## TABLE OF CONTENTS

---

GENERAL INFORMATION/TERMS	58-61
PRODUCT AND FINISH MANUAL	62-65

---

### HALO COLLECTION - ACRYLIC

1 3/8" - 35mm	4-5
1 3/4" - 45mm	6-7
2 1/8" - 55mm	8-9

### HALO COLLECTION - WASHED WOOD

1 3/8" - 35mm	10-11
1 3/4" - 45mm	12-13
2 1/8" - 55mm	14-15

### HALO COLLECTION - GLOSS

1 3/8" - 35mm	16-17
1 3/4" - 45mm	18-19
2 1/8" - 55mm	20-21
Wands	21

### BARNWOOD COLLECTION

1 3/8" - 35mm	22-23
1 3/4" - 45mm	24-25
2 1/8" - 55mm	26-27
Wands	26
Holdbacks	27

### RUSTICA COLLECTION

1 3/8" - 35mm	28-29
1 3/4" - 45mm	30-31
2 1/8" - 55mm	32-33
Wands	32
Holdbacks	33

### NEON FLORAL COLLECTION

1 3/8" - 35mm	34-35
1 3/4" - 45mm	36-37
2 1/8" - 55mm	38-39
Wands	38
Holdbacks	39

### ROMANTIC FLORAL COLLECTION

1 3/8" - 35mm	40-41
1 3/4" - 45mm	42-43
2 1/8" - 55mm	44-45
Holdbacks & Wands	46

### BESPOKE COLLECTION

Finish/Colors	47
1 3/8" - 35mm	48-49
1 3/4" - 45mm	50-51
2 1/8" - 55mm	52-53
Wands	52
Holdbacks	53
Banding	54-57

	Sand and Silver Distressed 947*

#### RING FINISHES

\* 3 Finishes in our Bespoke collection are NOT offered on the rings due to the fine detailing required to create these finishes. To compliment these finishes, the rings offered for each are as follows: (see page 135 of catalog for images)

- A. Red Distressed Gilt we will supply [Antiquities Gilt Rings](#)
- B. Red Distressed Silver we will supply [Antiquities Silver Rings](#)
- C. Sand & Silver Distressed Gilt we will supply [Silver Leaf Metro Rings](#)

Note: Antiquities Gilt, Antiquities Silver and Silver Leaf Metro are NOT included in our catalog, as these finishes are used on the rings shown in the images. All standard finishes can be found in this catalog.

#### ADDITIONAL BANDING ACCENT CHOICES

BANDING (Bespoke Only)	Gilt (Gold Leaf)

# BESPOKE COLLECTION

## BANDING

Banding can be applied to enhance the overall look of a product and or window treatment by highlighting details to complement surrounding hardware, decor and soft furnishings.

See page 61 for additional information.

THE FOLLOWING ARE OUTLINES OF THE ITEMS THAT CAN BE BANDED.  
THE LETTER ILLUSTRATES THE AREA THAT CAN BE CHOSEN TO BAND.

Banding is available in Gilt, Silver and Black finishes only.

BANDING IS CHARGED BY THE ITEM,  
NOT BY THE NUMBER OF BANDS SELECTED.

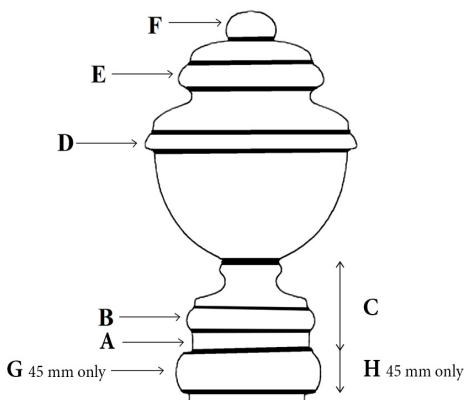

Bracket Banding Charges - Retail

Band Code	35mm	45mm	55mm	Price

# GENERAL TERMS, CONDITIONS AND PRODUCT INFORMATION

## ORDERS

---

Orders may be received via email, fax or internet. Verbal orders will not be accepted. Incomplete information will delay order processing and shipping.

Fabricut Hardware Customer Service  
PHONE: 800.763.1348  
FAX: 918.392.6085  
EMAIL: HARDWARE@FABRICUT.COM  
WEBSITE: WWW.FABRICUT.COM

## LEAD TIME & RUSH ORDERS

---

**Lead time:** Orders require approximately 15 BUSINESS DAYS for production time. This does not include shipping time. Orders are typically received in 2-3 weeks.

**Rush Orders:** Rush orders may be available upon request and must be approved by Byron & Byron. Additional charges may be included on a "per order" basis.

## PAYMENT

---

Payment terms are Net 30, Cash on Delivery (COD) or Proforma (CBD). Credit cards accepted are Visa, Mastercard, Discover and American Express. A \$25 fee will be charged for any returned checks.

## PRICES & SHIPPING

---

Prices are subject to change without notice. Typographical errors are subject to correction. Prices do not include shipping, handling and special processing charges which are additional charges.

All Byron & Byron product is designed in the United Kingdom. Orders ship via UPS Ground from Dallas, Texas. An additional surcharge over commercial rate will be billed for residential delivery.

## CANCELLATIONS & RETURNS

---

All of our items are made to order and are produced individually for each order. Consequently, cancellations, changes and returns are not permitted once an order is processed.

## DAMAGED GOODS

---

It is recommended that you inspect your entire order upon delivery. Any claim for damaged merchandise must be made with the shipping company within 15 days of receipt. No claims after 15 days will be accepted. When making a claim, please keep all packing materials, as claims may require inspection of these materials.

## INSTALLATION

---

Molly bolts and anchors are recommended for all installations but are not included. Support brackets are recommended every 3-4 feet (every 3-feet for acrylic poles). An experienced professional installer will be able to determine where support is necessary. It is strongly recommended that experienced professional installers are used for your installation.

## INSTALLATION HARDWARE

---

Installation hardware, such as screws, molly bolts, etc., are NOT included with orders.

## PRODUCT INFORMATION

---

As these are hand made pieces, variations from photographs, samples and prior orders may occur. It is recommended that orders for a single room be placed at the same time, for dye lots to match.

Wood items may vary slightly in size due to the nature of the materials and production process.

# GENERAL TERMS, CONDITIONS AND PRODUCT INFORMATION

## NOTES WHEN ORDERING:

### FINISHES

---

**Finishes are NOT interchangeable between collections.**

All finishes are produced by hand. Dye lots will vary.

There are no specific repeats or “patterns” to any finish. Coverage will vary from piece to piece, order to order. There may be heavier or lighter coverage on each piece and throughout a single piece. This is the “nature” of the technique and finish.

**Resin Finials, Holdbacks and Brackets CANNOT be stained.** Resin can be painted to “look like / imitate” stain. They can be painted to “match” the stain color as closely as possible. But exact color matches are NOT guaranteed as different techniques (Painting vs Staining), are being applied to different materials (Resin vs Wood).

**Metal Brackets CANNOT be stained or painted.** They are available ONLY in the finishes shown/specified in the catalog and price list.

**Custom Finish:** Custom finishes are available with any Byron & Byron collection. Finishes are matched up to 95% accuracy. A strike-off sample is available upon request for \$70. Lead time begins upon approval of strike-off. Fee is 10% of order value, with a minimum of \$100 per order.

### SAMPLE CHIP FINISHES

---

**Sample Chip Finishes:** Byron & Byron sample chips are a representation of the finish. Due to the nature of the materials and the hand painted technique, acceptable variations will occur from sample chip to sample chip. These same acceptable variations can occur from sample chip to actual finished product.

### POLES

---

**Ordering:** Poles can be cut to your required length at no additional charge. No returns accepted on any poles that have been cut.

**Splicing/Joining:** If you intend to splice / join poles together for extended lengths, you must specify this on your order so that they are finished and drilled for the proper application. Splicing screws will be included ONLY if you specify this application. Additional brackets will be required to support the expanse and the splicing joint.

### PACKAGING FEE

---

A packaging fee of \$10 (net) will apply to any order that has a pole.

# GENERAL TERMS, CONDITIONS AND PRODUCT INFORMATION

## HALO POLES

---

**Pole Size:** Poles are available in the following 3 diameters: 1 3/8" / 35mm, 1 3/4" / 45mm & 2 1/8" / 55mm.

Acrylic poles are available in 2 lengths: 6 1/2' / 200 cm and 8 1/8' / 244cm.

Acrylic poles are available in one continuous piece up to the length of 96 1/8" / 244cm.

All other poles are available in up to 5 lengths (see pricing section for specific lengths) with a maximum length of 94 1/2" / 240cm. NOTE - Actual lengths are all not in full feet. Read dimensions carefully.

All poles can be cut to your required length at no additional charge. No returns accepted on any poles that have been cut.

We strongly recommend that acrylic poles be cut by Byron & Byron.

Should you choose to cut down the Acrylic pole yourself, please note that the blade will need to be cooled down when cutting the pole as it can become very hot and subsequently melt or mar the pole.

No returns or cancellations accepted on any poles that have been cut.

**Splicing/Joining:** A pilot hole must be made in the poles before screwing the brackets to the pole. Your installer should use a clean and sharp 3mm drill bit that is appropriate for acrylic.

A Joining Bracket is required in place of a joining / splicing screw for all Halo acrylic installations.

**Weight Restrictions:** There are certain weight restrictions applicable for each diameter of the Halo acrylic poles.

1 3/8" - 35mm Dia	7 to 10 lbs per yard.
1 3/4" - 45mm Dia	12 lbs per yard.
2 1/8" - 55mm Dia	12 lbs per yard.

**Easy Glide Tape should not be applied to the acrylic poles.** The Halo Metal and Passing rings have a silicon strip around the inner circumference of the ring to ease the gliding of the rings on the poles.

## EASY GLIDE TAPE (For use on Wood poles)

---

**Easy Glide Tape can be ordered with every wood pole order at NO Charge. Easy Glide Tape should not be applied to acrylic poles,** as it may be visible through the pole and will not be included in orders for acrylic poles. Easy Glide Tape provides a slick surface for drapery rings to easily glide over a drapery pole.

## BRACKETS

---

Use a support bracket for any pole in excess of 4 feet. We do not guarantee against sagging caused by unsupported spans over 4 feet. (3 feet for acrylic poles).

End and Center Metal Brackets Available in Brass, Chrome and Antique Brass only. They are NOT compatible with the following finials:

Neon: 45mm ROSE, 55mm ROSE  
Romantic: 45mm ROSE, 55mm ROSE  
Bespoke: 55mm Alton

Invisible Brackets are available in Antique Brass ONLY

# GENERAL TERMS, CONDITIONS AND PRODUCT INFORMATION

## RINGS

---

A typical installation calls for 3-4 rings per pole foot length. Consult your design professional for your specific project requirements.

## HALO RINGS

Standard rings are available in Acrylic, Chrome, Burnished Brass and Copper.

Passing Rings only available in Chrome, Burnished Brass and Copper. All metal rings are lined with a silicon strip.

For poles requiring passing brackets and rings, the 2 rings positioned on the ends of the poles between the bracket and finial must be standard rings and not passing rings to prevent the rings from sliding over the end brackets.

## ADAPTORS - BESPOKE ONLY

---

Adaptor bases are used with the following 35mm finials to "adapt" to 45mm poles:

1. Aercolaneum
2. Paestum
3. Pompeii
4. Globe

They are automatically included with your order when you order the 45mm finial. Please be sure that your installer is aware of this so they are not inadvertently thrown away.

## BANDING - BESPOKE ONLY

---

Banding is offered in 3 colors; GILT, SILVER and BLACK. They may NOT be mixed on a piece. Accent banding in gilt, silver and black is available as an ADDITIONAL finish on certain BESPOKE finials, brackets and holdbacks to enhance the overall look of the product. Refer to the catalog to identify areas where the "banding" can be applied. **Banding will not be applied unless specified on your order, regardless of photography in the catalog.** In the catalog, they are identified as, "with banding", which is considered ADDITIONAL and must be specified on your order.

In your order, specify the color and specific areas where you want the banding to be added. You may select any combination of the specified areas for banding, for example: "A + C" or "A + B + C" or "C only". Banding is not available in any areas NOT specified in the drawings. Charges for banding can be found in the pricelist. They are identified with a 1 or 2 in the pricelist for the price level. Pricing is per piece, not per area.

# BYRON & BYRON PRODUCT AND FINISH MANUAL

## GILT & SILVER FINISHES<sup>1</sup>:

### GILDING

---

All of Byron & Byron's gilt and silver finishes are produced using real metal leaf, not gold paint. Why do it this way? Because this is the classical method, and it is the only way to get a proper gold or silver color without it being too dull or too green.

### WHAT IS METAL LEAF?

---

Metal Leaf is a special type of gilding which uses a gold colored metal leaf, flattened and hammered down extremely thinly. This leaf is then applied to a prepared surface using a "size" (a kind of glue). Once it has been laid on the sized surface, the leaf is burnished using a burnishing tool or is buffed using special wool cloth (to get a more matte finish). Then the surface can either be fixed or it can be distressed to reveal the color of the substrate onto which the leaf has been applied.

In the old days, surfaces would have been leafed to make them look like solid gold or solid silver, but with the passing of time and with the rubbing of hands, the leaf would have worn out or, as described now, would be "distressed". So, when a newly laid metal leafed surface is distressed, what is being done is creating the illusion of the wearing of time.

Byron & Byron is constantly looking for something new, and has also been applying the distressing in less subtle ways in order to achieve more striking looks and even very modern color textures.

### PATINA IS THE NEXT STEP

---

Time doesn't only wear down the leaf, but it gives it a patina. What is a patina? A patina is a pigmented mixture of contrasting color to the leaf or the paint, which is applied to the gilded or painted surface to highlight the narrow lines of the turning or of the carving, thus accentuating the three-dimensional effect of the finished item.

One of the most widely used patinas (now as 1000 years ago) is bitumen, which is a derivate of crude oil (yes road tarmac). First used during the height of the Byzantine Era, it was brought to the west by the Venetian traders. What the Venetian craftsmen realized was that they could silver leaf and, then by applying bitumen cleverly, could make it look very similar to a gilt surface without the expense! From that point on bitumen became the "King of Patinas" for it could turn silver into gold!!

Byron & Byron also uses bitumen, but has developed several new ways of aging the leafed or painted surfaces. With the advent of acrylic paints (which are far kinder to the leafed surface) some brilliant results have been produced, without substantially chemically changing the leaf. Emulsion wax compounds are used, as well, which are water based and to which pigments are added to get the specific shading to match the painted surface. For example, this is what is used for the scratch & antiqued French colors.

### CARING FOR GILDED SURFACES

---

Metal leafed poles and finials need specific care. Once installed, they should only be dusted. They should never be polished nor should water based or wax based compounds be used on their surfaces.

Time will age the surface and there will be some wearing, especially on the side of the pole that faces the ceiling. This will be caused by the movement of the rings. This is not a defect, but it is the way it has always been. From time to time, especially in the early stage of the pole life, there will be some shedding of small particles of gold/silver leaf. This is normal since even the gilt rings are leafed! As they move across the pole, they shed some of the inner leaf. [Of course, this problem can be completely eliminated by painting the rings instead of leafing them (which is what most competitors do!!), but this way of finishing, it will not look anything like the rest of the pole and the finials. So it is a very small evil that is worth putting up with for the sake of aesthetics.] This shedding will end in a short period of time.

---

<sup>1</sup> Finishes Include: Gilt Leaf Mecca, Silver Leaf Mecca, Florentine Grey and Florentine Black

# BYRON & BYRON PRODUCT AND FINISH MANUAL

## THE VALUE OF A HAND GILT POLE ORDER

---

On average, a Red Distressed Pole and its accessories will need to be handled about 13 times! Yes 13 times! Besides the very important leafing and distressing actions, there is a lengthy preparation of the surface, which will determine the quality of the end result, and there is a lengthy finishing routine during which some more modern finishing is applied to the gilt surface to seal it and make it stable for years to come. The majority of the work must be done by experienced craftsmen who apply their years of training onto each and every piece. **In short, the next best thing to a Byron & Byron pole is an antique pole, which, if you could find it in the color, the size, and the design you want, would cost several times more than what we charge!** Byron & Byron poles are the antiques of the future! They will withstand the passing of time.

## ANTIQUED FRENCH COLORS & DISTRESSED PAINT FINISHES (SCRATCHED) <sup>2</sup>:

This range of finishes is intended to reproduce some of the most exquisite painted finishes typical of the Versailles Period. The look has been modernized and made fresher, more elegant and easier to use within some classical Interiors as well as some more contemporary ones.

Byron & Byron has tried to capture the taste of Provence- its light and elegant simplicity, its colors and textures.

## WHAT IS THE FINISHING PROCESS?

---

The process in itself is quite simple and less complicated than the gilding process. However, certain precautions have to be implemented as the attention to detail is what makes these finishes more than just colored paint slapped onto wood. This is done by using water based lime wash paints (which is what was used in those days). The distressing is achieved by buffing and abrasion, using some natural compounds. Any gilt or silver highlights are then applied.

Once the surface has been distressed and the details applied, it is fixed using a suitable clear lacquer. Then the surface is finished with a Patina made of wax emulsion pigmented accordingly. After the patina has been applied and it has dried, it is buffed and distressed further to make sure that the surface is as three-dimensional as possible. Once this has been done, the object is again fixed, to ensure its durability.

## CARING FOR PAINTED SURFACES <sup>3</sup>

---

Painted surfaces are more durable and are far easier to maintain than gilt surfaces. The main enemy of a painted surface is dampness. As long as they are in a reasonably dry environment and no chemical cleaning agents are used, they will last for a long time.

---

<sup>2</sup> Bespoke finishes include: Antique Silver, Antique Gilt, Red Distressed Gilt, Red Distressed Silver, Sand & Silver Distressed, Ivory Scratched, Stripped Pine

Rustica finishes include: Limed Oak, Smoked Oak, Toasted Oak, Burnt Oak

Barnwood finishes include: Barnwood Grey, Barnwood White, Barnwood Green, Barnwood Cream

<sup>3</sup> Bespoke painted finishes include: Chateau Grey, Antique Cream, French Grey Antiqued, Heavily Antiqued White

Barnwood finishes include: Dove Grey, Natural Stone, Moss Green, Calico

Neon finishes include: Yellow, Turquoise, Fuschia, Red, Orange, Lime Green, Baby Pink, Raspberry, Aubergine, Matte White, Navy

Romantic finishes include: Antiqued Gold, Burnished Gold, Golden Pearl, Jet Black, Burnished Silver, Dark Pearl, New White, Cream Gold

# BYRON & BYRON PRODUCT AND FINISH MANUAL

## POLISHED FINISHES <sup>4</sup>:

Byron & Byron's polished poles are their pride and joy. These superior products would normally be available only through specialist polishers at a far greater cost. The look of French polished furniture has been reproduced by using more modern products and techniques. However, we have not moved away from the fundamentals.

### WHY ARE BYRON & BYRON'S POLISHED FINISHES SO UNIQUE?

---

Thousands of years ago, the Chinese used to dissolve in alcohol the shells of some local beetles (in time, this compound came to be called LACACOTE). They would use this "compound" to polish the surface of furniture and cutlery. The "compound" mixed with a vegetable oil would be applied to slow down the drying process and allow them to spread the polish on the surface in a very even manner. By repeating this process several times, they managed to achieve "glass like" surfaces. Sometime in the Middle Ages, this technique reached the west and furniture makers were liberated from the constriction of wax as the only viable finishing material. It was at this point that more elegant and durable furniture began to be produced.

What Byron & Byron uses is a modern high build compound to achieve the smooth surface thus eliminating the killing of Lacacote beetles. These are cellulose based compounds which are not catalysed so they display very similar characteristics to the old lacacote polishes. The top uses a special polish, tinted to resemble the lacacote lacca and this adds the sheen level that would be accurate with a proper French polished furniture (Lacacote finishing as is known today).

Although the polishes used are different from the past, the process of application has not changed much. The lacca is applied by airless spray; however, between each coat Byron & Byron buffs and polishes, just like was done in China long ago. That is why, only very few experts would notice the difference between a Byron & Byron polished piece and proper French polishing.

### STAINING IS IMPORTANT TOO

---

The staining of the wood components is just as important as the polishing of them. Water based stains are still used, so that the graining of the wood is enhanced. Water staining has a transparency that is not possible with any other modern staining method. Of course, it takes longer, and the pigments are expensive. But the end result is outstanding and makes it worth while.

While Byron & Byron calls their finishes "Mahogany" or "Cherry Wood" it does not mean that the products are made of these exotic and precious woods. For example it would be virtually impossible to buy long lengths of cherry to make poles in required quantities, or to make rings out of mahogany, for they would be very fragile and could easily snap.

To create this look, various components that make up an order are used, in the timbers most suited for the turning or the milling and then each component is stained accordingly so that, once put together, they will match or blend together in an harmonious way, resembling the woods from which they take the name. Wood is a natural product; it has its imperfections and its shades of natural colours. These details are what make natural wood what it is. No two pieces of wood are exactly the same and therefore differences in color or graining are part of the charm of the products. Thus, variations can occur from the color samples on the displays.

### CARING OF POLISHED SURFACES

---

Byron & Byron polished poles have a very stable surface. Any wax based furniture polish can be used to clean and revive the poles, except if they contain gilt or silver details. When gilt or silver details are present, the poles should be cleaned only with a soft cloth.

---

<sup>4</sup>Bespoke Polished Finishes Include: Dark Oak, Cherrywood, Mahogany  
Rustica Finishes Include: English Oak

## RESIN FINIALS, BRACKETS AND HOLDBACKS <sup>5</sup>:

---

The more decorative finials, brackets and holdbacks are cast in resin-- not just any resin, but a special type!

### WHY USE RESIN WHEN YOU COULD USE WOOD?

---

Simply, over the years fewer and fewer people are willing to undertake the long apprentice necessary to become a master wood carver. Therefore, woodcarving is a dying art and we have developed superior resin castings to simulate wood carving.

While resin, as a casting medium, has been widely available for a number of decades, the results that were yielded out of the molds were poor. The details were not very sharp, the material was very brittle and the weight difference from a wooden item was colossal (most of these problems were due to the Gypsum Filler used with the polyester). After many years of development, Byron & Byron developed a resin which is loaded with wood saw dust as its main filler. This has enabled the creation of pieces with a wood feel, good resolution of the details, slight flexibility like wood and a very wood-like weight! This is why resin is used instead of wood.

With regard to the finishes, similar methods are used as would be employed with real wood products. When re-creating the stained finishes, painting techniques are employed to allow the resin finials come as close to matching the poles as possible. Like natural woods that will have slight variations from piece to piece, so will the resins.

### CARING FOR RESIN FINIALS & ACCESSORIES

---

Resin castings are delicate. While they have many qualities of wood, they do not have its strength. We therefore recommend the following:

- Screw the double ended screw into the pole first and then, when the screw is in far enough, screw the finial onto it. Do not use a resin finial to help insert a double ended screw at the end of a pole.
- The finials are fragile (especially the neck of the finial). Care must be taken. Do not drop them.
- Avoid washing any of the resin components with highly volatile solvents as it will affect the surface of the item.

### CARING FOR HALO

---

Both Acrylic and Metal products need specific care. Once installed, they should only be dusted with a feather duster or dry cloth. They should never be polished nor should water based or wax based compounds be used on their surfaces. Washed Wood and Gloss finishes should be treated the same way. DUSTED ONLY.

The Halo pole installations with acrylic components should not be exposed to direct sun light.

---

<sup>5</sup>Resin Bespoke finials include: Siena, Sintra, Pomegranate, Fluted Ball, Artichoke, Fluted Button  
Resin Holdbacks include: Model I, Model L  
Resin Floral Finials include: Daisy, Rose, Posy, Peony
