Investment objective and strategy

The Sygnia Skeleton Balanced Absolute Fund is a South African–Multi-Asset–Low Equity portfolio comprised of investments in multiple asset classes as set out below and may include international assets. The fund targets positive returns over rolling 12-month periods and as such has an absolute return focus. The fund has exposure to both domestic and foreign assets, including equities, fixed income and money market assets, and is comprised of a number of underlying portfolios predominantly managed on a passive, index-tracking basis. The fund targets a performance benchmark of SA CPI + 2%.

Risk profile

The risk in the fund is managed by spreading investments across asset classes to deliver uncorrelated returns over time, ensuring a diverse source of returns over market cycles. Tactical asset allocation is used to take advantage of short-term mispricing opportunities in the market in an efficient and cost-effective manner and as a risk management tool in times of market downturns.
