All prices are retail.

GENERAL TERMS, CONDITIONS AND PRODUCT INFORMATION

ORDERS

Orders may be received via email, fax or internet. Incomplete information will delay order processing and shipping. Always include the item number, finish and quantity.

Trend Drapery Hardware Customer Service

Phone: 800.763.1348
Fax: 833.708.0401
Email: hardware@fabricut.com
Website: www.trend-fabrics.com/hardware

LEAD TIME

Orders typically will ship within 5-7 business days. This does not include shipping time. On occasion backorders occur due to supply chain issues. The following finishes in Trend's Painted Wood Collection are painted to order and have a production lead time of 20 business days: Dove Grey 237, Sky 242, Ocean 243 and Chocolate 240.

CUSTOM FINISHES

Custom finishes are also available with Trend's Painted Wood Collection. The production lead time is 20 business days. Finishes are matched up to 95% accuracy. A strike-off sample is available upon request for \$70. Lead time begins upon approval of strike-off. Fee is 10% of order value, with a minimum of \$100 per order.

GENERAL TERMS, CONDITIONS AND PRODUCT INFORMATION

RETURN POLICY

All our items are made to order and produced individually per order. Changes or cancellations are not permitted after 24 hours of an order being confirmed. All returns must be authorized by Trend and are authorized at our discretion, given the circumstances and nature of each order. A return authorization must be obtained for all returns. No returns or exchanges will be considered after 30 days from the invoice date. No claims will be given for more than the value of the invoice.

Full credit will be given in the event of our error. In the event of a customer error, a credit less a 40% restocking fee and freight cost will be given. There is a minimum \$25 restocking charge. We will not accept returns on poles that have been cut. Trend will not be held responsible for return shipping costs for any order returned without authorization.

PAYMENT

Payment terms are Net 30. Cash on Delivery (COD) or Proforma (CBD).

Credit cards accepted are Visa, MasterCard, Discover, and American Express.

A \$25 fee will be charged for any returned checks.

PRICES & SHIPPING

Prices are subject to change without notice. Typographical errors are subject to correction. Prices do not include shipping, handling and packaging fees which are additional charges. All items ship F.O.B High Point, North Carolina or Dallas, Texas. Orders ship UPS Ground and oversized shipments will receive UPS's standard additional charge. Expedited UPS delivery is available at an additional charge.

DAMAGED GOODS

It is recommended that you inspect your entire order upon delivery. Any claim for damaged merchandise must be made with the shipping company within 15 days of receipt. No claims after 15 days will be accepted by Trend. When making a claim, please keep all packing materials, as claims may require inspection of these materials. Photographs will be required as proof of damages.

GENERAL TERMS, CONDITIONS AND PRODUCT INFORMATION

INSTALLATION

It is strongly recommended that experienced professional installers are used for your installation. Trend will not assume any responsibility for damages incurred by improperly or inadequately supported hardware. For hardware installations, molly bolts and anchors are recommended for all installations but are not included. Support brackets are recommended every 3-4 feet (every 3 feet for acrylic poles). Brackets and holdbacks should be installed securely into wall studs when possible. An experienced professional installer will be able to determine where support is necessary.

PRODUCT INFORMATION

Our hardware items are handmade pieces. Variations from photographs, samples and prior orders may occur. It is recommended that orders for a single room be placed at the same time. Hardware will have variation in finishes resulting from batch-made production, hand finishing, as well as natural differences in wood color, tone and grain. A 100% match cannot be guaranteed from piece to piece. Wood items may vary slightly in size due to the nature of the materials and production process.

NOTES WHEN ORDERING HARDWARE

FINISHES

There are not specific repeats or “patterns” to any hardware finish. Coverage will vary from piece to piece, order to order. There may be heavier or lighter coverage on each piece and through a single piece. This is the “nature” of the technique and finish.

Sample Chip Finishes

Trend sample chips are a representation of the finish. Due to the nature of the materials and the staining technique, acceptable variation will occur from sample chip to sample chip. These same acceptable variations can occur from sample chip to actual finished product.

GENERAL TERMS, CONDITIONS AND PRODUCT INFORMATION

POLES

Cutting:

No returns or cancellations are accepted on any poles that have been cut.

Splicing/Joining:

Additional brackets will be required any time a splice or connector is ordered to support the expanse and the splicing joint.

Easy Glide Tape:

Easy Glide Tape is available upon request with any wood pole order at no charge. Easy Glide Tape provides a slick surface for drapery rings to easily glide over a drapery pole.

PACKAGING FEE

A Packaging fee of \$10 (NET) will apply to any Trend hardware order that has a pole.

Glossary

Allen Key – Used to tighten set screw.

Adjustable Bracket – A bracket that is designed to adjust to varying projections from the wall.

Ball Bearing Carrier – A small runner that fits inside the traverse pole that works like a wheel mechanism to create an easy glide for light or heavy weight window treatments.

Baton – Also called a wand, a baton permits easy movement of the drapes across the pole when opening and closing. A small clip attaches the wand to the first ring.

Bracket – Used to mount pole to wall, available in many varieties. The number of brackets needed is determined by the length of the pole and the weight of the drape.

B – Bracket Set – Adjustable 2 piece unit, easy to mount with a cup to hold pole. 2 sets can be joined to create a double bracket.

Buckram - Stiff material used to make a drapery heading. The heading is commonly 4" in height. Also called crinoline.

Carriers – Small runners installed in a traverse pole which hold a drapery pin or hook. Also called slides or runners.

Casing - Wooden frame around a window or door.

Ceiling Bracket – A bracket that is designed to mount to ceiling; perfect for rooms with wall to wall windows.

Center Draw – When one pair of draperies opens and closes exactly at the windows center point. Also called a Split Draw.

Center Support – A simple bracket designed to support poles over 6ft without adding an additional design element.

Clearance – The distance from wall to the back of the pole.

Corner Elbow – Adjustable corner elbow allows poles to connect at angles from 90 – 270 degrees; easiest solution for a corner window or bay window.

Connector – Used to attach two poles together.

Crinoline – Stiff material similar to buckram used in drapery headings.

Double Bracket – Bracket for two parallel poles, allows for a layered treatment.

Draw Draperies – Panels of fabric featuring pleated headings.

Ease – Allowance or give between the pleats added to the finished drapery width to allow panels to traverse easily. General rule is 1/2" per panel on a Two-Way or Center Draw. Also referred to as Give.

Drop – Ring measurement from inside top of ring to bottom of the eyelet, used to help determine length of drapes.

End Cap – In place of a finial, an end cap attaches to the end of a pole. Commonly used when the window is near a corner or for a simpler look.

End Plug – Permits finial to be screwed into a hollow steel pole, typically plastic.

End Stop – Small screw attached inside the traverse track used to keep the drapes from pulling too far.

Extended Bracket – Allows for larger projection from wall extending beyond the typical 3-4" standard projection; differs from adjustable bracket in that the projection is set.

Finial – Decorative designs for end of the pole.

Fluted Pole - Pole with concave indents to create visual interest.

Fullness - The ratio of the total fabric used, less allowances for the side hems and seams, to the finished width of the drapery. Fuller drapes have smaller distance between pleats.

Hand Draw -Term indicating that draperies are manually pulled open and close with one hand or with a baton. Also called baton draw.

Heading - The hemmed and usually stiffened portion across the top of the drapery.

Holdback – Designed to pull the drape back from the window either using a complementary tieback or on its own; in addition holdbacks are often used to create innovative swags or dress an arched window. Also called Tieback.

Inside Mount – Used at the end of the pole in situations that require the pole to be mounted inside window frame or against a wall.

Kit – A group of items sold together for ease of ordering.

Master Carrier - The lead carriers in the center of the drapery when the drapery is closed on a center (split) draw or the end carrier on a one-way draw. It has an arm to allow for drapes to overlap at center; often have a right and left.

Loop Bracket - Bracket encircles pole for a clean modern look.

One-Way Draw - Drapery designed to draw or pull only one direction and only in one panel.

Overlap - The inside edge of a pair of drapery panels which attaches to the master carrier and overlaps in the center when the draperies are drawn; usually 3 1/2" on each side.

Passing Bracket – Specific bracket that will allow drapery treatment to pass the bracket; great for wall of windows or drapery treatments that sweep to one side. This bracket must be used in conjunction with passing ring.

Passing Ring – Specific ring used to allow drapery treatment to pull past the bracket; also known as a C- Ring.

Pin Setting - The distance between the top of the pleat and the top of the pin. The recommended pin setting for our decorative poles is 1/2". The recommended pin setting for our plain metal tracks is 1 1/2".

Pole – Cornerstone of the drape; we offer in 4ft, 6ft and 8ft or we will cut to exact length for an additional fee. Also, for windows that require more than 8ft we offer connectors that can be hidden behind a bracket or center support. Also called a rod.

Projection - Distance from wall to the center of the pole, where drapes would naturally hang.

Reeded Pole – Pole with convex ridges to create visual interest.

Return - The distance from the face of the pole to the wall or casing where the bracket is attached; also the amount of drapery that covers or hides the space between the pole and the wall.

Ring – Attaches drapery to the pole; drapery is sewn or hooked to the eyelet at the base of ring then, the ring slides onto the pole. Ring must be at least 1/2" larger than pole diameter.

Ripplefold - A soft rounded pleat that has equal proportions from inside or outside the window. Comes in varying fullness; we carry 80%, 100% and 120% fullness.

Rosette – Decorative means to lock the bracket into the pole.

Runner – Small plastic sliders used to slide drapery in a traversing pole. Also called carriers or slides.

Sash Rod – Small poles and accessories most commonly used for window treatments on doors.

Set Screw – Often found on finials or brackets to secure item to the pole, use Allen Key.

Slides - Small runners installed in a traverse pole, which hold a drapery pin or hook. Also called carriers or runners.

Snap Tape - Used to create the ripple fold pleats, it is a stiff tape with snaps. Works with 80%, 100% and 120% fullness Ripplefold snap carriers.

Splice – Used to attach 2 poles together. Also called a connector.

Stackback - The space required for draperies to clear the window when the drapes are completely opened.

Standard Bracket – Projection from wall is 3-4”.

Traverse – A pole with easy glide runners to enable drapes to open and close easily.

Traverse Track – Metal track with inset area for carriers. Usually attached inside the traversing pole but also sold separately for the Wood Classics and Global Elements collections, to go behind for a double traversing drape.

Two-Way Draw - Drapery designed to draw or pull in both directions the center of the drape at once in two panels.

Wand – Permits easy movement of drapes across the pole when opening and closing; a small clip attaches the wand to the first ring. Also called a baton.
