Good Afternoon,

Over the past week, the contractor has working to resolve each of the issues we received over the last month. Here are the updates on their progress:

- The entire storage area has been reorganized, with some materials relocated and removed from Park Place.
- All unused cones and barriers have been removed.
- Wood materials have been consolidated.
- Storage on Park Place has been reduced to one area at the corner of 250 Park Place, and this storage area has been pushed back.
- Storage in front of 254 Park Place has been reduced and materials have been removed.
- Removal of small storage areas in front of 299 Park Place and 286 Park Place restoring parking back to the community.

1 Cleared storage area in front of 230 Park Pl.

2 Increased street access by storage area in front 262 Park Pl.

3 Parking restored in front of 299 Park Place and 286 Park Place

4 Cleared storage area in front of 254 Park Pl.

Please note that the tree guards have not been removed yet due to ongoing storage on the street. Removing the tree guards now could result in the contractor being ticketed for not adhering to regulations.

If you have any questions, please respond to this email
