

Polymer Compounds

Your partner in polymer recycling & compounding

Ravago Manufacturing is a global producer of high-quality polymer compounds including polyolefins, engineering plastics, thermoplastic elastomers and rubbers. We offer both virgin and recycled grades in many polymer types, and have extensive knowledge and expertise in the plastics industry. We work together with our customers to deliver solutions for their most demanding application needs.

Polyolefins & Commodities

Our extensive polyolefins and commodities portfolio contains both virgin and recycled materials with a range of properties to suit a wide range of performance and aesthetic requirements.

	Type			Composition & Performance									
	Virgin	Recycled (Pre-use)	Recycled (Post-use)	Unfilled	Glass Filled	Mineral Filled	Flame Retardant	UL Listed Grades	UV Stabilised	Heat Resistant	Impact Modified	Anti-static	Custom Color
