

# Digital Citizenship

Ages 5 - 11

Navigate the digital world safely and become internet savvy.

## Description

Social Kids is an online safety training adventure, made up of 5 adventures, that can be taken with parents or via a supervised online class every afternoon. After each adventure children need to upload an activity that demonstrates that they have understood the lesson. They will earn digital badges for each adventure, ending with a global surfer badge, a print-at-home personalised certificate and picture frame. Parents can download a parent guide that will assist them in continuing the discussions and set up security measures to protect their child's privacy.

### The 5 adventures consist of:

#### 1. *Being SMART online*

Here we teach our adventurer what questions to ask and how to have a positive fingerprint online and how to balance their time between digital play and real play. This journey will cover the dos and don'ts of digital safety. Encouraging children to have open conversations with their parents or guardians about what they find online.

#### 2. *Kung Fu Fighting*

We help children to identify a bully online, teaching them the skills to navigate and share their experiences to stop the behaviour as quickly as possible. Children will understand how to safeguard their private information and what to do if they are being mistreated online.

#### 3. *Truth or Dare*

Codey will show children that not everything they find online is true, what they should look for before they trust anything online. How to tell a good story when they are connecting in person and how the internet and algorithms work.

#### 4. *I speak Digital*

Codey will describe what online manners are, what certain messages and symbols on the internet mean and how to interpret them. Codey explains in detail how to play games safely and when to show your true colours or when not to!

#### 5. *Global Surfer*

Codey ensures the brave adventurers can confidently connect with the world by reinforcing the main topics allowing them to surf safely. They understand the dangers that could be out there, and highlight the positives that our digital world has to offer.

## Duration

Once a week for 6 weeks.

## Cost

R350.00

*Parents need to pay upfront in order to gain access to the Adventure videos and their dashboard.*

## Who can join?

Ages 5 - 11

## Programme Requirements:

- Students will need Wi-Fi and Adobe Acrobat.
- Parents can either print the activities and children can complete them by hand, or complete the activities digitally by using Adobe Acrobat.

## Students Responsibilities:

- Students must log into the website to access their adventure. They have 6 weeks to complete the digital journey.
- Students can complete the course with their parents or join a supervised online class, where Miss Nadie will ensure they have understood the lesson.
- Students must complete the activities after each adventure and upload it to the site to progress to the next level and receive a digital badge.
- After adventure 5, students will receive a personalised certificate of achievement and picture frames to proudly display their accomplishment.
