Sygnia Itrix MSCI Japan Index ETF

A high risk, passively managed index tracking fund whose objective is to replicate the price and yield performance of the MSCI Japan Index.

Risk profile

Investment objective and strategy

The composition of the Sygnia Itrix MSCI Japan Index ETF will be adjusted periodically to conform to changes in the composition and weighting of the securities in the MSCI Japan Index so as to ensure that the composition and weighting of the portfolio are represented of the composition and weightings contained in the index. This is a high risk, passively managed index tracking fund, with an objective to replicate the price and yield performance of the MSCI Japan Index as closely as possible by physically holding a portfolio of securities representative of the composition and weighting of the securities contained in the index. Index Performance data can be sourced from Bloomberg, Reuters, other data providers and at www.sygnia.co.za.

Risk profile

The Fund has a 100% strategic allocation to Japanese equities. The risk in the fund is managed by spreading investments across sectors and individual shares. However, the structure of the fund is dictated by the composition of the MSCI Japan Index. The focus on a high dividend stream and mid-to-large cap companies provides an added benefit in terms of risk management.

Who should invest?

The Sygnia Itrix MSCI Japan Index ETF tracker has a high risk profile and is a free float-adjusted market capitalisation index designed to measure developed market equity performance in Japan. It is a suitable investment for investors seeking higher returns, those who are willing to tolerate higher volatility and investors who aim to maximise capital accumulation over a longer-term time horizon. The investment is also suitable for investors who wish to maximise their returns in the most cost-effective manner without the need to select asset managers or take on the risk of active and subjective investment decision-making processes. Given the specialist nature of the fund, it should be used as part of a diversified investment strategy rather than as a sole equity investment.

Sygnia Itrix (RF) (Pty) Ltd is a registered and approved Manager under the Collective Investment Schemes Control Act, 2002. Sygnia Asset Management (Pty) Limited (FSP 873), an authorised financial services provider, is the appointed investment manager of the Fund. Sygnia Itrix does not provide any guarantee with respect to the capital or return of the portfolio. Collective Investment Schemes (CIS) are generally medium to long-term investments. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. The value of investments/units may go down as well as up and past performance is not necessarily an indicator of future performance. ETFs trade on stock exchanges and may therefore incur additional costs associated with listed securities. Unlike a unit trust, which can be bought or sold only once per day, an ETF can be traded intraday, during exchange trading hours. ETFs may invest in foreign securities, which may be exposed to macroeconomic, settlement, political, tax, liquidity, and foreign exchange risks. Performance is calculated for the portfolio, and the individual investor performance may differ as a result of trading cost, price paid for investment share. Additional information on the Index including its performance and tracking error can be viewed on the relevant Minimum Disclosure Document (MDD) on www.sygnia.co.za. A schedule of fees, charges and where the ETF engages in securities lending activities, information on such securities lending activities may be requested via admin@sfs.sygnia.co.za or 0860 794 642. The complete terms and conditions of your ETF investment are contained in the fund's offering circular, pre-listing statement, programme memorandum and/or supplemental deed and index constituents with prices are published daily on Sygnia's website.
