3.2 **Justification for Minimum Price**

The Dairy Code requires us to include in our standard published MSA justification for our Minimum Price. The factors that we have considered when setting our Minimum Price are:

- (a) the composition of milk that we require in terms of milk fat and protein components and also the volume of milk that we require;
- (b) our cost of production;
- (c) the anticipated milk production forecast for the region;
- (d) the product mix and markets that the region supplies;
- (e) competition for milk across the region;
- (f) international dairy markets, i.e. the price of milk in international regions plus freight to Australia;
- (g) any volume or productivity adjustments reflecting the efficiency of collecting from large farms as opposed to the cost of collecting from a larger number of smaller farms;
- (h) seasonal adjustments to take into account the variation in supply and cost of milk production; and
- (i) farm input costs.

The value and weight that we attribute to these factors to determine our Minimum Price may vary from year to year and from region to region based on market influences.

After receiving that notice, the respondent will implement the proposed actions within the proposed time frame (subject to any extension agreed to in writing by the complainant) and the Complaint will then be resolved.
 - (ii) If it does not accept the actions proposed by the respondent in order to resolve the Complaint, notify the respondent of this within 7 days of the complainant receiving the Response. The notice must include the reasons the complainant has not accepted the actions proposed by the respondent. The respondent will then provide written notice to the complainant within 5 days of receipt of the complainant's notice of its further response (**Further Response**), including any changes to its findings or (if applicable) the actions the respondent proposes to take in order to resolve the Complaint and the timeframe for implementing those actions.
- (e) If the complainant does not provide a written response to the Response within 7 days of receiving a Response that identifies actions the Respondent proposes to take to resolve the Complaint, then the complainant will be taken to accept the proposal. - (a) Any provision in this MSA which binds more than one person binds all of those persons jointly and each of them severally.
- (b) Each obligation imposed on a party by this MSA in favour of another is a separate obligation.

21.2 Entire terms and conditions

- (a) This MSA contains the entire agreement between the parties for your supply of Milk to us. Any other prior understandings, representations, warranties or undertakings of any kind made by or on behalf of either party in relation to the subject matter of this MSA are of no effect.
- (b) Following execution of this MSA by both parties, any MSA entered into previously will terminate.

21.3 No waiver

A party's failure to or delay in exercising a right under this MSA does not operate as a waiver of that right. A waiver is not effective unless it is in writing.

21.4 Severability

If any provision of this MSA is unenforceable, illegal or void or makes the MSA (or part of it) illegal or void, then the provision is severed and the rest of this MSA remains in force.

21.5 No assignment

- (a) You cannot assign or otherwise transfer the benefit of this MSA, or ownership of the Farm without our prior written approval (which cannot be unreasonably withheld).

We may unilaterally vary this MSA where there is a change in a Commonwealth, State or Territory law:

- (i) to the extent necessary to comply with the changed law;
- (ii) without reducing the Minimum Price; and
- (iii) where, following the variation, the MSA continues to comply with the Dairy Code.

- (i) the variation;
- (ii) the reasons for the variation; and
- (iii) the day the variation takes effect.

If you, acting reasonably, determine that the variation is detrimental to you, you may terminate this MSA by providing notice in writing to us within 21 days of us notifying you of the variation. If you issue such a termination notice, this MSA will terminate 1 month after the date that you issue the notice.

(c) Variation which increases Minimum Price

An increase in the Minimum Price payable to you constitutes a variation to this MSA and the Dairy Code requires that you agree to the payment of the increase. We will notify you of the increase in the Minimum Price and at the same time advise you how you can agree to that price increase and, if you do not agree in the manner and in the time set out in our notice, then you shall be deemed to have accepted that increase in the Minimum Price.

If your Milk does not meet the Quality Requirements, we may still accept your Milk, however, the payment that we make to you will be less than the Minimum Price. We will make payments based on a percentage adjustment to the Minimum Price as set out in the table below. Any adjustment will not exceed 50% of the Minimum Price per collection, except for when your Milk is the source of:

Annexure 2 – Operational Requirements

1. Sampling

Milk samples for composition and cell count testing are taken automatically at every collection by either an inline drip sampler which is fitted to the tanker or a dip method directly from the vat. These sampling methods are designed to ensure a representative sample of the Milk is taken from the collection.

Before pumping into the tanker, the driver will agitate the vat to ensure an adequate distribution of components throughout the Milk.

2. Volume Measurement

To ensure volume accuracy, the volume of each collection will be measured for payment purposes by a calibrated flow meter fitted to the milk collection tanker.

3. Testing

3.1 Procedure

- (a) Prior to collection, the driver assesses the time and temperature cooling profile and completes a sensory evaluation (odour and visual appearance) of the Milk for potential contamination, food safety risk, and milk quality deterioration. From time to time we may require more specific testing to be completed.
- (b) When the Milk is delivered, it is tested by the receiving site for contaminants and milk quality. If it does not meet the Quality Requirements, individual farm samples are tested to detect the source of the contamination or defective Milk.
- (c) If you ask us to organise additional testing, subject to your prior confirmation, we will pass through the third party costs associated with conducting such testing. If you send samples for testing without prior approval from us, we may pass through third party costs associated with conducting such testing.

3.2 Frequency

Your Milk will be tested for compliance with the Quality Requirements in accordance with the following testing schedule. We may conduct additional testing as required, above and beyond the type and frequency listed below.

	TEST FREQUENCY
SENSORY ASSESSMENT	Every collection of milk, prior to loading by the tanker driver
TEMPERATURE	Every collection of milk
ANTIBIOTICS	When antibiotics are detected on a tanker of milk ex-farm, each Supplier on that tanker will have their vat sample tested
FAT & PROTEIN	Every collection of milk
BULK MILK CELL COUNT (BMCC) / SOMATIC CELL COUNT (SCC)	Every collection of milk

BACTOSCAN (Bacto)	Milk is tested for Bacto at a minimum of 3 times per month. Any Supplier whose milk returns a result of > 80,000 IBC/mL will be subject to follow-up testing on the next samples collected from the farm, until 3 consecutive results ≤ 80,000 IBC/mL are received. Additional testing may be conducted to determine the source of a tanker with a high Bacto count.
THERMODURIC (Thermo)	Once per month, at a minimum. Results of > 2,000 cfu/mL will be subject to follow-up testing on the next samples collected from the farm, until 3 consecutive results ≤ 2,000 cfu/mL are received.
EXTRANEIOUS WATER / FREEZING POINT	Discretionary
ACIDITY	Discretionary
PH	Discretionary
SEDIMENT / EXTRANEIOUS MATTER	Discretionary
PESTICIDES / OTHER CHEMICAL CONTAMINANTS	Discretionary The dairy industry also conducts contaminant testing as part of the AMRA Survey
AFLATOXIN	Discretionary The dairy industry also conducts aflatoxin testing as part of the AMRA Survey

3.3 Results

- (a) We will notify you as soon as practicable after we receive the results. You will usually receive an SMS within an hour of us receiving your tests results. You can also access your results via the Lactalis Milk Supply Website (milksupply.lactalis.com.au) or your milk tanker dockets.
- (b) We also issue both daily and monthly Q&Q Statements. These Statements provide information including volume of consignments, temperature at pick-up, milkfat and protein test (mass/volume) results, and bacteriological results (BMCC, Bacto and Thermo). A summary of month-to-date volumes and results, or a final monthly summary, is also provided. Daily Q&Q Statements are e-mailed each afternoon, containing all results currently available for that month to date. Preliminary monthly Q&Q Statements are sent on or about the second day of the following month and final Q&Q Statements are sent on or about the fifth day of the following month.

4. Reimbursements

4.1 Servicing your Milking Machine and Vat

You may request reimbursement of the cost of one milking machine service and one vat service each year of the Supply Period, to a maximum value of \$3000 per service per Farm. We will only reimburse you the costs associated with labour and travel for each service (excluding GST only). Parts and labour for repairs and upgrades are not eligible for reimbursement.

4.2 **Replacing your Vat**

We will provide a monthly reimbursement of 0.556% of the cost of purchasing and installing a new or second-hand milk vat (including associated cooling equipment), for each month that you contract with us up to a maximum of three years (totalling 20% over three years), subject to meeting the following requirements:

- (a) the vat must have a 75 mm outlet, or an equivalent adaptor;
- (b) vat capacity must be increased to at least 1.4 times peak daily production and be achieved with no more than two vats being installed and in use on the farm; and
- (c) the vat must be positioned so that the outlet is no more than six metres from the tanker connection and no more than three metres from the tanker access doorway.

Payment will start from the month the claim is submitted and will not be backdated.

4.3 **Herd testing and Recording**

We will reimburse you \$5.00 per cow each year of the Supply Period that you complete herd testing and recording subject to:

- (a) using a recognised herd recording centre to carry out the testing; and
- (b) providing an annual statement showing the number of cows tested and the total testing costs.

5. **Auditing Costs**

We will cover the cost of 1 external audit every 2 years per farm by an auditor approved by us.

You will be responsible for all additional fees associated with:

- (a) additional audits;
- (b) return visits to the farm by the auditor to close out non-conformances; and
- (c) non-conformances being closed out by the auditor off-farm.

The costs associated with these activities are as follows:

- (a) audit cost:
 - (i) New South Wales - \$720;
- (b) on-farm non-conformance clearance cost \$250 per audit; and
- (c) off-farm non-conformance clearance cost \$100 per audit.

If you decide to cancel an audit, you will incur cancellation fees as follows:

- (a) audits cancelled within one week of the notified audit date will incur a charge equal to 25% of the audit cost; and
- (b) audits cancelled within one day of the notified audit date, or a no-show on the day of the audit, will incur a charge equal to 50% of the audit cost.

6. **Additional Freight Charges**

Upon your request, we may agree to an additional collection of your Milk. In these circumstances, you may be charged \$60 in additional freight charges.

We will not charge you any additional freight charges where:

- (a) your Farm is supplying us more than 25,000 litres per day; or
- (b) where a carrier collects milk on a daily basis to address a tanker capacity issue rather than due to insufficient vat capacity on a farm.

7. **Corporate Social Responsibility (CSR)**

7.1 **Animal Welfare**

You must comply with the Lactalis' Animal Welfare Policy (<http://lactalis.com.au/wp-content/uploads/lactalis/Lactalis-Group-Animal-Welfare-Policy.pdf>) as well as any relevant industry policies relating to animal welfare. If there is any inconsistency between Lactalis' Animal Welfare policy and industry policies, then the Lactalis' Animal Welfare policy prevails to the extent of any inconsistency.

We are particularly focused on compliance with following areas of the Lactalis Animal Welfare Policy:

- (a) no dehorning of dairy animals older than the age of 2 months; and
- (b) all calves must be raised in groups by no later than 8 weeks of age.

We also require compliance with policy directives from the Australian Dairy Farmers' Animal Health and Welfare Policy Advisory Group, including:

- (a) no routine calving induction;
- (b) provision of pain relief for all calves during disbudding, which must occur under the age of 2 months;
- (c) no euthanasia of calves by blunt force trauma; and
- (d) no tail docking, except under intervention and supervised veterinary procedures.

You must ensure that you are meeting the Australian Animal Welfare Standards and Guidelines for cattle and for land transport of cattle.

7.2 **Assessments**

Once every 3 years, you are required to participate in an on farm assessment of:

- (a) the Animal Welfare requirements set out in clause 7.1; and
- (b) an estimation of your carbon footprint.

7.3 **Non Compliance**

If it is found that you are not complying with the Lactalis Animal Welfare Policy we will notify you in writing of this non-compliance. We will agree with you a written action plan within a required timeframe for you to rectify areas of non-compliance. Any non-compliance may result in increased frequency of assessment or verification of rectification of the non-compliance. If the non-compliance is not rectified in the required timeframe, then we reserve our rights under this MSA.
