LAS Shatters Annual Passenger Record with 57.6 Million in 2023

LAS VEGAS – Demand for air travel in Las Vegas continued its historic post-pandemic rise as Harry Reid International Airport (LAS) set a new annual passenger record for the second consecutive year, serving 57.6 million travelers and besting the previous record of 52.6 million in 2022.

The annual number was not the only record broken in 2023.

- 11 of the 12 months in 2023 set records for that month
- October 2023 set the record for busiest month ever at LAS with 5.4 million passengers
- Domestic travel was at an all-time high with 53.3 million passengers

International travel continued to rebound. The number of passengers on international flights surpassed the 3 million passenger threshold for the first time since 2019 with 3.2 million. In addition to increased service from Canada and Mexico, LAS was pleased to add seasonal service from San Salvador via Avianca, opening up more of Central America and South America to Las Vegas.

“Setting a new annual record emphasizes the strength of air travel in Las Vegas and the faith in Harry Reid International Airport to deliver on a world class customer experience,” said Rosemary Vassiliadis, Clark County Director of Aviation (CCDOA). “We worked to raise the bar even further in 2023, as millions traveled for special events, conventions, sporting events, concerts and more. Our attention is already focused on 2024 and meeting the continued demand for our growing region.”

As Las Vegas continues its evolution into the mega entertainment and sports capital of the world, there will be increased demands on the Clark County Aviation System and its facilities. This was seen almost immediately in the general aviation activity on the west side of the LAS airfield, and at Henderson Executive Airport and North Las Vegas Airport. In 2023, both LAS and Henderson expanded aircraft parking aprons to accommodate this new demand.

LAS continues to look at ways to maximize current resources to meet the increased demand. In conjunction with the current efforts, there is a larger focus on the future of commercial aviation in Southern Nevada.

Planning efforts continue for the proposed Southern Nevada Supplemental Airport (SNSA), a second, commercial airport in the Ivanpah Valley. This project reached a significant milestone in 2023 as CCDOA received the go-ahead to begin the process of selecting a consultant to lead the Environmental Impact Statement process.
