

## Tekstur Tech Bulletin : RE best practice - which thicknesses to specify & use given the application & color selection

All Tekstur panels are 48 x 120" - textured panels are made from two different substrates - the millwork is about .5mm deep

Richlite panels are available in these thicknesses : 1/8", 5/16" and 1/2" - [up to 3" thick for industrial purposes]  
- colors include Ebony, Dark Chocolate, Autumn, Caramel, Navy & Burgundy

ABET panels are available in these thicknesses: 8mm, 12mm [up to 19mm for specialty purposes]  
- colors available include Soft White, Warm Gray, Pewter, Greige and Cappuccino

All Tekstur panels have a balancing grid milled on the back face - with the exception of 1/8" intended for layup with epoxy
