

BROOKLYN — PROJECT #SEK002386 REPLACEMENT OF COMBINED SEWERS, BULKHEADING OF EXISTING SEWERS AND WATER MAIN REPLACEMENT IN PARK PLACE

The NYC Department of Design and Construction is investing approximately \$10 Million to upgrade the infrastructure in Prospect Heights, Brooklyn. The SEK002386 project will help improve water quality and limit the likelihood of flooding during extreme weather events by upgrading utilities and replacing or reconstructing combined sewers, catch basins, and other underground components. The anticipated project completion is summer 2024.

PROJECT QUARTERLY

WHAT'S NEW AT PROSPECT HEIGHTS

- Completion of 20-inch water main at the intersection of Underhill Avenue & Park Place
- Installation of 24-inch combined sewer at Underhill Avenue
- Completion of 12-inch water main at Park Place between Vanderbilt Ave and Underhill up to the intersection
- Consolidation of storage material at Park Place to restore public parking
- Restoration of Underhill Avenue between Park Place and Sterling Place

PROJECT HIGHLIGHTS

Asphalt restoration at Underhill Avenue

New ADA-compliant pedestrian ramp at the corner of Park Place and Underhill Avenue

PROPOSED WORK SCHEDULE

The latest schedule update below is due to the presence of two manholes and ducts that interfere with the installation of the new combined sewer line at Vanderbilt Avenue, which has required significant coordination with Con Edison. This schedule is subject to change.

- **Fall 2023 – winter 2024:** Removal of two existing electrical manholes and ducts interfering with the installation of the combined sewer line at Vanderbilt Avenue from Sterling Place to Park Place
- **Spring 2024** (previously winter 2024): Installation of combined sewer line at Vanderbilt Avenue from Sterling Place to Park Place
- **Summer 2024** (previously spring 2024): Final restoration

SPECIAL NEEDS

Individuals with special needs who may be uniquely impacted by this project should contact the project's Community Construction Liaison, as soon as possible, to make them aware of your situation. DDC will work with you to minimize the inconvenience as much as possible.

DID YOU KNOW?

The New York Public Library Main Branch at 42nd Street and Fifth Avenue was once the location of an above ground reservoir holding 20 million gallons of water to provide New York City with drinking water during the 19th century.

WHAT TO LOOK OUT FOR

COMMUNITY IMPACTS

During construction hours, you can expect the following:

- Water service interruptions. For the remainder of the project there will be occasional water service interruptions to allow for pipe replacement. Advanced notice will be given for all planned interruptions. Water service will be restored by the end of each day.
- Parking and driveway/loading dock restrictions. Signs will be posted within the affected areas. Emergency vehicle access and pedestrian access to sidewalk and buildings will be maintained at all times. Parking and driveway restrictions will be cleared as soon as possible.
- Vehicular travel lane closures will be required, as well as detours. Warning signs will be posted in advance.
- Increased levels of dust, noise, and heavy equipment.
