

Edinburgh Airport Pension Plan ('the Scheme') – Implementation Statement 1 April 2024 – 31 March 2025

This Implementation Statement ('Statement') has been prepared in accordance with applicable legislation, taking into account guidance from The Department for Work and Pensions, the period from 1 April 2024 – 31 March 2025 ('the Scheme Year').

The Scheme's reporting period for each fund is the holding period of that fund across the Scheme Year.

The Statement sets out how, and the extent to which, the Trustees' policy in relation to exercising voting rights has been followed during the year by describing the voting behaviour on behalf of the Trustees of the Scheme.

The Trustees have appointed Minerva Analytics ('Minerva') to obtain voting and investment engagement information ('VEI') on the Scheme's behalf.

This Statement includes Minerva's report on key findings on behalf of the Trustees over the Scheme Year.

A summary of the key points is set out below.

BlackRock

BlackRock stated that there was no voting information to report due to the nature of the underlying holdings.

BlackRock provided basic fund-level information on engagements that was in line with the Scheme's reporting period. Minerva was able to confirm that despite the basic level of information provided, the activity appeared to broadly comply with BlackRock's own engagement approach and so complies with the Scheme's approach.

Columbia Threadneedle ('CT')

For Threadneedle Pensions Property Fund, CT stated that there was no voting or engagement information to report due to the nature of the underlying holdings.

CT informed Minerva that engagement information would not be available due to differences in engagement relating to public listed entities/issuers and engagement within property funds where the holdings are direct in real estate. For this reason, Minerva were unable to assess if the manager's engagement policies were in line with the Trustees' own policies over the Scheme year.

Gresham House ('Gresham')

Gresham stated that there was no voting information to report due to the nature of the underlying holdings.

Gresham provided basic fund-level information on engagements that was in line with the Scheme's reporting period. Despite the basic level of information provided, Minerva was able to confirm that the activity appeared to broadly comply with Gresham's own engagement approach and so complies with the Scheme's approach.

LGIM

For All Stocks Gilt Index Fund, All Stocks Index-Linked Gilts Index Fund, LDI Matching Core Funds, Over 15 Year Index-Linked Gilts Index Fund and Over 15 Year Gilts Index Fund, LGIM stated that there was no voting or engagement information to report due to the nature of the underlying holdings.

In relation to the Dynamic Diversified Fund, it was determined by Minerva that LGIM public voting policy and disclosures are broadly in line with good practice as represented by the International Corporate Governance Network ('ICGN') Voting Guidelines Principles, bearing in mind the Scheme's stewardship expectations.

LGIM provided a summarised voting record that was in line with the Scheme's reporting period. Significant votes were also provided. From this, Minerva was able to confirm that the manager's voting activity was in line with the Trustees' policy.

LGIM provided basic fund-level information on engagements that was in line with the Scheme's reporting period. Despite the basic level of information, Minerva was able to confirm that the activity appeared to broadly comply with LGIM's own engagement approach, and so complies with the Scheme's approach.

M&G

M&G stated that there was no voting information to report due to the nature of the underlying holdings.

M&G provided detailed fund-level information on engagements that was in line with the Scheme's reporting period. From this, Minerva was able to confirm that the activity appeared to broadly comply with M&G's own engagement approach, and so complies with the Scheme's approach.

Vontobel

Vontobel stated that there was no voting information to report due to the nature of the underlying holdings.

Vontobel provided detailed fund-level information on engagements that was in line with the Scheme's reporting period. From the detailed information provided, Minerva was able to confirm that the activity appeared to broadly comply with Vontobel's own engagement approach, and so complies with the Scheme's approach.

Final Comments

Since last year, M&G and Vontobel have continued to provide good levels of information.

CT have not provided firm-level information this year compared to last year where they provided engagement information over the calendar year. As mentioned above this is due to differences in engagement relating to public listed entities/issuers and engagement within property funds where the holdings are direct in real estate.

LGIM have continued to provide good levels of voting information but could also improve on the detail provided in the engagement information.

Further improvement is needed from Grasham and BlackRock to provide more detail on engagements.

1 SIP Disclosures

This section sets out the policies in the Statement of Investment Principles ('SIP') in force at the Plan year-end relating to the following:

1. Financially Material Considerations
2. Non-Financial Considerations
3. Investment Manager Arrangements

Stewardship - including the exercise of voting rights and engagement activities - is set out in the 'Voting and Engagement' section.

Statement of Investment Principles
September 2024*

1.1 Financially Material Considerations

The Trustees have considered financially material factors such as environmental, social and governance ("ESG") issues as part of the investment process to determine a strategic asset allocation over the length of time during which the benefits are provided by the Scheme for members.

In endeavouring to invest in the best financial interests of the beneficiaries, the Trustees have elected to invest the majority of Scheme assets through pooled funds. The Trustees acknowledge that they cannot directly influence the environmental, social and governance policies and practices of the companies in which the pooled funds invest. However, the Trustees do expect their investment managers and investment consultant to take account of financially material considerations when carrying out their respective roles.

The Trustees accept that the Scheme's assets are subject to the investment managers' own policy on socially responsible investment. The Trustees will assess that this corresponds with their responsibilities to the beneficiaries of the Scheme with the help of their investment consultant.

An assessment of the ESG and responsible investment policies forms part of the manager selection process when appointing new managers and these policies are also reviewed regularly for existing managers with the help of the investment consultant. The Trustees will only invest with investment managers that are signatories for the United Nations Principles of Responsible Investment ('UN PRI') or other similarly recognised standards.

The Trustees will monitor financially material considerations through the following means:

- Obtain training where necessary on ESG considerations in order to understand fully how ESG factors including climate change could impact the Scheme and their investments;
- Use ESG ratings information provided by their investment consultant, to assess how the Scheme's investment managers take account of ESG issues; and
- Request that all of the Scheme's investment managers provide information about their ESG policies, and details of how they integrate ESG into their investment processes, via their investment consultant.

If the Trustees determine that financially material considerations have not been factored into the investment managers' processes, they will take this into account on whether to select or retain a particular investment.

1.2 Non-Financial Considerations

The Trustees have not considered non-financial material matters in the selection, retention and realisation of investments.

1.3 Investment Manager Arrangements

Incentives to align investment managers' investment strategies and decisions with the Trustees' policies

The Scheme invests in pooled funds and so the Trustees acknowledge the funds' investment strategies and decisions cannot be tailored to the Trustees' policies. However, the Trustees set their investment strategy and then select managers that best suits their strategy taking into account the fees being charged, which acts as the investment manager's incentive.

The Trustees use the fund objective/benchmark as a guide on whether their investment strategy is being followed and monitors this regularly.

Incentives for the investment managers to make decisions based on assessments about medium to long-term financial and non-financial performance of an issuer of debt or equity and to engage with issuers of debt or equity in order to improve their performance in the medium to long-term

The Trustees select managers based on a variety of factors including investment philosophy and process, which they believe should include assessing the long term financial and non-financial performance of the underlying company that they invest in.

The Trustees also consider the managers' voting and ESG policies and how they engage with the investee companies as they believe that these factors can improve the medium to long-term performance of the investee companies.

The Trustees will monitor the managers' engagement and voting activities on an annual basis as they believe this can improve long term performance.

The Trustees expect their managers to make every effort to engage with investee companies but acknowledge that their influence may be more limited in some asset classes, such as bonds, as they do not have voting rights.

The Trustees acknowledge that in the short term, these policies may not improve the returns they achieve, but do expect that investing in those companies with better financial and non-financial performance over the long term will lead to better returns for the Scheme. The Trustees believe that the annual fee paid to the investment managers incentivises them to do this.

If the Trustees feel that the investment managers are not assessing financial and non-financial performance or adequately engaging with the companies they are investing in, they will use these factors in deciding whether to retain or terminate a manager.

How the method (and time horizon) of the evaluation of the investment managers' performance and the remuneration for asset management services are in line with the Trustees' policies

The Trustees review the performance of each fund quarterly on a net of fees basis compared to its objective.

The Trustees assess the performance of the funds, where possible, over at least a 3-5 year period when looking to select or terminate a manager, unless there are reasons other than performance that need to be considered.

The investment managers' remuneration is considered as part of the manager selection process and is also monitored regularly with the help of their investment consultant to ensure it is in line with the Trustees' policies.

How the Trustees monitors portfolio turnover costs incurred by the investment managers, and how they define and monitor targeted portfolio turnover or turnover range

The Trustees monitor the portfolio turnover costs on an annual basis.

The Trustees define target portfolio turnover as the average turnover of the portfolio expected in the type of strategy the manager has been appointed to manage. This is monitored on an annual basis.

The Trustees have delegated the responsibility of monitoring portfolio turnover costs and target portfolio turnover to their investment consultant, and this is reported to the Trustees so they too can monitor this.

The duration of the arrangement with the investment managers

The Trustees plan to hold each of their investments for the long term but will keep this under review.

Changes in investment strategy or changes in the view of the investment managers can lead to the duration of the arrangement being shorter than expected.

2 Sourcing of Voting and Engagement Information

This section sets out the availability of the information Minerva initially requested from the Scheme's managers, to facilitate the preparation of this report:

- Vontobel TwentyFour Strategic Income Fund

3 Voting and Engagement

The Trustees are required to disclose the voting and engagement activity over the Scheme year. The Trustees have used Minerva Analytics ('Minerva') to obtain voting and investment engagement information (VEI) on the Scheme's behalf.

This statement provides a summary of the key information and summarizes Minerva's findings on behalf of the Scheme over the Scheme's reporting year.

The voting and engagement activity undertaken by the Scheme's managers, as reported by them and set out in this document, has been in the scheme members' best interests inasmuch that it demonstrates that the Scheme's managers have undertaken stewardship activity they deem to be appropriate and proportionate in the oversight and management of the Scheme's investments.

3.1 Voting and Engagement Policy and Funds

The Trustees' policy on Stewardship from the Scheme's SIP is set out below:

The Trustees' policy on the exercise of rights attaching to investments, including voting rights, is that these rights should be exercised by the investment manager on the Trustees' behalf, having regard to the best financial interests of the beneficiaries.

The investment managers should engage with companies to take account of ESG factors in the exercise of such rights as the Trustees believe this will be beneficial to the financial interests of members over the long term. The Trustees will review the investment managers' voting policies, with the help of their investment consultant, and decide if they are appropriate.

The Trustees also expect the investment managers to engage with investee companies on the capital structure and management of conflicts of interest.

If the policies or level of engagement are not appropriate, the Trustees will engage with the investment managers, with the help of their investment consultant, to influence the investment managers' policies. If this fails, the Trustees will review the investments made with the investment managers.

The Trustees have taken into consideration the Financial Reporting Council's UK Stewardship Code and expect investment managers to adhere to this where appropriate for the investments they manage.

The following table sets out:

- The funds and products in which the Scheme was invested during the Scheme's reporting period;
- The holding period for each fund or product; and
- Whether each investment manager made use of a 'proxy voter', as defined by the Regulations

Minerva Says

As shown in the previous table:

- LGIM identified Institutional Shareholder Services, or 'ISS' as their 'Proxy Voter'
- The investments shown as 'N/A' had no listed equity voting activity associated with them, and so had no need for a proxy voter

4 Exercise of Voting Rights

The following tables show a comparison of each of the Scheme's relevant manager(s) voting activity versus the Trustees' policy (which in this instance is the manager's own policy).

Table 4.1: LGIM's Approach to Voting

Key Points of Manager's Voting Policy	<p>LGIM's latest 'Global corporate governance and responsible investment policy' sets out what the manager considers to be corporate governance best practice. It explains their expectations with respect to topics they believe are essential for an efficient governance framework, and for building a sustainable business model. LGIM have this to say in terms of their overall approach:</p> <p><i>When developing our policies, we consider broader global guidelines and principles such as those provided by the United Nations Global Compact, OECD and ILO conventions and recommendations as well as local market regulatory expectations. The extent to which we apply these policies allows some leeway for those markets that are still developing their governance policies. Although there is no 'one-size-fits-all' solution to building a sustainable business model, we look for the companies in which we invest to demonstrate that sustainability is effectively integrated into their long-term strategy and daily operations. Companies should aim to minimise any negative impact their businesses have on the environment, while innovating to find better solutions. Their strategies should include ways to make a positive impact on society, embrace the value of their workforce and supply chains, while delivering positive long-term returns to shareholders.</i></p> <p>LGIM's voting policy is built on the assessment of 5 key policy areas:</p> <table border="1"> <thead> <tr> <th>#</th><th>Policy Area</th><th>Example of Topics Covered</th></tr> </thead> <tbody> <tr> <td>1</td><td>Company Board</td><td>Board Leadership, Board Independence, Board Diversity, Succession Planning and Board Evaluation</td></tr> <tr> <td>2</td><td>Audit, Risk & Internal Control</td><td>External and Internal Audit, Whistleblowing, Cybersecurity and Climate Risks</td></tr> <tr> <td>3</td><td>Remuneration</td><td>Remuneration Committee, Remuneration Transparency, Fixed Remuneration, Variable Pay, Service Contracts and Termination Payments</td></tr> </tbody> </table>		#	Policy Area	Example of Topics Covered	1	Company Board	Board Leadership, Board Independence, Board Diversity, Succession Planning and Board Evaluation	2	Audit, Risk & Internal Control	External and Internal Audit, Whistleblowing, Cybersecurity and Climate Risks	3	Remuneration	Remuneration Committee, Remuneration Transparency, Fixed Remuneration, Variable Pay, Service Contracts and Termination Payments

Is Voting Activity in Line with the Scheme's Policy?

Yes

Some examples of the manager's voting activity are provided in **Section 7 – Significant Votes**

Minerva Says

- LGIM have set out how they approach their stewardship responsibilities for listed companies on behalf of their clients.
- From the information available, we believe that their voting approach is consistent with the Scheme's voting approach expectations of its investment managers.

5 Manager Voting Policy

As the current approach of the Scheme is to use the voting policy of the external asset managers, it is important that these policies are independently reviewed to ensure that they match current good practice and the general stewardship expectations set by the Scheme. Well-managed companies that operate in a commercially, socially and environmentally responsible manner are expected to perform better over the longer term, as the Scheme believe that adopting such an approach will allow each company's management to identify, address and monitor the widest range of risks associated with their specific business.

Set out in the following table is Minerva's independent assessment of the Scheme's managers' publicly available voting policies, in the context of current good practice as represented by the ICGN Voting Guidelines, whilst also bearing the Scheme's stewardship expectations in mind. This has been done for each manager where they have identified voting activity on behalf of the Scheme.

We have assessed each manager's policy individually, looking at it from Minerva's perspective of seven 'Voting Policy Pillars' that are at the core of our proxy voting research process, and which we have developed over the last 25 years. In using this well-tried approach, the Scheme can be sure that their investment managers voting policies are being carefully considered against current good practice.

Table 5.1: Voting Policy Alignment

Manager Voting Policy Alignment with Current Good Practice

Investment Manager	Audit & Reporting	Board	Capital	Corporate Actions	Remuneration	Shareholder Rights	Sustainability
LGIM	Aligned	Aligned	Aligned	Aligned	Aligned	Limited Disclosures	Aligned
Comments	Shareholder Rights: LGIM has disclosed limited information publicly on its approach regarding anti-takeover provisions. The public policy also lacks details around the rights of shareholders to hold special meetings, and proxy access.						

Table Key

Aligned	This aspect of the manager's voting policy is aligned with good practice
Limited Disclosures	This policy pillar could only be partially assessed on the information available in the manager's voting policy
No Disclosures	This policy pillar could not be assessed due to a lack of information in the manager's voting policy
Not Available	The manager's voting policy was not disclosed for analysis by Minerva

Minerva Says

For the Scheme's managers that responded to our information requests by providing voting information:

- LGIM's public voting policy is, in our view, broadly in line with good practice, and is what we would expect to see from such a large asset steward.

6 Manager Voting Behaviour

The Trustees believe that responsible oversight of investee companies is a fundamental duty of good stewardship. As such, it expects the Scheme's managers to vote at the majority of investee company meetings every year, and to provide sufficient information as to allow for the independent assessment of their voting activity.

The table below sets out the voting behaviour as disclosed by the each of the Scheme's managers:

Table 6.1: Manager Voting Behaviour

Manager	Fund	No. of Meetings	No. of Resolutions				
		Eligible for Voting	Eligible for Voting	% Eligible Voted	% Voted in Favour	% of Voted Against	% Abstain
LGIM	Dynamic Diversified Fund	10,106	102,057	99.8%	76.7%	22.5%	0.8%
	Comments						
	<p>The manager provided summarised voting records for the Dynamic Diversified Fund shown above that covered the Scheme's investment holding period.</p> <p>From the summarised information provided, we can see that the manager has voted at almost all investee company meetings for the Funds, which is in line with the Trustees' expectations of their managers.</p>						

Table Key

Available Information matches the Scheme's specific reporting period / investment holding period

Available Information is for a different period than the Scheme's reporting period / investment holding period

Information was not provided by the manager

Not Applicable

Minerva Says

For the Scheme's managers that responded to our information requests by providing voting information, we believe that they have followed the Scheme's requirements in relation to voting activity, as stated in the Scheme's SIP:

The Trustees' policy on the exercise of rights attaching to investments, including voting rights, is that these rights should be exercised by the investment manager on the Trustees' behalf, having regard to the best financial interests of the beneficiaries.

7 Significant Votes

Set out in the following section are 5 examples of the Scheme's manager(s) voting behaviour from the relevant fund(s) in which the Scheme was invested. A 'Significant Vote' relates to any resolution at a company that meets one of the following criteria:

1. Identified by the manager themselves as being of significance;
2. Contradicts local market best practice (e.g., the UK Corporate Governance Code in the UK);
3. Is one proposed by shareholders that attracts at least 20% support from investors;
4. Attracts over 10% dissenting votes from shareholders.

Where the manager has not provided sufficient data to identify 'Significant Votes' based on criteria 2-4 above, we have used manager-identified examples:

Table 7.1 LGIM's 'Significant Votes'

Manager	Fund	Company Name	Date of Vote	Approx Size of Holding (as % of Fund)	Summary of Resolution	Voting Action	Outcome of Vote
LGIM	Dynamic Diversified Fund	JD Wetherspoon Plc	21/11/24	Less than 0.01%	Resolution 4: Re-elect Tim Martin as Director	Against	Not available
Why a 'Significant Vote?							
Thematic - Nature: LGIM considers this vote to be significant as it is applied under our engagement program on deforestation, targeting companies in high-risk sectors. Thematic - Diversity: LGIM views gender diversity as a financially material issue for our clients, with implications for the assets we manage on their behalf.							
Manager's Vote Rationale:							
Deforestation Policy: A vote against is applied as the company is deemed to not meet minimum standards with regard to LGIM's deforestation policy. Chair tenure: A vote against the Chair's re-election is applied because we believe the role of Board Chair should be refreshed regularly in line with best practice. Chair independence: A vote against is applied to the (re-)election of a non-independent Chair due to concerns regarding the lack of independence on the board. Diversity: A vote against is applied because of a lack of progress on gender diversity on the board. LGIM expects companies to have at least 40% female representation on the board.							
Were Votes Against Company Management Communicated to the Company Ahead of the Meeting?							
LGIM publicly communicates its vote instructions on its website with the rationale for all votes against management. It is our policy not to engage with our investee companies in the three weeks prior to an AGM as our engagement is not limited to shareholder meeting topics.							
Next Steps / Implications of the Outcome:							

LGIM will continue to engage with our investee companies, publicly advocate our position on this issue and monitor company and market-level progress.

Relevance to Manager's Stated Policy:

Company Board	Audit, Risk & Internal Control	Remuneration	Shareholder & Bondholder Rights	Sustainability
----------------------	---	---------------------	--	-----------------------

We believe this voting activity is consistent with the manager's stated approach, and so is also consistent with the Scheme's approach

Manager	Fund	Company Name	Date of Vote	Approx Size of Holding (as % of Fund)	Summary of Resolution	Voting Action	Outcome of Vote
LGIM	Dynamic Diversified Fund	Cal-Maine Foods, Inc.	4/10/24	Less than 0.01%	Resolution 1.1: Elect Director Adolphus B. Baker	Against	The resolution passed

Why a 'Significant Vote?'

Thematic - Diversity: LGIM views gender diversity as a financially material issue for our clients, with implications for the assets we manage on their behalf.

Manager's Vote Rationale:

Average board tenure: A vote against is applied as LGIM expects a board to be regularly refreshed in order to maintain an appropriate mix of independence, relevant skills, experience, tenure, and background. Diversity: A vote against is applied as LGIM expects a company to have at least one-third women on the board. Independence: A vote against is applied as LGIM expects the Chair of the Committee to have served on the board for no more than 15 years in order to maintain independence and a balance of relevant skills, experience, tenure, and background. Nomination Committee - Independence: WITHHOLD votes are warranted for Adolphus Baker for serving as a non-independent member of a key board committee. Shareholder rights: A vote against is applied because LGIM supports the equitable structure of one-share-one-vote. We expect companies to move to a one-share-one-vote structure or provide shareholders a regular vote on the continuation of an unequal capital structure.

Were Votes Against Company Management Communicated to the Company Ahead of the Meeting?

LGIM publicly communicates its vote instructions on its website with the rationale for all votes against management. It is our policy not to engage with our investee companies in the three weeks prior to an AGM as our engagement is not limited to shareholder meeting topics.

Next Steps / Implications of the Outcome:

LGIM will continue to engage with our investee companies, publicly advocate our position on this issue and monitor company and market-level progress.

Relevance to Manager's Stated Policy:

LGIM	Dynamic Diversified Fund	BHP Group Limited	30/10/24	0.15%	Resolution 13: Approve Climate Transition Action Plan	For	Not available		
Why a ‘Significant Vote?’									
Pre-declaration: This shareholder resolution is considered significant due to the relatively high level of support received.									
Manager’s Vote Rationale:									
Climate Change: The critical minerals that mining companies provide are essential to the energy transition. It is clear that BHP has made significant strides in carrying out its core role in the transition in a sustainable manner, and has demonstrated this through the substantial alignment of its Climate Transition Action Plan (CTAP) with our framework for assessing mining company transition plans. Therefore, LGIM will be supporting BHPs CTAP. Going forwards, we will assess the disclosure of progress on BHPs plans for the development of a more targeted methane measurement, management and mitigation strategy, as well as the plans it is executing to support the decarbonisation of steelmaking. We will also continue to engage with BHP to ensure resilience whilst navigating the dynamic market for metallurgical coal.

Why a 'Significant Vote?									
Thematic - Diversity: LGIM views gender diversity as a financially material issue for our clients, with implications for the assets we manage on their behalf.									
Manager's Vote Rationale:									
Independence: A vote against is applied due to the lack of independent directors on the board. Independent directors bring an external perspective to the board. Bringing relevant and suitably diverse mix of skills and perspectives is critical to the quality of the board and the strategic direction of the company. We would like to see controlled companies have a majority of the board comprising truly independent outside directors. Diversity: A vote against is applied due to the lack of meaningful diversity on the board.

Why a 'Significant Vote?									
Thematic - Climate: LGIM considers this vote to be significant as it is applied under the Climate Impact Pledge, our flagship engagement programme targeting companies in climate-critical sectors. More information on LGIM's Climate Impact Pledge can be found here: https://www.lgim.com/uk/en/responsible-investing/climate-impact-pledge/ Thematic - Board Leadership: LGIM considers this vote to be significant as it is in application of an escalation of our vote policy on the topic of the combination of the board chair and CEO.									
Manager's Vote Rationale:									
Climate Impact Pledge: A vote against is applied as the company is deemed to not meet minimum standards with regard to climate risk management. Joint Chair/CEO: A vote against is applied as LGIM expects companies to separate the roles of Chair and CEO due to risk management and oversight concerns.									
Were Votes Against Company Management Communicated to the Company Ahead of the Meeting?									
LGIM publicly communicates its vote instructions on its website with the rationale for all votes against management. It is our policy not to engage with our investee companies in the three weeks prior to an AGM as our engagement is not limited to shareholder meeting topics.									
Next Steps / Implications of the Outcome:									
LGIM will continue to engage with our investee companies, publicly advocate our position on this issue and monitor company and market-level progress.

Minerva Says

LGIM's reported 'Significant Vote' information seems to be consistent with their stated voting policies, and so is consistent with the Scheme's expectations.

8 Manager Engagement Information

The Trustees have set the following expectation in the Scheme's SIP in relation to its managers' engagement activity:

The investment managers should engage with companies to take account of ESG factors in the exercise of such rights as the Trustees believe this will be beneficial to the financial interests of members over the long term. The Trustees will review the investment managers' voting policies, with the help of their investment consultant, and decide if they are appropriate.

The Trustees also expect the investment managers to engage with investee companies on the capital structure and management of conflicts of interest.

If the policies or level of engagement are not appropriate, the Trustees will engage with the investment managers, with the help of their investment consultant, to influence the investment managers' policies. If this fails, the Trustees will review the investments made with the investment managers.

The Trustees believe that an important part of responsible oversight is for the Scheme's investment managers to engage with the senior management of investee companies on any perceived risks or shortcomings – both financial and non-financial – relating to the operation of the business, with a specific focus on ESG factors. As such, they expect the Scheme's managers to engage with investee companies where they have identified any such issues.

The following table(s) summarises the engagement activity of the manager(s):

Aspect of Engagement Activity	Details
Key Points of the Manager's Engagement Policy	<p>BlackRock explains their approach to engagement in their Investment Stewardship, Engagement Priorities Summary document:</p> <p><i>'BIS takes a constructive, long-term approach to our engagement with companies and focuses on the management and oversight of the drivers of risk and financial value creation in a company's business model. Engagement is core to our stewardship efforts as it provides us with the opportunity to improve our understanding of a company's business model and the risks and opportunities that are material to how they create financial value. Engagement may also inform our voting decisions for those clients who have given us authority to vote on their behalf, particularly on issues where company disclosures are not sufficiently clear or complete, or management's approach seems misaligned with the financial interests of long-term shareholders.'</i></p> <p>BlackRock's Engagement Priorities:</p> <ol style="list-style-type: none"> 1. Board quality and effectiveness- quality leadership, board composition, effectiveness, diversity and accountability 2. Strategy, purpose, and financial resilience- <i>'Clear purpose supports a clear sense of direction in corporate leadership, and helps companies to compete, navigate short-term challenges, and achieve long-term growth.'</i> 3. Incentives aligned with financial value creation- Appropriate incentivizing and rewarding executives for the successful delivery of strategic goals and financial outperformance against peers drives financial long-term value creation 4. Climate and natural capital- <i>'BlackRock's approach to climate-related risk, and the opportunities presented by the low-carbon transition, is based on our fundamental role as a fiduciary to our clients. Our role is to help our clients navigate investment risks and opportunities; it is not our role to engineer a specific decarbonization outcome in the real economy.'</i>

	<p><i>The management of nature-related risks and opportunities is a component of the ability to generate long-term financial returns for companies whose strategies or supply chains are materially reliant on natural capital. For these companies, we look for disclosures to assess risk oversight and to understand how nature-related impacts and dependencies are considered within the company's strategy.'</i></p> <p><i>5. Company impacts on people- 'BIS focuses on understanding the effectiveness of boards and management in ensuring a company has the workforce necessary for delivering long-term financial performance. BIS looks to companies to demonstrate a robust approach to human capital management (HCM) and provide shareholders with the necessary information to understand how the approach taken aligns with the company's stated strategy and business model. BIS engages with companies on how they manage the human rights issues that are material to their businesses and monitor the effectiveness of their human rights practices on a best-efforts basis.'</i></p>

Key Points of the Manager's Engagement Policy	<p>TwentyFour have made the following statement in terms of their approach towards engagement activity:</p> <p><i>'The decision to engage with the management of an investee company is primarily based on what TwentyFour investment professionals believe will maximise bondholder value in the long-term, specifically the value of its clients' investments.</i></p> <p><i>TwentyFour's investment professionals may engage with company management on a variety of issues, including ESG matters that present a potential material risk to a company's financial performance. Comparison of the Manager's Engagement Activity vs the Scheme's Expectations	<p>An example of a reported engagement undertaken for the Strategic Income Fund is:</p> <p><u>09/01/25 – Deutsche Bank – Environmental-themed Climate risk</u></p>

	<p><u>Engagement Details:</u> 'We engaged with Deutsche Bank following a controversies flag alleging that they financed a Queensland coal mine. We asked from clarification if and why the funding went ahead despite the company's commitment to not directly or indirectly finance the construction of new coal-fired power plants or new mining projects for the extraction of coal?</p> <p><u>Engagement Outcome:</u> 'Deutsche Bank were unable to comment on any existing client relationships for legal reasons, however in their response they made it clear that they adhere to their established policies and procedures in conducting business – suggesting they have complied with their policies in relation to this loan. Deutsche Bank has a set of requirements and guiding principles that they apply to the client and business selection processes. As part of this approach, Deutsche Bank conducts enhanced environmental and social due diligence for transactions in the thermal coal power and mining sector. The Bank will cease financing (lending and capital markets) for companies with a thermal coal revenue dependency of more than 50% that do not have credible plans to reduce this dependency to below 50% by 2025 in OECD countries, or below 30% by 2030 in non-OECD countries. This approach is essential to mitigate and manage negative impacts on the environment or society and to uphold the bank's commitments to international standards. In this context, the bank has defined criteria for evaluating transition plans for the phasing out of thermal coal. Phaseout from thermal coal is expected for companies in OECD countries by 2030 and for companies in non-OECD countries by 2040.'</p> <p>'We have replied asking for explicit confirmation that the loan in question did not constitute as a breach of DB's coal financing policies. Happy to hold and await response.'</p>

As can be seen from the previous tables, the Scheme's managers' 'Engagement Activity', apart from BlackRock, appears to comply with their own engagement approaches, and so also complies with the Scheme's approach.

9 Conclusions

9.1 Assessment of Compliance

In this report, Minerva has undertaken an independent review of the Scheme's external asset managers' voting and engagement activity. The main objective of the review is for Minerva to be in a position to say that the activities undertaken on the Scheme's behalf by its agents are aligned with its own policies.

Set out in the following table is Minerva's assessment of each manager's compliance with the Scheme's approach:

Table Key

GREEN=Positive outcome e.g., Manager's reported activity follows the Scheme's expectations

ORANGE=An issue exists e.g., the information provided does not match the Scheme's reporting / investment holding period

BLUE=Manager has confirmed that there is no voting, 'Significant Votes' or engagement information to report (N.I.R.)

RED=Negative outcome e.g., no information provided (N.I.P.); Manager is not a signatory to the UK Stewardship Code 2020

GREY=Not Applicable e.g., there has been no 'Proxy Voter' used due to the nature of the investments held

Minerva Says

Overall Assessment:

We believe that the Scheme's managers have broadly complied with the Scheme's Voting and Engagement requirements of them.

Notes

- 1) The preceding table shows that Minerva has been able to determine that:
 - There was nothing to report for a number of the Scheme's investments, due to the nature of those investments (e.g., LGIM LDI Funds)
 - For the managers where Voting and 'Significant Vote' information was available, their overall approaches are in step with the Scheme's requirements
 - For the managers where Engagement information was available, their overall approaches are also in step with the Scheme's requirements
- 2) All of the Scheme's investment managers are signatories to the UK Stewardship Code.
- 3) We remain somewhat disappointed with the limited engagement information provided by LGIM and BlackRock. We believe that, as Stewardship Code Signatories, both firms should be able to provide their clients with more detailed information on stewardship activities undertaken on their behalf.

LGIM Information Disclaimer

- i. Carbon dioxide equivalent (CO₂e) is a standard unit to compare the emissions of different greenhouse gases.
- ii. The choice of this metric follows best practice recommendations from the Task Force on Climate-related Financial Disclosures.
- iii. Data on carbon emissions from a company's operations and purchased energy is used.
- iv. This measure is the result of differences in weights of companies between the index and the benchmark, and does not depend on the amount invested in the fund. It describes the relative 'carbon efficiency' of different companies in the index (i.e. how much carbon was emitted per unit of sales), not the contribution of an individual investor in financing carbon emissions.
- v. LGIM set the following threshold for our reportable funds 1) the assets eligible for coverage e.g. eligible ratio needs to be greater than or equal to 50% and 2) the carbon coverage of the eligible assets e.g. eligible coverage needs to be greater than or equal to 60%.
- vi. Eligibility % represents the % of the securities in the benchmark which are eligible for reporting including equity, bonds, ETFs and sovereigns (real assets, private debt and derivatives are currently not included for carbon reporting). The Coverage % represents the coverage of those assets with carbon scores.
- vii. Derivatives including repos are not presently included and the methodology is subject to change. Leveraged positions are not currently supported. In the instance a leveraged position distorts the coverage ratio over 100% then the coverage ratio will not be shown.
- viii. LGIM define 'Sovereigns' as, Agency, Government, Municipals, Strips and Treasury Bills and is calculated by using: the CO₂e/GDP, Carbon Emissions Footprint uses: CO₂e/Total Capital Stock.
- ix. The carbon reserves intensity of a company captures the relationship between the carbon reserves the company owns and its market capitalisation. The carbon reserves intensity of the overall benchmark reflects the relative weights of the different companies in the benchmark.
- x. Green revenues % represents the proportion of revenues derived from low-carbon products and services associated with the benchmark, from the companies in the benchmark that have disclosed this as a separate data point.
- xi. Engagement figures do not include data on engagement activities with national or local governments, government related issuers, or similar international bodies with the power to issue debt securities.
- xii. LGIM's temperature alignment methodology computes the contribution of a company's activities towards climate change. It delivers an specific temperature value that signifies which climate scenario (e.g.3°C, 1.5°C etc.) the company's activities are currently aligned with. The implied temperature alignment is computed as a weighted aggregate of the company-level warming potential.

If in doubt about the suitability of this product, you should seek professional advice. The Information is for information purposes only and we are not soliciting any action based on it. No representation regarding the suitability of instruments and/or strategies for a particular investor is made in this document and you should refrain from entering into any investment unless you fully understand all the risks involved and you have independently determined that the investment is suitable for you.

Investment Performance: The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested. Past performance is not a guide to the future. Reference to a particular security is for illustrative purposes only, is on a historic basis and does not mean that the security is currently held or will be held within an LGIM portfolio. The above information does not constitute a recommendation to buy or sell any security.

Confidentiality and Limitations: Unless otherwise agreed by Legal & General in writing, the Information in this document (a) is for information purposes only and we are not soliciting any action based on it, and (b) is not a recommendation to buy or sell securities or pursue a particular investment strategy; and (c) is not investment, legal, regulatory or tax advice. Any trading or investment decisions taken by you should be based on your own analysis and judgment (and/or that of your professional advisors) and not in reliance on us or the Information. To the fullest extent permitted by law, we exclude all representations, warranties, conditions, undertakings and all other terms of any kind, implied by statute or common law, with respect to the Information including (without limitation) any representations as to the quality, suitability, accuracy or completeness of the Information. Any projections, estimates or forecasts included in the Information (a) shall not constitute a guarantee of future events, (b) may not consider or reflect all possible future events or conditions relevant to you (for example, market disruption events); and (c) may be based on assumptions or simplifications that may not be relevant to you. The Information is provided 'as is' and 'as available'. To the fullest extent permitted by law, Legal & General accepts no liability to you or any other recipient of the Information for any loss, damage or cost arising from, or in connection with, any use or reliance on the Information. Without limiting the generality of the foregoing, Legal & General does not accept any liability for any indirect, special or consequential loss howsoever caused and on any theory or liability, whether in contract or tort (including negligence) or otherwise, even if Legal & General has been advised of the possibility of such loss.
