## Investment objective & strategy

The Sygnia Health Innovation Global Equity Fund is a Global–Equity–General portfolio that seeks to deliver long-term capital growth by investing at least 80% of its assets outside of South Africa and being at all times invested in a minimum of 80% equities. The portfolio invests in financially sound equity securities, preference shares that generate capital growth, property shares and property-related assets, fixed income securities and assets in liquid form, be such securities, instruments or assets listed or unlisted financial instruments (derivatives).

## Risk profile

The portfolio represents Sygnia's best investment view on the optimal combination of securities required to achieve superior long-term returns at a reasonable level of risk at any time. The portfolio exploits the benefits of diversification and changes its exposure to different securities and sectors on an active basis, according to prevailing market conditions. While aiming to achieve its investment objectives, the portfolio recognises the inevitability of significant short-term volatility and aims to protect capital over the medium to long term.
