

Solution Brief

Streamline Media Workflows with Dalet and the VAST Data Platform

Media and broadcast organizations, such as sports and news networks, navigate a complex digital landscape. They grapple with a high volume of content, tight deadlines, and distributed media workflows. The velocity at which new media assets are generated, coupled with diverse file formats and the need for seamless multi-platform distribution, creates significant operational challenges. To address these challenges, media and broadcast organizations require a robust media asset management solution that can handle content capture and management, as well as provide secure, highperformance storage and preservation of digital media assets, protecting them from threats like ransomware.

Recognizing these critical requirements, Dalet has partnered with VAST Data to deliver a certified, high performance and cost-effective solution. Dalet has validated the VAST Data Platform for use with its innovative suite of media asset management solutions: Dalet Galaxy, Dalet Pyramid, and Dalet Flex.

The combined offering of Dalet's media asset management solutions and the resilient, all-flash storage capabilities of the VAST Data Platform empowers customers to streamline their media workflows and extract more value from their media assets. This integrated solution provides multi-protocol file and object support, enabling non-stop access to valuable assets as organizations scale and upgrade their Dalet solutions.

For the first time Dalet has approved storage deduplication for use with its solutions. VAST's revolutionary Similarity Data Reduction technology enables customers to unify their multi-modal data management environment and avoid excess infrastructure costs. When coupled with Dalet's Smart Render Technology, the collaboration enhances performance, efficiency, and offers a lower total cost of ownership for media and broadcast organizations.

Why Dalet + VAST?

VAST Data Platform is certified for:
Dalet Galaxy, Dalet Pyramid,
Dalet Flex

**Resilient SMB and S3 for high
performance media workflows**

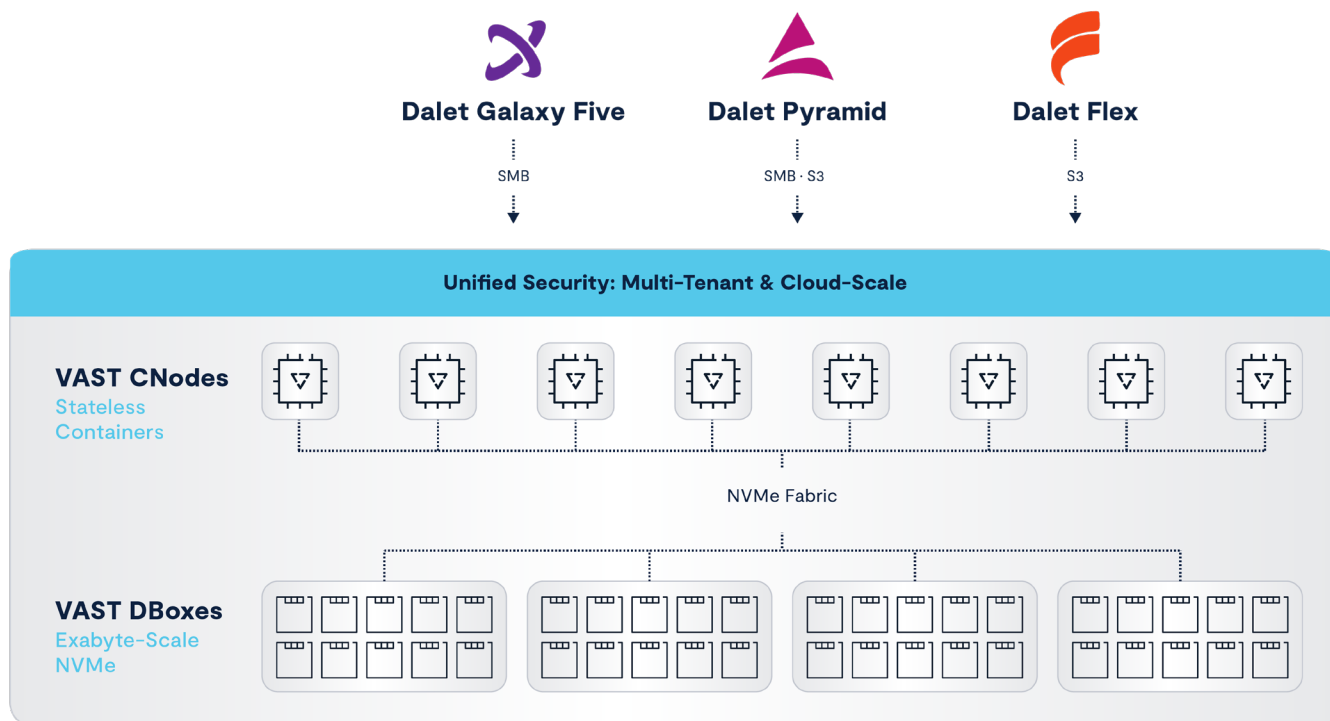

**Future-proofed data access with
unified multi-protocol support**

**Reduce TCO with VAST's
Similarity Data Reduction**

**Support globally distributed teams
with non-stop operations and always
online expansions and upgrades**

Trusted by Industry Leaders

VAST is trusted by leading companies around the world to leverage a single radically affordable all-flash innovative platform.

About Dalet

Dalet is a media solutions and service provider that places technological innovation and human collaboration at the heart of everything we do, creating powerful tools and products that help you tell better stories. With over three decades of innovation, our software solutions enable greater control, enhanced visibility and increased productivity for content professionals and storytellers around the globe.

About VAST Data

VAST Data is the data platform software company leading business into the AI era. Accelerating time-to-insight for workload-intensive applications, the VAST data platform delivers scalable performance, radically simple data management and enhanced productivity. Launched in 2019, VAST is the fastest-growing data infrastructure startup in history.
