T Phone

5G for every pocket

The expansion of 5G connectivity is having a transformational impact on many aspects of modern life. 5G delivers more than just superfast speeds; the coverage and bandwidth it provides take us a step closer to a truly digital future, allowing instant connectivity with continual access to everything from education to entertainment and connected cities. At a time when the high price of 5G smartphones is a barrier for many to access fast, connected technology, the launch of T Phone and T Phone Pro is an important step in narrowing the digital divide, as they combine large screens, high-resolution cameras, and premium design with an affordable price for many.

Key facts

- The 5G smartphones are designed to make 5G accessible on a broad scale
- T Phone has been developed in partnership with leading software manufacturer Google
- Builds upon the expertise of T-Mobile US's successful own brand "REVV'L" line
- 6.82" and 6.52" HD+ displays, with large batteries to stay connected on the go
- The MediaTek Dimensity 700 processor delivers a smooth experience and high performance
- High-resolution cameras and premium design, including a Magenta fingerprint sensor

The 5G-enabled T Phone & T Phone Pro offer a wide range of high-quality features at a handset-only price starting from €219 and €269 respectively, although prices may vary across countries. Attractive tariff bundles starting at €1 per month will also be available.

Customers in eight European markets (Croatia, Montenegro, North Macedonia, Austria, Poland, Slovakia, the Czech Republic, and Hungary) have been benefiting from Telekom's new rollout since October last year. Consumers in Germany have been able to use the full potential of the 5G network with T Phone and T Phone Pro since January 24.

Building upon the expertise and economies of scale created by T-Mobile US's successful own brand "REVVL" line of smartphones, the T Phone and T Phone Pro have been developed in partnership with leading software manufacturer Google. The T Phone and T Phone Pro tap into Deutsche Telekom's wide 5G network to offer the fastest and most reliable network speeds in their market segment.

The models feature 6.82" and 6.52" HD+ displays respectively, with large batteries for staying connected on the go, a 15 W fast charging option, high-resolution cameras and premium design, including a Magenta fingerprint sensor. The phones have been designed to provide a seamless experience across software and hardware, unlocking the full potential of Deutsche Telekom's 5G network without compromising on quality, experience, or security.
