1 ratio, maar welke door de nationale toezichthouder als voldoende mitigerende maatregelen voor stress situaties worden aangezien. Indien toepasbaar zijn deze maatregelen uitgelegd in de additionele aankondigingen van de bank of de nationale toezichthouder..

Nadere informatie over de uitkomsten van de stresstest en over de samenstelling van het vermogen, de winst- en verliesrekening, uitstaande positie bij wanbetaling, verhouding lening/waarde onderpand en posities in staatsleningen vindt u in de bijlagen bij dit persbericht (in het Engels).

In de tabellen worden de gepubliceerde cijfers over 2010 weergegeven. In overeenstemming met de EBA-toelichting op de methodiek zijn bij de berekening van de scenario's eenmalige posten in 2010⁴ buiten beschouwing gelaten. De verwachte integratiekosten voor 2011 en 2012 zijn daarentegen wel verwerkt. Uit voorzichtigheidsoverwegingen zijn de voorziene synergie-effecten niet meegenomen.

Dat de Core Tier 1 ratio volgens de definitie van de EBA in het stressscenario 0,7 procent punt lager uitkomt dan eind 2010, wordt hoofdzakelijk verklaard door een daling van de nettorentebaten en een toename van de bijzondere waardeverminderingen op financiële activa. Buiten dit effect op de winst- en verliesrekening daalt de ratio van het kernvermogen door een beperkte groei van de naar risico gewogen activa, met name de naar risico gewogen activa voor kredietposities.

Verhouding lening/waarde onderpand (LTV)

In de publicatie over de stresstest van de EBA wordt onder andere gerapporteerd over de verhouding lening/waarde onderpand, de zogenaamde loan-to-value, of LTV (zie bijlage 4 voor meer informatie). De LTV is het totale uitstaande bedrag van een hypotheek als percentage van de reële waarde van het verpande vastgoedobject. De gewogen gemiddelde LTV van ABN AMRO voor woninghypotheken in Nederland bedroeg eind 2010 74%. Er wordt in Nederland weinig op een hypotheek afgelost omdat een groot deel van de hypotheken uit beleggings- of spaarhypotheken bestaat. Deze in onderpand gegeven spaar- of beleggingsproducten kunnen per einde van de contractdatum alleen worden gebruikt om een hypotheek mee af te lossen. Het saldo van de als zekerheid gestelde spaargelden wordt bij de berekening van de LTV afgezet tegen de resterende hypotheekschuld. Voor in zekerheid gegeven beleggingsproducten geldt dat niet.

⁴ Eenmalige posten kunnen worden omschreven als de kosten uit hoofde van de integratie en separatie in 2010, het operationeel resultaat uit beëindigde activiteiten, rente en commissievergoedingen op geconverteerde en aflosbaar gestelde kapitaalinstrumenten (diverse MCS-instrumenten en een kredietbeschermingsinstrument) en overige belangrijke incidentele posten.

Posities in door EU-lidstaten uitgegeven staatsleningen

In de tabel wordt het totaal weergegeven van de directe belangen van ABN AMRO in staatsleningen van lidstaten van de Europese Unie ultimo 2010. Dat geldt voor zowel de bruto- als de nettopositie. De nettopositie is gelijk aan de brutopositie na aftrek van de voorzieningen en de short positie⁵ in staatsschulden aan tegenpartijen (alleen waar sprake is van een match in de looptijden). Het stress scenario is toegepast op directe posities, na aftrek van de short posities en de voorzieningen.

Directe posities in staatsschulden EU-landen

<i>in EUR miljard</i>	Brutopositie	Nettopositie
Nederland	5,5	4,6
België	2,6	1,8
Frankrijk	2,3	2,0
Duitsland	1,8	1,5
Italië	1,3	1,3
Verenigd Koninkrijk	0,9	0,9
Polen	0,3	0,3
Ierland	0,1	0,1
Finland	0,1	0,1
Spanje	0,1	0,1
Griekenland	0,0	0,0
Portugal	0,0	0,0
Totaal	15,8	13,7

In bijlage 5 wordt de samenstelling gegeven van de posities in staatsleningen van landen binnen en buiten de EU. Op bladzijde 72 van het jaarverslag 2010 wordt een overzicht gegeven van de posities in staatsleningen, inclusief staatsgerelateerde en door overheden gegarandeerde posities per eind 2010.

Noten voor de lezer

⁵ Bijvoorbeeld 'short selling' als market maker.

Please note that the information in this press release does not comprise financial statements or a trading update. Given that the stress test was carried out under a number of key common simplifying assumptions (e.g. static balance sheet) and other methodologies, the outcome of the stress test as set out herein should in no way be construed as a forecast of any type, including as to profits or dividend distributions.

In the interpretation of the outcome of the exercise, it is imperative to differentiate between the results obtained under the different scenarios developed for the purposes of the EU-wide exercise. The results of both the baseline and the adverse scenario should not be considered as representative of the current situation or possible present or future capital needs. A stress testing exercise does not provide forecasts of expected outcomes since all scenarios are designed as "what-if" scenarios including plausible but extreme assumptions. Different stresses may produce different outcomes depending on the circumstances of each institution.

This press release should be read in conjunction with the audited financial statements as part of the ABN AMRO Group N.V.'s 2010 Annual Report and Pillar 3 Disclosure 2010 and ABN AMRO Group N.V.'s Trading Update dated 20 May 2011. All amounts in this press release are unaudited.

Cautionary statement on forward-looking statements

Other information in this press release may constitute "forward-looking statements" within the meaning of the safe harbour provisions of the United States Private Securities Litigation Reform Act of 1995. This includes, without limitation, such statements that include the words 'expect', 'estimate', 'project', 'anticipate', 'should', 'intend', 'plan', 'probability', 'risk', 'Value-at-Risk ("VaR")', 'target', 'goal', 'objective', 'will', 'endeavour', 'outlook', 'optimistic', 'prospects' and similar expressions or variations on such expressions.

In particular, these forward-looking statements relate, but are not limited, to ABN AMRO Group's potential exposures to various types of market risk, such as counterparty risk, interest rate risk, foreign exchange rate risk and commodity and equity price risk. Such statements are subject to risks and uncertainties. These forward-looking statements are not historical facts and represent only ABN AMRO Group's beliefs regarding future events, many of which, by their nature, are inherently uncertain and beyond our control.

Other factors that could cause actual results to differ materially from those anticipated by the forward-looking statements contained in this document include, but are not limited to:

- the extent and nature of future developments and continued volatility in the credit markets and their impact on the financial industry in general and ABN AMRO Group in particular;
- the effect on ABN AMRO Group's capital of write-downs in respect of credit exposures;
- risks related to ABN AMRO Group's merger, separation and integration process;
- general economic conditions in the Netherlands and in other countries in which ABN AMRO Bank has significant business activities or investments, including the impact of recessionary economic conditions on ABN AMRO Group's revenues, liquidity and balance sheet;
- actions taken by governments and their agencies to support individual banks and the banking system;
- monetary and interest rate policies of the European Central Bank and G-20 central banks;
- inflation or deflation;
- unanticipated turbulence in interest rates, foreign currency exchange rates, commodity prices and equity prices;
- potential losses associated with an increase in the level of substandard loans or non-performance by counterparties to other types of financial instruments;
- changes in Dutch and foreign laws, regulations and taxes;
- changes in competition and pricing environments;
- inability to hedge certain risks economically;
- adequacy of loss reserves;
- technological changes;
- changes in consumer spending, investment and saving habits; and
- the success of ABN AMRO Group in managing the risks involved in the foregoing.

The forward-looking statements made in this press release are only applicable as at the date of publication of this document. ABN AMRO Group does not intend to publicly update or revise these forward-looking statements to reflect events or circumstances after the date of this report, and ABN AMRO Group does not assume any responsibility to do so. The reader should, however, take into account any further disclosures of a forward-looking nature that ABN AMRO Group may make in ABN AMRO Group's reports.

ANNEX 1: Results of the 2011 EBA EU-wide stress test: Aggregate information and evolution of capital ⁽¹⁻⁴⁾

Name of the bank: ABN AMRO Group N.V.

All in million EUR, or %

A. Results of the stress test based on the full static balance sheet assumption without any mitigating actions, mandatory restructuring or capital raisings post 31 December 2010 (all government support measures fully paid in before 31 December 2010 are included)

Capital adequacy	2010	Baseline scenario		Adverse scenario	
		2011	2012	2011	2012
Risk weighted assets (full static balance sheet assumption)	116,328	118,501	118,627	120,619	120,901
Common equity according to EBA definition	11,574	12,225	12,846	11,688	11,130
of which ordinary shares subscribed by government	940	940	940	940	940
Other existing subscribed government capital (before 31 December 2010)	-	-	-	-	-
Core Tier 1 capital (full static balance sheet assumption)	11,574	12,225	12,846	11,688	11,130
Core Tier 1 capital ratio (%)	9.9%	10.3%	10.8%	9.7%	9.2%

B. Results of the stress test recognising capital issuance and mandatory restructuring plans publicly announced and fully committed before 31 December 2010

Capital adequacy	2010	Baseline scenario		Adverse scenario	
		2011	2012	2011	2012
Risk weighted assets (full static balance sheet assumption)	116,328	118,501	118,627	120,619	120,901
Effect of mandatory restructuring plans, publicly announced and fully committed before 31 December 2010 on RWA (+/-)		-	-	-	-
Risk weighted assets after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	116,328	118,501	118,627	120,619	120,901
Core Tier 1 Capital (full static balance sheet assumption)	11,574	12,225	12,846	11,688	11,130
Effect of mandatory restructuring plans, publicly announced and fully committed before 31 December 2010 on Core Tier 1 capital (+/-)		-	-	-	-
Core Tier 1 capital after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	11,574	12,225	12,846	11,688	11,130
Core Tier 1 capital ratio (%)	9.9%	10.3%	10.8%	9.7%	9.2%

C. Results of the stress test recognising capital issuance and mandatory restructuring plans publicly announced and fully committed before 30 April 2011

Capital adequacy	2010	Baseline scenario		Adverse scenario	
		2011	2012	2011	2012
Risk weighted assets after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	116,328	118,501	118,627	120,619	120,901
Effect of mandatory restructuring plans, publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on RWA (+/-)		-	-	-	-
Risk weighted assets after the effects of mandatory restructuring plans publicly announced and fully committed before 30 April 2011		118,501	118,627	120,619	120,901
of which RWA in banking book		95,236	95,236	97,454	97,215
of which RWA in trading book		2,953	2,953	2,953	2,953
RWA on securitisation positions (banking and trading book)		2,522	2,658	2,500	3,116
Total assets after the effects of mandatory restructuring plans publicly announced and fully committed and equity raised and fully committed by 30 April 2011	379,599	379,599	379,599	379,599	379,599
Core Tier 1 capital after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	11,574	12,225	12,846	11,688	11,130
Equity raised between 31 December 2010 and 30 April 2011		-	-	-	-
Equity raisings fully committed (but not paid in) between 31 December 2010 and 30 April 2011		-	-	-	-
Effect of government support publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital (+/-)		-	-	-	-
Effect of mandatory restructuring plans, publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital (+/-)		-	-	-	-
Core Tier 1 capital after government support, capital raisings and effects of restructuring plans fully committed by 30 April 2011		12,225	12,846	11,688	11,130
Tier 1 capital after government support, capital raisings and effects of restructuring plans fully committed by 30 April 2011		14,975	15,596	14,438	13,880
Total regulatory capital after government support, capital raisings and effects of restructuring plans fully committed by 30 April 2011		19,647	19,331	19,109	17,615
Core Tier 1 capital ratio (%)	9.9%	10.3%	10.8%	9.7%	9.2%
Additional capital needed to reach a 5% Core Tier 1 capital benchmark	-	-	-	-	-

RWA figures recorded in the above table are in accordance with the methodology prescribed by EBA, where the line *Of which RWA in trading book* only comprises the market risk on trading book exposures. The counterparty risk on trading book exposures is included in the line *Of which RWA in banking book*.

Capital after other mitigating measures (A+B1+C1+D+E+F1)		12,225	12,846	11,688	11,130
Supervisory recognised capital ratio (%) ⁽¹⁵⁾		10.3%	10.8%	9.6%	9.2%

ANNEX 1 (Cont'd): Results of the 2011 EBA EU-wide stress test: Aggregate information and evolution of capital ⁽¹⁻⁴⁾

Name of the bank: ABN AMRO Group N.V.

Notes and definitions

- (1) The stress test was carried using the EBA common methodology, which includes a static balance sheet assumption (see <http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx> for the details on the EBA methodology).
- (2) All capital elements and ratios are presented in accordance with the EBA definition of Core Tier 1 capital set up for the purposes of the EU-wide stress test, and therefore may differ from the definitions used by national supervisory authorities and/or reported by institutions in public disclosures.
- (3) Neither baseline scenario nor the adverse scenario and results of the stress test should in any way be construed as a bank's forecast or directly compared to bank's other published information.
- (4) Regulatory transitional floors are applied where binding. RWA for credit risk have been calculated in accordance with the EBA methodology assuming an additional floor imposed at a level of RWA, before regulatory transitional floors, for December 2010 for both IRB and STA portfolios.
- (5) Banks are required to provide explanations of what "Other operating income" and "Other income" constitutes for. "Other operating income" under the EBA definition comprises "Results from financial transactions" and "Other income" as reported in the Annual Report. "Other income" under the EBA definition comprises "Share of result in equity accounted investments". "Impairments on non-financial assets" are included in "Impairments on financial and non-financial assets in the banking book" and are therefore excluded from "Operating profit" under the EBA definition. In the 2010 Annual Report, these results were reported under "Depreciation and amortisation of tangible and intangible assets".
- (6) If under the national legislation, the release of countercyclical provisions and/or other similar reserves is allowed, this figure for 2010 could be included either in rows "Impairments on financial assets in the banking book" or "Other income" for 2010, whereas under the EU-wide stress test methodology such release for 2011-2012 should be reported in Section D as other mitigating measures.
- (7) Net profit includes profit attributable to minority interests.
- (8) Deferred tax assets as referred to in paragraph 69 of BCBS publication dated December 2010 : "Basel 3 – a global regulatory framework for more resilient banks and banking systems".
- (9) Stock of provisions includes collective and specific provisions as well as countercyclical provisions, in the jurisdictions, where required by the national legislation.
- (10) Provisions for non-defaulted exposures to sovereigns and financial institutions have been computed taking into account benchmark risk parameters (PDs and LGDs) provided by the EBA and referring to external credit ratings and assuming hypothetical scenario of rating agency downgrades of sovereigns.
- (11) For definition of commercial real estate please refer to footnote (5) in ANNEX 4 - EADs.
- (12) Coverage ratio = stock of provisions on defaulted assets / stock of defaulted assets expressed in EAD for the specific portfolio.
- (13) Loss rate = total impairment flow (specific and collective impairment flow) for a year / total EAD for the specific portfolio (including defaulted and non-defaulted assets but excluding securitisation and counterparty credit risk exposures).
- (14) All elements are reported net of tax effects.
- (15) The supervisory recognised capital ratio computed on the basis of additional mitigating measures presented in this section. The ratio is based primarily on the EBA definition, but may include other mitigating measures not recognised by the EBA methodology as having impacts in the Core Tier 1 capital, but which are considered by the national supervisory authorities as appropriate mitigating measures for the stressed conditions. Where applicable, such measures are explained in the additional announcements issued by banks/national supervisory authorities. Details of all mitigating measures are presented in Annex 3 - Mitigating measures).

ANNEX 2: Results of the 2011 EBA EU-wide stress test: Composition of capital as of 31 December 2010

Name of the bank: ABN AMRO Group N.V.

Situation at December 2010	December 2010	
	Million EUR	% RWA
A) Common equity before deductions (Original own funds without hybrid instruments and government support measures other than ordinary shares) (+)	12,596	10.8%
Of which: (+) eligible capital and reserves	13,277	11.4%
Of which: (-) intangibles assets (including goodwill)	-172	-0.1%
Of which: (-/+) adjustment to valuation differences in other AFS assets ⁽¹⁾	-8	0.0%
B) Deductions from common equity (Elements deducted from original own funds) (-)	-1,022	-0.9%
Of which: (-) deductions of participations and subordinated claims	-601	-0.5%
Of which: (-) securitisation exposures not included in RWA	-86	-0.1%
Of which: (-) IRB provision shortfall and IRB equity expected loss amounts (before tax)	-334	-0.3%
C) Common equity (A+B)	11,574	9.9%
Of which: ordinary shares subscribed by government	940	0.8%
D) Other Existing government support measures (+)	-	0.0%
E) Core Tier 1 including existing government support measures (C+D)	11,574	9.9%
Difference from benchmark capital threshold (CT1 5%)	5,757	4.9%
F) Hybrid instruments not subscribed by government	2,750	2.4%
Tier 1 Capital (E+F) (Total original own funds for general solvency purposes)	14,324	12.3%
Tier 2 Capital (Total additional own funds for general solvency purposes)	5,013	4.3%
Tier 3 Capital (Total additional own funds specific to cover market risks)	-	0.0%
Total Capital (Total own funds for solvency purposes)	19,336	16.6%
Memorandum items		
Amount of holdings, participations and subordinated claims in credit, financial and insurance institutions <u>not deducted for the computation of core tier 1</u> but deducted for the computation of total own funds	-301	-0.3%
Amount of securitisation exposures not included in RWA and <u>not deducted for the computation of core tier 1</u> but deducted for the computation of total own funds	-43	0.0%
Deferred tax assets ⁽²⁾	252	0.2%
Minority interests (excluding hybrid instruments) ⁽²⁾	11	0.0%
Valuation differences eligible as original own funds (-/+) ⁽³⁾	-2	0.0%

Notes and definitions

(1) The amount is already included in the computation of the eligible capital and reserves and it is provided separately for information purposes.

(2) According to the Basel 3 framework specific rules apply for the treatment of these items under the Basel 3 framework, no full deduction is required for the computation of common equity.

(3) This item represents the impact in original own funds of valuation differences arising from the application of fair value measurement to certain financial instruments (AFS/FVO) and property assets after the application of prudential filters.

ANNEX 3: Results of the 2011 EBA EU-wide stress test: Overview of mitigating measures ⁽¹⁻²⁾

Name of the bank: ABN AMRO Group N.V.

Use of countercyclical provisions, divestments and other management actions

Please fill in the table using a separate row for each measure	Narrative description	Date of completion (actual or planned for future issuances)	Capital / P&L impact (in million EUR)	RWA impact (in million EUR)	Capital ratio impact (as of 31 December 2012) %
A) Use of provisions and/or other reserves (including release of countercyclical provisions). ⁽³⁾					
-					
B) Divestments and other management actions taken by 30 April 2011					
-					
C) Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules					
-					

Future capital raisings and other back stop measures

Please fill in the table using a separate row for each measure	Date of issuance (actual or planned for future issuances, dd/mm/yy)	Amount	Maturity	Loss absorbency in going concern	Flexibility of payments (capacity to	Permanence (Undated and without incentive to	Conversion clause (where appropriate)			
		(in million EUR)	(dated/ undated) ⁽⁴⁾	(Yes/No)	(Yes/No)	(Yes/No)	Nature of conversion	Date of conversion	Triggers	Conversion in common equity
							(mandatory/ discretionary)	(at any time/from a specific date: dd/mm/yy)	(description of the triggers)	(Yes/No)
D) Future planned issuances of common equity instruments (private issuances)										
-										
E) Future planned government subscriptions of capital instruments (including hybrids)										
-										
F) Other (existing and future) instruments recognised as back stop measures by national supervisory authorities (including hybrids)										
-										

Notes and definitions

(1) The order of the measures follows the order of mitigating measures reported in the Section D of ANNEX 1 - Aggregate information.

(2) All elements are reported net of tax effects.

(3) If under the national legislation, the release of countercyclical provisions and/or other similar reserves is allowed, this figure for 2010 could be included either in rows "Impairments on financial assets in the banking book" or "Other income" for 2010, whereas under the EU-wide stress test methodology such release for 2011-2012 should be reported in Section D of ANNEX 1- Aggregate information as other mitigating measures and explained in this worksheet.

(4) If dated please insert the maturity date (dd/mm/yy) otherwise specify undated.

ANNEX 4 (Cont'd): Results of the 2011 EBA EU-wide stress test: Credit risk exposures (EAD - exposure at default), as of 31 December 2010, mln EUR, ⁽¹⁻⁵⁾

Name of the bank: ABN AMRO Group N.V.

All values in million EUR, or %

Notes and definitions

(1) EAD - Exposure at Default or exposure value in the meaning of the CRD.

(2) The EAD reported here are based on the methodologies and portfolio breakdowns used in the 2011 EU-wide stress test, and hence may differ from the EAD reported by banks in their Pillar 3 disclosures, which can vary based on national regulation. For example, this would affect breakdown of EAD for real estate exposures and SME exposures.

(3) Breakdown by country and macro area (e.g. Asia) when EAD >=5%. In any case coverage 100% of total EAD should be ensured (if exact mapping of some exposures to geographies is not possible, they should be allocated to the group "others").

(4) The allocation of countries and exposures to macro areas and emerging/non-emerging is according to the IMF WEO country groupings. See: <http://www.imf.org/external/pubs/ft/weo/2010/01/weodata/groups.htm>

(5) Residential real estate property which is or will be occupied or let by the owner, or the beneficial owner in the case of personal investment companies, and commercial real estate property, that is, offices and other commercial premises, which are recognised as eligible collateral in the meaning of the CRD, with the following criteria, which need to be met:

(a) the value of the property does not materially depend upon the credit quality of the obligor. This requirement does not preclude situations where purely macro economic factors affect both the value of the property and the performance of the borrower; and

(b) the risk of the borrower does not materially depend upon the performance of the underlying property or project, but rather on the underlying capacity of the borrower to repay the debt from other sources. As such, repayment of the facility does not materially depend on any cash flow generated by the underlying property serving as collateral.

(6) Loan to value ratio - ratio of EAD to the market value of real estate used as collateral for such exposures. Given the different methodologies applied to assessing the value, the bank is required to explain the computation of the ratio. In particular (a) whether collateral values is marked-to-market or any other valuation method is used, (b) whether the amount has been adjusted for principal repayments, and (c) how guarantees other than the underlying property are treated.

Definition of Loan to Value ratio used:

LTV Residential mortgages = [current outstanding +/- savings deposits]/ [indexed market value], where 1) Savings deposits includes only pledged savings related to the mortgage and 2) the market values are the registered values as adopted from the valuation report of the broker. Indexation is applied to revalue it to the present value.

(7) Total exposures is the total EAD according to the CRD definition based on which the bank computes RWA for credit risk. Total exposures, in addition to the exposures broken down by regulatory portfolios in this table, include EAD for securitisation transactions, counterparty credit risk, sovereigns, guaranteed by sovereigns, public sector entities and central banks.

ANNEX 5: Results of the 2011 EBA EU-wide stress test: Exposures to sovereigns (central and local governments), as of 31 December 2010, mln EUR ^(1,2)

Notes and definitions

(1) The allocation of countries and exposures to macro areas and emerging/non-emerging is according to the IMF WEO country groupings. See: <http://www.imf.org/external/pubs/ft/weo/2010/01/weodata/groups.htm>

(2) The exposures reported in this worksheet cover only exposures to central and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees (such exposures are however included in the total EAD reported in the ANNEX 4 - EADs).

(3) According to the EBA methodologies, for the trading book assets banks have been allowed to offset only cash short positions having the same maturities (paragraph 202 of the Methodological note).

General remark: In accordance with EBA instructions, negative net positions by maturity bucket are not reported.
