# Investment objective and strategy

The objective of the Sygnia Itrix S&P Global 1200 ESG ETF is to provide an investment vehicle to investors who want to achieve long term capital appreciation in tracking the performance of the S&P Global 1200 ESG (.SPGESUP) ("benchmark index"). In order to achieve this objective, the Sygnia Itrix S&P Global 1200 ESG ETF shall track the S&P Global 1200 ESG (.SPGESUP) Index as closely as practically and feasibly possible by buying securities that substantially make up the index at similar weighting as they are included in the Index. Whenever the Index gets rebalanced, the Portfolio will be rebalanced to align its holdings to that of the benchmark and to the extent that it's performance will not deviate from its benchmark.

## Risk profile

The Fund has a 100% strategic allocation to global equities. The risk in the Fund is managed by spreading investments across countries, sectors and individual shares. However, the structure of the Fund is dictated by the composition of the S&P Global 1200 ESG Index. The S&P Global 1200 ESG index is a subset of the S&P Global 1200 index, designed to measure the performance of securities meeting sustainability criteria, while maintaining overall industry group weights as the S&P Global 1200 index.
