

## BROOKLYN — PROJECT #SEK002386 REPLACEMENT OF COMBINED SEWERS, BULKHEADING OF EXISTING SEWERS AND WATER MAIN REPLACEMENT IN PARK PLACE

The NYC Department of Design and Construction is investing approximately \$10 Million to upgrade the infrastructure in Prospect Heights, Brooklyn. The SEK002386 project will help improve water quality and limit the likelihood of flooding during extreme weather events by upgrading utilities and replacing or reconstructing combined sewers, catch basins, and other underground components. The anticipated project completion is summer 2024.

## PROJECT QUARTERLY

### WHAT'S NEW AT PROSPECT HEIGHTS

- Completion of test pits to verify underground conditions and locate the electrical duct bank and four feeders at the intersection of Park Pl. and Vanderbilt Ave.
- Removal of three of four feeders at the intersection of Park Pl. and Vanderbilt Ave. to facilitate the installation of a combined sewer line

### PROJECT HIGHLIGHTS

*Con Edison removal of feeders at the intersection of Park Place and Vanderbilt Avenue*

## PROPOSED WORK SCHEDULE

The schedule update below is due to the presence of four manholes and ducts that interfere with the installation of the new combined sewer line at Vanderbilt Avenue, which has required significant coordination with Con Edison. As of January 2024, Con Edison has removed three of four feeders. The remaining feeder is scheduled to be removed by the end of the month. This schedule is subject to change.

### Winter – spring 2024:

- Removal of remaining feeder interfering with the installation of the combined sewer line at Vanderbilt Avenue from Sterling Place to Park Place
- Installation of combined sewer line at Vanderbilt Avenue from Sterling Place to Park Place

### Summer 2024: Final restoration

## SPECIAL NEEDS

Individuals with special needs who may be uniquely impacted by this project should contact the project's Community Construction Liaison, as soon as possible, to make them aware of your situation. DDC will work with you to minimize the inconvenience as much as possible.

## DID YOU KNOW?

New York City's water distribution system delivers over 1 billion gallons of water each day to all five boroughs.

## WHAT TO LOOK OUT FOR

### COMMUNITY IMPACTS

During construction hours, you can expect the following:

- Parking and driveway/loading dock restrictions. Signs will be posted within the affected areas. Emergency vehicle access and pedestrian access to sidewalk and buildings will be maintained at all times. Parking and driveway restrictions will be cleared as soon as possible.
- Water service interruptions. For the remainder of the project there will be occasional water service interruptions to allow for pipe replacement. Advanced notice will be given for all planned interruptions. Water service will be restored by the end of each day.
- Vehicular travel lane closures will be required, as well as detours. Warning signs will be posted in advance.
- Increased levels of dust, noise, and heavy equipment.
