ABN AMRO Bank N.V.

Update following rating action

Summary

The baa1 Baseline Credit Assessment (BCA) of [ABN AMRO Bank N.V.](#) (ABN AMRO) reflects the bank's overall good financial fundamentals including strong solvency, despite material setbacks in its corporate loan book, and a robust liquidity and funding position. The BCA captures the bank's strong presence in the Dutch market, its business mix of retail, commercial banking, corporate & institutional banking (CIB), and its private banking activity across Europe.

ABN AMRO's deposit and senior unsecured debt ratings of A1 reflects (1) ABN AMRO's BCA of baa1; (2) two notches of uplift resulting from the very low loss-given-failure under our Advanced Loss Given Failure (LGF) analysis, given the substantial amount of volume and subordination benefiting these creditors; and (3) one notch of uplift stemming from a moderate probability of government support.

Exhibit 1
 Rating Scorecard - Key Financial ratios

Source: Moody's Financial Metrics

Credit strengths

- » Strong positions in the Dutch banking sector
- » Moderate risk profile from focus on retail and commercial banking businesses
- » Declining asset risks thanks to ongoing reduction of riskiest CIB exposures
- » Strong capitalisation on a risk-weighted basis, although leverage ratio is more modest

Credit challenges

- » Modest profitability, and recently volatile, driven by net interest margin pressure due to low interest rates and the sale of higher-yielding CIB assets
- » Yet incomplete remediation plan aiming at strengthening internal control framework, to be completed in 2022
- » Cost inflation linked to regulatory compliance and detection of financial crime

Outlook

The stable outlook reflects the bank's strong capitalisation, as well as the structurally weakened profitability which we however expect to stabilize owing to a lower risk appetite in the CIB division. The stable outlook also assumes that the liability structure and probability of government support will remain broadly unchanged.

Factors that could lead to an upgrade

We could upgrade ABN AMRO's BCA and long-term ratings if (1) the bank's capitalisation were to improve materially further, including its regulatory Tier 1 leverage ratio, and (2) the bank concurrently were to report higher net interest margins and sustainably stronger earnings with a reduced risk profile and a completed remediation to their risk control frameworks.

ABN AMRO's deposit and senior unsecured debt ratings could also be upgraded as a result of a decrease in loss given failure, should they benefit from higher subordination than is currently the case.

Factors that could lead to a downgrade

The bank's BCA could be downgraded as a result of (1) a significant deterioration in the bank's asset quality; (2) lower profitability with continued volatility in earnings; or (3) a negative development in its liquidity and/or capitalisation. A downward movement in ABN AMRO's BCA would likely result in downgrades to all ratings.

ABN AMRO's deposit and senior unsecured debt ratings could also be downgraded as a result of an increase in loss-given-failure, should they account for example for a significantly smaller share of the bank's overall liability structure, or benefit from lower subordination than is currently the case.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moody's.com for the most updated credit rating action information and rating history.

Profile

ABN AMRO Bank N.V. is a Dutch universal bank. The bank provides retail, private and commercial banking products and services to individuals, high-net-worth clients, small and medium-sized enterprises (SMEs), large companies and financial institutions. Please refer to [ABN AMRO's Company Profile](#) for more information.

Detailed credit considerations

Strong position in the domestic market

ABN AMRO has a strong franchise in the highly concentrated Dutch market, where it is the second-largest bank in retail banking, having a 16%-18% market share in key products, including mortgages, savings and consumer lending. The market share in new production of residential mortgages was 16% at the end of June 2021. Around 80% of the bank's operating income was from domestic operations in 2020.

Outside the Netherlands, the bank's franchise is more modest but benefits from good brand recognition in certain activities, such as private banking in France and Germany. As of the end of June 2021, private banking client assets totaled €203 billion.

The bank has also maintained a strong position in commercial banking, where its domestic market share ranges from 25% to 30%. In international activities, which are run through its corporate and institutional banking (CIB) segment, ABN AMRO was a large player in some global markets such as "Global Transportation and Logistics (GTL)", "Natural Resources", and "Trade and Commodity Finance (TCF)", asset-based finance and clearing. However, as announced in August 2020, ABN AMRO is refocusing its activities on its core markets of the Netherlands and Northwestern Europe and its International Clearing business. The bank will completely exit TCF activities while the Natural Resources and GTL will be conducted exclusively in Europe. The risk profile of the core activities will be moderated as a result.

Moderate risk profile thanks to focus on retail and commercial banking businesses

As reflected in the assigned Asset Risk score of baa1, we consider ABN AMRO's asset quality to be good overall because its operations are primarily traditional retail and commercial banking in the domestic market. Around 60% of the bank's loan portfolio was to households (primarily residential mortgages) at half-year 2021. As we expect this segment to be resilient in part thanks to government support measures in the Netherlands, ABN AMRO will continue to benefit from its focus on the domestic retail market.

ABN AMRO's loan book is largely comprised of Dutch residential mortgages

Breakdown of loan book to customers by nature as of the end of June 2021 (in percentage terms)

Source: Company reports and Moody's Investors Service

Nonetheless, ABN AMRO recorded numerous large exceptional losses in recent quarters resulting in significant net income volatility. The bank announced on 9 September 2021 that its Q3 results will be negatively affected by a €250 million payment to consumers who were charged too much interest on revolving consumer credits with floating rates. On 19 April 2021, ABN AMRO announced that it had reached a settlement agreement of €480 million with the Dutch Public Prosecution Service in relation to an investigation into possible violation of the Dutch Anti-Money Laundering (AML) and Counter Terrorism Financing (CTF) act between 2014 and 2020. Payment of the settlement resulted in the bank reporting a Q1 2021 loss. These one-off losses, which relate to both lending and non-lending credit risk, are testimony to past weaknesses in the bank's risk management, control functions and compliance. However, the bank has taken numerous remedial actions in recent years aimed at moderating its risk appetite and enhancing its internal controls. We expect the ongoing implementation of such improvements and lower risks in its CIB portfolio to gradually reduce ABN AMRO's earnings volatility.

ABN AMRO's annualised cost of risk for 2020 amounted to 78 basis points (bps) of customer loans, or €2.3 billion, a higher level than the Dutch banking sector (60 bps on average). This abrupt increase in loan-loss charges from 24 bps in 2019 resulted from pandemic-related forward-looking provisions and the oil price decline, as well as impairments incurred on several large exposures. Nonetheless, the provision charges during the second half of 2020 and the first half of 2021 were much more benign. In H1 2021, the bank recorded a negative cost of risk of 18 bps (a €156 million release¹) compared to 116 bps in H1 2020 (1,814 million). The bank also estimated that the cost of risk will be well below the through the cycle guidance of 25-30 bps in 2021.

Exhibit 5

Impairment charges turned negative in H1 2021 after a difficult year in 2020 as a result of the coronavirus outbreak and significant one-offs
Loan-loss impairment charges/gross customer loans (bps)

Note: For H1 2020 and H1 2021, the cost of risk is based on annualised impairment charges.

Source: Company reports and Moody's Investors Service

The bank has limited market risk exposure, and related market risk-weighted assets (RWAs) accounted for around 2% of total RWAs as of the end of June 2021. ABN AMRO focuses on customer-driven activities and discontinued its proprietary trading activities in 2010. However, the bank still undertakes some market-making activities, which are relatively small and driven by its corporate and institutional clients.

High risk-weighted capitalization, although with higher-than-average nominal leverage

ABN AMRO reported a Common Equity Tier 1 (CET1) ratio of 18.3% as of the end of June 2021 (17.7% at end-2020), which we view as strong compared with its main domestic and European peers. The bank set a CET1 ratio target at 13% under "Basel IV", leaving some room for dividends and share buybacks, which could result in a moderate decline in capitalisation.

Nonetheless, the bank's CET1 ratio is approximately 16% on a pro-forma "Basel IV" basis and the bank said that it would consider share buybacks only if the CET1 ratio remained above 15% for the time being, which offers additional comfort to creditors and limits future pressure on capital. The bank may review the 15% share buyback threshold towards year-end 2021, as uncertainties related to litigation risks and the CIB review have subsided. The bank will not proceed to any share buybacks in 2021. The bank will also target a pay-out ratio of 50% of reported net profit after AT1 coupons and minority interests.

The minimum CET1 regulatory requirement under the Supervisory Review and Evaluation Process (SREP) for 2020 was 12.1%, including a countercyclical buffer of 0.1%. Due to the Covid crisis, the ECB and the DNB provided Dutch banks with capital relief measures. By allowing banks to use Additional Tier 1 and Tier 2 instruments to comply with their Pillar 2 requirements, suppressing the countercyclical buffers and by lowering the bank's systemic risk buffer to 1.5% from 3% and its Other Systematically Important Institutions (O-SIIs) buffer to 1.5% from 2%, the minimum CET1 requirement for ABN AMRO decreased to 9.6%². Thus, ABN AMRO has a solid 8.7 percentage points buffer³ above its requirement. ABN AMRO reported that it will not make use of IFRS 9 transitional measures embedded in "CRR2 quick fix".

Exhibit 6

ABN AMRO has high levels of regulatory capital on a risk-weighted basis

Tangible common equity/RWA (in percentage terms)

Source: Company reports and Moody's Investors Service

The bank's Tier 1 leverage ratio was 4.8% at end-June 2021. The ratio of tangible common equity (TCE)/ total assets was 5.1% as of the same date. The contrast between the strong CET1 ratio and the lower leverage ratios reflects the relatively low risk weights assigned to assets, in particular Dutch mortgages, in the calculation of RWAs.

The estimated overall effect of the application of the "Basel IV" rules given by the bank in 2018 was a 36% increase in its RWAs, before mitigation efforts (mitigation measures would lower the impact by around 20%). This estimate assumed a static balance sheet. The bank has already experienced around €24 billion RWA inflation since Q4 2018 linked to the ECB's Targeted Review of Internal Models (TRIM) and model review add-ons, including a self-imposed add-on of €1.7 billion recorded for the new mortgage models in Q1 2021. These impacts have reduced the impact related to the future application of the "Basel IV" rules on the bank's capital ratios.

In line with the change in the [Banks methodology](#) published on 9 July, we revised our previous view that AT1 securities with a high trigger would provide ABN AMRO Bank N.V. with loss absorption ahead of the point of non-viability. This revision prompted the removal of €2 billion equity credit linked to high trigger AT1 instruments from the group's capital, which was previously added to ABN AMRO's post-failure loss-absorbing instruments under our LGF analysis.

The assigned Capital score is aa3, a reflection of the strong capitalisation of the bank.

Exhibit 7

The bank's leverage has improved

Regulatory Tier 1 leverage ratio (in percentage terms)

Modest structural profitability going forward is commensurate with the bank's reduced risk profile

The low interest rate environment and the sale of higher-yielding CIB assets affected ABN AMRO's profitability in the past two years. In addition, the bank recorded numerous large exceptional losses in recent quarters resulting in significant net income volatility. Nonetheless, ABN AMRO's profitability is structurally sound and, although more modest going forward, it will be commensurate with the bank's reduced risk profile.

In H1 2021, ABN AMRO reported a net profit of €339 million, versus a net loss of €400 million in H1 2020. H1 results were affected by the €480 million provision on AML cited above. Revenues also decreased by 8% against H1 2020 due to continued pressure on net interest margins, lower corporate volumes and lower fees. Although largely a consequence of deposit margin pressure, the decline of NIMs was also partly due to the sale of non-core exposures in the CIB division.

Exhibit 8

Net interest margins supported net profits until now

Adjusted figures in accordance with Moody's calculations and adjustments.

Exhibit 9

Efficiency efforts brought significant results but one-offs and regulatory compliance staffing bring pressure Cost-to-income ratio (in percentage terms)

Cost-to-income ratios include regulatory levies. Adjusted figures in accordance with Moody's calculations and adjustments.
Source: Company reports and Moody's Investors Service

Net interest margins started to decline in 2019 and we expect them to keep falling because of the low interest rate environment and the divestment of higher-yielding non-core assets. Deposit margins are under significant pressure and the bank is only partly able to offset this by progressively lowering the thresholds for charging negative rates. The bank drew a total €35 billion of ECB's TLTRO III in 2020 and H1 2021 with a view of boosting net interest income, but loan growth was insufficient to benefit from the preferential TLTRO rate of -100 bps as of March 2021. The bank indicated that it hopes to benefit from this preferential rate during the period running between June and December 2021. We also expect fees and commissions to come under pressure due to the reduction of the CIB activities.

The bank's cost-savings plan delivered €1.1 billion recurring savings annually up to 2020 (excluding restructuring provisions). However, significant impairment charges and other costs will weigh on profit in our opinion, including bank levies and external staff recruitment related to regulatory and IT projects. The bank indicated that this will lead to an increase in total operating expenses to €5.3 billion for full year 2021, up around 1% year-on-year.

The bank's reported cost-to-income ratio was 86% in H1 2021. This is much above the previous target, which has been abandoned by the bank, of 56%-58% by 2020 and less than 55% by 2022. The cost-to-income ratio target was replaced by a cost base target of no more than €4.7 billion by 2024. The bank has postponed its cost-to-income target indefinitely because of the persistently low interest rates and resulting pressure on margins.

The assigned profitability score of ba3 reflects our view of the structural modest but stable profitability of the bank going forward.

Robust liquidity, partly because of its strong private banking franchise

We view ABN AMRO's liquidity as robust, and we expect it to remain so over the coming quarters. As of the end of June 2021, the bank disclosed a loan-to-deposit ratio of 100%, reflective of the strong increase of savings during the lock-down periods. The loan-to-deposit ratios were 114% and 106% at year-ends 2019 and 2020, respectively. This funding position is supported by ABN AMRO's strong position in retail banking in the Netherlands, but also in private banking, which generates relatively limited lending and brings substantial deposits. These private banking deposits will remain an important source of funding for ABN AMRO, but we consider them to be more confidence sensitive and less sticky than retail deposits.

Exhibit 10

Exhibit 11

Wholesale funding decreased since 2012, despite a spike linked to TLTRO III in 2020 / H1 2021

Market funds/tangible banking assets (in percentage terms)

Source: Company reports and Moody's Investors Service

Risks stemming from the reliance on wholesale funding are mitigated by the term structure of the outstanding debt, as well as the adequate liquidity buffer. As of end-June 2021, the liquidity buffer of €108.5 billion represented more than five times all the wholesale debt securities maturing within one year, which we consider a strong coverage of liquidity risk. The bank's liquidity coverage ratio was 166% on average during the twelve months ending June 2021 and net stable funding ratio at end-June 2021 was above 100%, as reported by the bank.

All these factors are reflected in our combined Liquidity score of baa1. The score also reflects the abundant source of cheap funding and liquidity available via the Long-term Refinancing Operations (TLTROs) by the ECB. We believe these amounts are largely deposited back at the ECB (to take advantage of favorable terms offered on funding rate), rather than being recycled for investment purposes. In H1 2021, the bank's TLTRO take-up amounted to €35 billion and we have consequently deducted the amount redeposited at the ECB from both the Market funding ratio and the Liquidity ratio in our scorecard.

Environmental, social and governance considerations

In line with our general view on the banking sector, ABN AMRO has a low exposure to environmental risks (see our [Environmental risks heat map](#) for further information).

For social risks, we also score ABN AMRO in line with our general view for the banking sector, which indicates moderate exposure (see our [Social risks heat map](#)). Social considerations are relevant for ABN AMRO in the sense that, as for other Dutch banks, it is likely subject to regular investigations by the Dutch supervisor related to good customer care and the possible sale of unsuitable or uneconomical products to clients. Investigations and related fines imposed by supervisors represent significant reputational risk for banks.

Governance is highly relevant for ABN AMRO, as it is to all competitors in the banking industry. This is particularly true for ABN AMRO because the bank is still majority owned (56.3%), directly and indirectly, by the Dutch State via NLF. Corporate governance weaknesses can lead to a deterioration in a bank's credit quality, while governance strengths can benefit its credit profile. Weak risk

management and control functions resulted in several failures in recent years, including mis-selling fines, a large loss in prime brokerage and a trade finance fraud case. These one-off losses, which relate to both lending and non-lending credit risk, are testimony to past weaknesses in the bank's risk management, control functions and compliance. However, the bank has taken numerous remedial actions in recent years aimed at moderating its risk appetite and enhancing its internal controls.

Support and structural considerations

Loss Given Failure (LGF) analysis

ABN AMRO is subject to the European Union Bank Recovery and Resolution Directive, which we consider to be an Operational Resolution Regime. In estimating loss given failure, we assume residual TCE of 3% and losses post-failure of 8% of tangible banking assets, a proportion of deposits considered junior of 26%, a 25% run-off in junior wholesale deposits, a 5% run-off in preferred deposits and assign a 25% probability to deposits being preferred to senior unsecured debt. These are in line with our standard assumptions. All Additional Tier 1 (AT1) instruments are included in our LGF analysis, including the €2 billion of high-trigger AT1 instruments as of year-end 2020.

Under Moody's Advanced forward-looking LGF analysis, the portion of ABN's TLTRO drawdowns which we estimate is redeposited at the ECB is deducted from the bank's tangible banking assets, thereby reducing the inflationary impact of TLTRO on the bank's balance-sheet. We assume that the portion of borrowed funds re-deposited at the ECB will be running off medium-term. This adjustment does not result in a change in ratings uplift.

ABN AMRO's deposits are likely to face very low loss given failure because of the loss absorption provided by the combination of substantial deposit volume and subordination. This results in a two-notch uplift from the Adjusted BCA.

ABN AMRO's senior unsecured debt is also likely to face very low loss given failure. This is supported by the combination of senior debt's own volume and the amount of subordination. This results in a two-notch uplift from the Adjusted BCA.

For subordinated and junior securities, our LGF analysis indicates high loss given failure because of the small volume of debt and limited protection from more subordinated instruments and residual equity. We also incorporate additional notching for junior subordinated and preference share instruments, reflecting the coupon features.

Government support considerations

Since we consider ABN AMRO to be a systemically important bank in the Netherlands, we believe there is a moderate probability of government support, resulting in a one-notch uplift for both the long-term deposit rating of A1 and senior unsecured debt rating of A1.

For subordinated and other junior securities, we believe that the likelihood of government support is low and these ratings do not include any uplift. Junior securities also include additional downward notching from the Adjusted BCA, reflecting coupon suspension risk ahead of a potential failure.

Counterparty Risk Ratings (CRRs)

ABN AMRO's CRR is Aa3/Prime-1

The CRR for ABN AMRO, before government support, is three notches higher than the Adjusted BCA of baa1, based on the level of subordination to CRR liabilities in the bank's balance sheet, and assuming a nominal volume of such liabilities. The CRR also benefits from one notch of government support, in line with our support assumptions on deposits and senior unsecured debt.

Counterparty Risk (CR) Assessment

ABN AMRO's CR Assessment is Aa3(cr)/Prime-1(cr)

Before government support, the CR Assessment is positioned three notches above the Adjusted BCA of baa1, based on the buffer against default provided to the senior obligations represented by subordinated instruments subordinated to the senior obligations represented by the CR Assessment.

The CR Assessment also benefits from one notch of government support, in line with our support assumptions on deposits and senior unsecured debt. This reflects our view that any support provided by governmental authorities to a bank, which benefits senior unsecured debt or deposits, is very likely to benefit operating activities and obligations reflected by the CR Assessment as well,

consistent with our belief that governments are likely to maintain such operations as a going concern to reduce contagion and preserve a bank's critical functions.

Methodology and scorecard

About Moody's Bank Scorecard

Our scorecard is designed to capture, express and explain in summary form our Rating Committee's judgement. When read in conjunction with our research, a fulsome presentation of our judgement is expressed. As a result, the output of our scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

CREDIT RATINGS ISSUED BY MOODY'S CREDIT RATINGS AFFILIATES ARE THEIR CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES, AND MATERIALS, PRODUCTS, SERVICES AND INFORMATION PUBLISHED BY MOODY'S (COLLECTIVELY, "PUBLICATIONS") MAY INCLUDE SUCH CURRENT OPINIONS. MOODY'S DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE APPLICABLE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S CREDIT RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS, NON-CREDIT ASSESSMENTS ("ASSESSMENTS"), AND OTHER OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody's.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY125,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
