

# movepro360®

stay ahead of your mobility program  
through a single source of truth

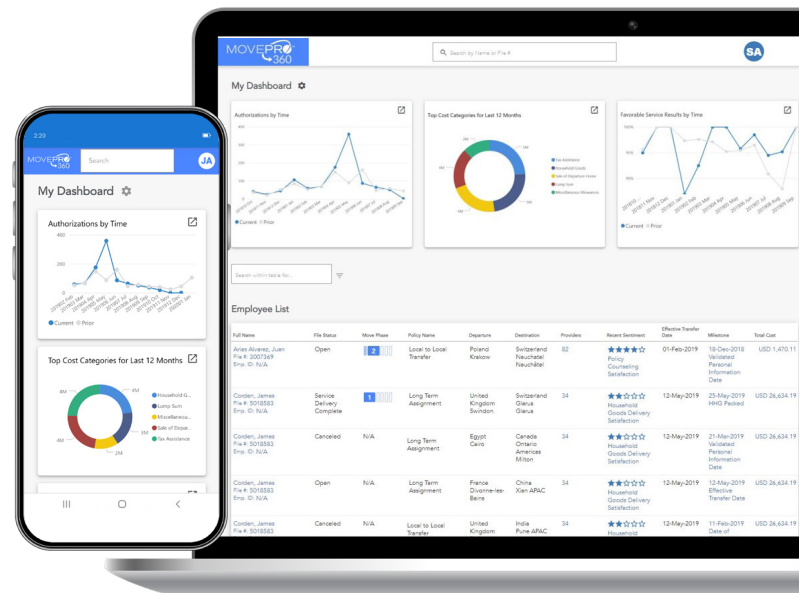

Cartus' centralized mobility hub offers seamless user experience, broader supplier integrations, advanced analytics, and actionable reporting and thought leadership. We have built MovePro360® from the ground up to provide the industry's first truly holistic client experience.

- Solution-focused design thinking
- Cloud- and API-based framework
- Comprehensive program snapshot
- Predictive business logic
- Real-time, multichannel access
- User-driven innovation and iteration

## single source of truth to power the next generation of relocation

MovePro360 offers clients a comprehensive view of their entire relocation program while integrating data from key suppliers—a true single source of truth. By providing multichannel access to live move status, the platform empowers HR and mobility managers to intervene in real time to positively affect the outcome for individual employees.

Along with Benefits Builder, our industry- exclusive core/flex solution integrated within MovePro360, it forms the pillars of our dynamic suite of digital tools to help you and your employees navigate the entire relocation journey with ease and confidence.

"Cartus' technology is forefront for us. It is really something that we have focused on for a couple of reasons. We want to make sure that we are capturing the data correctly, and in real-time to help us. Secondly, we must tell a story with our data. It's important for me to have the right data points so that I can put that data together in a story that my leaders can resonate with."

—Multinational Insurance Company

## features and benefits

Developed alongside clients themselves, some of the top features we have launched within MovePro360<sup>®</sup> since its release include:

- Benefits Builder: core/flex solution supporting employee-choice mobility programs with a points-based system
- Customizable client program dashboards providing a complete view of employee move status with cost detail
- Dynamic employee move risk indicator with predictive algorithm
- Real-time sentiment tracking and notifications
- Secured access through single sign-on capabilities
- Modern authorization tool utilizing APIs and type ahead prompts
- Enhanced connectivity via supplier API integration
- Multi-language integrations

"MovePro360 and other technology advancements will improve the user experience for our employees."

—Alexandra von Springer | US Policy Advisor, Shell

## 2023 and beyond

Based on ongoing user feedback, we continue to enhance and launch new functionality to address key priorities and evolving client needs. Our product roadmap for 2023 and beyond includes:

- Authorization enhancements—including client HCM system API connectivity
- Supplier API integrations—temporary living and destination services
- New document management system—sharing, routing, and storing
- Assignment expatriate compensation services—including quick turn-around, real-time cost projections for scenario planning, budgeting, approvals, and forecasting
- Multi-language integrations to include more languages
