Lifestyle Lookbook

Embark on a journey of seamless luxury

For every place that matters

About us

Where's your place? The answer for almost everyone is the same: we feel happiest in a place where we are both free and secure. A place where we can move around safely and seamlessly, without obstacles, worries, or confusion. dormakaba enables this precious experience for buildings, spaces, and communities around the globe so that people everywhere can feel safe and secure in the places that matter to them. To put it in one sentence, dormakaba's vision is to be the trusted partner worldwide for safe, secure, and sustainable places where people can move seamlessly. Our global communities are always on the move: each year, the equivalent of more than half the world's population goes through an airport security gate. Each day, 11,000 new buildings are completed. The global construction industry will more than double in size this decade, to more than USD 14 trillion. By 2050, two-thirds of the world's population will be living in cities. Such places matter deeply—they are where our global communities meet, work, and enjoy life. They are the stages for our greatest and most memorable moments. And dormakaba is right there as the partner at your side to make these moments count.

Swiss-based company headquartered in Rümlang, near Zurich, Switzerland

With 160 years of expertise, we are pioneers in our industry

Our global workforce comprises over 15,000 employees

We serve 130 countries, building strong partnerships worldwide

We hold more than 1,800 patents, fueling innovation and progress

A trusted partner for safe, secure, and sustainable access solutions—for every place that matters. When you need innovative, reliable access and security solutions—in hotels, shops, sporting venues, airports, hospitals, offices, or at home—we are there!

Door Seals

Door Seals

At dormakaba, we believe your space should reflect your style, comfort, and individuality. Our seals are designed to enhance automatic doors, shower enclosures, and other entry systems—ensuring a secure, comfortable environment by blocking drafts, water leaks, and dust. We go further by protecting against noise, smoke, fire, rain, and other external elements that can enter through gaps in doors and windows. More than a seal, our solutions offer unmatched protection for your space.

Manual Swing with Floor Spring

Manual Swing with Floor Spring

For spaces that reflect your individuality and personal expression, the RTS 85 and BTS 80 door closers offer the perfect blend of style and functionality. The RTS 85, designed for variable partition walls, integrates seamlessly into both double and single action doors, offering a concealed solution that complements your design. Similarly, the BTS 80 floor-concealed door closer features a compact and versatile design, fitting almost any installation where larger closers would be restrictive. The BTS 75V adds a touch of smooth, effortless operation with a discreet, seamless design that enhances your aesthetic. Together, these solutions ensure every detail of your door systems reflects your unique style, elevating your space with elegance.

Recreation Area

- Automatic Telescopic Solution
- Automatic Folding Door Solution
- Balcony Sliding Wall

When the space is all about energy, motivation, and personalisation, every element must seamlessly blend form and function, offering a dynamic environment that supports both physical goals and personal style. From smart design solutions to efficient use of space, your recreation area should reflect your unique approach to fitness, creating a space where performance meets inspiration and every corner speaks to your individuality.

Recreation Area

Automatic Telescopic Solution

Automatic Telescopic Solution

Create a space that reflects your personal style with the telescopic door solution, a perfect blend of design and functionality. Ideal for compact areas requiring wider openings, this automatic sliding door delivers unmatched flexibility without compromising on reliability, convenience, or safety. Its design optimises space, making larger areas feel more intimate and accessible. Whether for high-traffic zones or cozy spaces, this solution adapts to your needs while seamlessly complementing your personal expression.

TST

Simply Impressive

- Telescopic mechanism creates a 33% wider passage compared to a bi-parting automatic sliding door of the same size
- Maximises opening width within the available space, easing traffic flow
- Excellent installation features with interlocking side seals, as well as top and bottom seals

Recreation Area

Automatic Folding Door Solution

Automatic Folding Door Solution

Reflect your personal style with the FFT sliding folding door system, designed to combine elegance and functionality. Perfect for recreational spaces, this automatic system ensures smooth, effortless operation, adapting seamlessly to both large and compact areas while maintaining safety and flow. Its refined design enhances your space, creating an environment that aligns with your unique vision of well-being and style. Perfect for tight spaces, the bi-folding door requires minimal space when opened, features sleek profiles for large glass surfaces, and includes sensitive force monitoring, all while embodying your unique style.

FFT

Simply Impressive

- FFT folding and sliding doors occupy the minimum of the door opening width and extremely little in depth
- FFT makes it especially suitable for narrow door openings and passageways where space is limited, and it is particularly suitable for emergency exits and escape routes
- Jam-free profiles and no floor track requirement for internal applications, enabling unbroken floor finishes
- The innovative operating system of FFT FLEX detects wind loads and compensates accordingly to guarantee a smooth opening and closing behaviour
