Magenta Security On Net

The future of mobile customer security

The **network based SASE** solution, which will make it easier than ever for businesses and government organizations to strengthen and manage their cyber defense.

Secure your Success.
IT and security teams are overwhelmed with a growing number of threats, so it's more critical than ever for businesses and organizations to embrace the latest SASE innovations.

Who it's for?
Businesses and organizations looking to improve protection of their networks and applications against cyberthreats.

Key facts

- **Seamless Protection:** Fulfill the increasing demand for seamless security while working in different locations
- **Managed Protection:** From basic to comprehensive protection, leverage our SASE solution and real-time content inspection
- **Integrated Security:** Seamlessly integrated cyber defense in your digital business
- **Secured Connectivity:** Secure IoT without any device dependencies and safeguarding your operational technology systems
