

TELUS Hybrid Cloud with Microsoft

An ideal solution for Website-as-a-Service (WaaS).

Easily build, deploy and manage your business web applications in a secure and scalable environment.

In today's hyper-connected world, digital media is a critical aspect of every business, both internally and externally. Businesses of all sizes now require the capability to deploy web applications and digital assets anywhere, anytime and on any device to deliver a good digital customer experience. To support this challenge, businesses need the ability to rapidly and cost-effectively build and deploy their websites and applications almost instantly.

TELUS Hybrid Cloud is a hosted, high-density, scalable and secure multi-tenant solution that can be used as a self-serve web hosting platform which enables you to build and deploy mission critical web sites and applications almost instantly. It can support both template web applications and a broad range of programming languages.

TELUS Hybrid Cloud is an enterprise grade, secure and scalable service that offers:

- **Self-Serve Portal:** access the world's most popular web solutions (Microsoft Web App Gallery) via an easy-to-use portal
- **Integration:** obtain seamless integration with a secure SQL database instance, and integration with Microsoft's Web App Gallery
- **Extensive resources:** leverage programming languages like ASP, .NET, Java, PHP, Node.js, and Python as well as content management platforms like WordPress, Umbraco, Joomla, and Drupal
- **Extended capabilities:** harness the full power of .NET, Visual Studio and TELUS Hybrid Cloud to build modern business applications
- **Scalability:** quickly and easily adjust resources up or down and provision hardware/software as needed to accommodate existing or new projects
- **Flexibility:** improve speed to market with a complete hosted Development Operations (DevOps) environment including compute, storage, network and database
- **Productivity:** improve user productivity with familiar, consistent environments and toolsets across the entire work stream

TELUS Hybrid Cloud, when used for WaaS, provides the following benefits to business and IT:

Business Benefits	IT Benefits
<ul style="list-style-type: none"> ■ Create engaging customer web applications anywhere and on any device ■ Design, develop and deliver experiences that reach your customers with rich, interactive media ■ Start from scratch with a modern web framework or use a Web App Gallery from one of the world's most popular open source web applications ■ Scale up or down on demand for an improved digital experience 	<ul style="list-style-type: none"> ■ Provide everyone with access to a production-like environment at every phase of the Software and Development Lifecycle, making it easier to avoid costly production issues, as well as detect and resolve defects with less effort ■ Ensure platform consistency for both development and production ■ Enable IT to become a broker of the Dev-Test resources for the users ■ Create policy and a governance model for easy user setup ■ Facilitate global development (Microsoft Azure) and, when ready for production, the migration of applications to local TELUS Public/Private Cloud infrastructure

Why TELUS Hybrid Cloud for WaaS?

TELUS Hybrid Cloud lets you choose from three clouds; TELUS Public, TELUS Private and Microsoft Azure. With this flexibility, websites and applications can be built and deployed rapidly and easily in any environment. Development and Testing can be done in the Public Cloud and the website/application can be hosted in the Private Cloud based on security and regulatory requirements. Additionally it offers seamless integration with a secure SQL database instance, and integration with Microsoft's Web App Gallery. Web applications can also be integrated with Office 365, SharePoint, and other Microsoft tools scripts and APIs. Furthermore, TELUS Cloud Advisory Services can help expedite your migration process and help you move workloads and applications to the cloud faster.

For more information on how you can leverage TELUS Hybrid Cloud for WaaS please contact your TELUS Account Manager or call **1-877-710-0404**.
