**IN THE FIELD.**

It was another record year in the field. We invested in 10 different partners working on the ground in 15 countries. We funded 2,421 water projects that will give clean drinking water to more than 750,000 people in need. On top of that, we funded two drilling rigs that can drill 160 wells and serve 80,000 people each year.

**AT HOME.**

We grew our people power by bringing on more staff, interns, volunteers, fundraisers, and supporters. We also increased support for our operations and closed the loop for every last mycharity: water donor through our new reporting tool, **Dollars2Projects**, which shows the impact of every dollar.

---

**OUR PROJECTS ON A MAP**

At charity: water, we’ve always believed in the power of proof. When we say we send 100% of public donations to fund water projects for communities in need, we want you to see what we mean. Explore all our projects to date with GPS coordinates on Google Maps.

[SEE OUR PROJECTS ON A MAP »](#)
2011 GROWTH

In 2011, we more than doubled the amount of funds we granted to the field. At the end of 2011, our total investment in water projects was $37 million, and with that, we’d served over two million people. But almost 800 million more still need water, and we’re aiming to help 100 million of them by the end of this decade.

BUILDING CAPACITY

Up to now, we’ve largely funded existing programs, with just a few dollars per grant allocated to capital costs. After five years of work, we’re convinced that the only way to help our partners grow, is to increase their capacity by investing in the things they need to scale -- like motorbikes, trucks, GPS devices, and tools.

Our supporters have been quick to understand the importance of these costs. In fact, they’re the ones who made the purchase of a drilling rig possible through the 2011 September Campaign. Learn more here »

</table>
They sharpen their teeth for beauty. They climb trees for food. And until recently, nearly all 16,000 of them lived without clean water. Deep in the jungles of the Central African Republic (C.A.R.), the Bayaka pigmy tribe depended solely on surface water and streams contaminated with bacteria.

In 2010, our September Campaign set out to give every member of the Bayaka clean, safe drinking water. And the village of Moale was first on the list. There had been three previous attempts to dig and drill a well there, but all three failed.
WE HIT WATER IN MOALE!

During the 2010 September Campaign, we also failed to find water in Moale. But in 2011, we returned with determination and a new technology, to deliver on our promise. After 10 years of waiting, Moale finally got clean water in July, 2011. (And 74,000 additional Central Africans got access to clean water, too.)

LESS DISEASE
Water-related illnesses are a leading cause of death for kids. Clean water can reduce diarrheal deaths by up to 21%. With soap, water can also quickly rid the feet of “jiggers” - a parasite that makes walking painful for rural kids in C.A.R.

MORE TIME
People in Moale used to walk half an hour to get dirty water from an open source. Now, spending less than half that getting clean water, the Bayaka have more time in their fields. More time to prepare food. More time to take care of their families.

PROJECT OWNERSHIP
The people of Moale invested $200 toward their new water project’s construction and now regularly collect fees to cover any maintenance. Community members have formed a water committee to watch their well.
THE 2011 SEPTEMBER CAMPAIGN

In 2011, we tried something different. Historically, we only funded actual water projects. But we knew that by expanding our partners’ capacity and giving them a new drilling rig, we could serve more people -- 40,000 more people every year, to be exact. So we launched the September Campaign to fund the purchase of a drilling rig.

OUR MOBILE MECHANICS PROGRAM IN

UTTAR PRADHESH, INDIA

At charity: water, we know that building a water project is the easy part. Keeping clean water flowing over time, however, is a complex business that requires money, training, and innovative thinking. It’s something we’ve always been committed to. Last year in India, we tried an entirely new approach: investing in entrepreneurs from the ground up, helping them grow their small businesses to repair broken wells.
A sharfi Lal is almost 40 years old. He lives in one of India’s poorest states, Uttar Pradesh. His area is a dry one, and if you go back just a few decades, you’ll see that most of the people here had no access to clean water.

In 1981, the Indian government decided to change that, and quickly. In just ten years, thousands of wells were installed across Uttar Pradesh. That was good news for people in the ‘80s but, as it turns out, not so great for their kids. The UN’s “Water Decade” (1981-1990) may have included a ton of new wells, but what it didn’t include was a full-fledged maintenance program to keep them running over time.

Soon after the wells started failing, the government responded by creating repair teams. Asharfi remembers when he came across one of them for the first time. He went home and practiced on his own time by repairing his own hand pump. After working for the government, he eventually started his own business.

*If he wanted to grow, Asharfi needed venture capital. Early last year, he got it.*

Through a new well mechanics program started by our local partner, WaterAid, Asharfi was recruited for training. charity: water invested $64,000 across four mechanics centers including Asharfi’s, training and equipping a total of 21 mechanics. Suited up with advanced tools, a crew, and a facility to manage, Asharfi’s team was challenged to repair 50 wells by the end of the year.

When we met him halfway through the year, his team had already repaired 150 wells. Collectively, the four teams we funded were able to reach four times the number of people as originally planned. Of the total requests for hand-pump repairs, 93% were successfully addressed within 24 hours, and only 3% of repair requests took more than two days to address. Within the next few years, Asharfi hopes to expand his team to include 10-15 more mechanics that will cover a larger area of 100 villages.

As we think about the future of the water projects we fund around the world, we believe our biggest challenge will be to ensure their sustainability over time. And while working in some of the most remote and hard-to-reach parts of the world makes maintenance that much more complex, our partners are always full of new ideas. We’re excited to continue trying new things, and working with communities to find truly innovative solutions that work for them.
charity: water chooses experienced partners in the field to build and implement our water projects. They know the land, the people, the culture, and the most appropriate technology for each location. They report data from the field and provide proof of our projects with photos and GPS coordinates. Our work would not be possible without them.

STORIES FROM THE FIELD
We share stories from our time in the field to illustrate the global need for clean water and how we work to solve it. At this year’s ball, we focused on our programs in Asia and Ethiopia, and the support of fundraisers right here at home.

LIVE AUCTION
Every year at charity: ball, we host a Live Auction to raise money for clean water. Instead of ski weekends and cooking classes, we auction off water projects. In less than an hour, we raised $1.2 million for clean water around the world.

WATERWALK
Millions of people in developing countries walk three hours each day to collect water. We ask our guests to try walking a fraction of that distance with two full Jerry cans. Each walk is sponsored and helps fund water projects.

MULTIMEDIA EXHIBITIONS
There’s no sit-down dinner at this event. charity: ball is interactive. We engage our guests with installations and activities that bring our work to life - right here in NYC. Even the cocktails are named after our project sites.
OUR 2011 STAFF

Our team is made up of only the most talented and passionate people, and our office is arranged to inspire. There’s space for collaboration, walls to brainstorm on, and larger-than-life pictures of people our work has helped. Every day, we get to make a difference in the world by doing jobs we love.

OUR VOLUNTEERS

They spend nights stuffing thousands of donation receipts into envelopes. They show up early and stay late at our events and build exhibitions out of hundreds of Jerry cans. Even when they’re off the clock, they wear charity: water gear to spark conversations and recruit friends to fundraise. They’re some of our most dedicated supporters.

The Well is a group of donors who support the staff and operating costs of charity: water.

Members of The Well help cover everything from staff salaries, to office rent and supplies, to our flights to the field. Without their support, we couldn’t raise money for water projects or run the organization. In 2011, 86 Well members contributed to 56% of our operating costs.

Our Well members cover 56% of our staff and operations costs.

The Well has six levels of membership. Here’s what it looked like in 2011.

10% of our Well members make up 70% of our Well funding.

* ANGEL INVESTORS

Our Angel Investors are donors who recognize the impact of a major gift to our operations and give $1 million a year to our Staff and Operations. We currently have two members at this level and they make up almost 50% of our total Well funding.
MYCHARITY: WATER

We created mycharity: water to help our supporters design and share their own charity: water fundraising campaigns. Anyone can start a campaign, and 100% of the money raised here funds water projects. Every single dollar is tracked with photos and GPS coordinates so each donor can see his or her impact.

SOME OF OUR FAVORITE CAMPAIGNERS FROM 2011

It’s not always the amount of money raised by our fundraisers that’s important. Often, it’s the way they did it that impresses us most. Here are some of our favorite campaigns from this past year:

THANKSGIVING DAY RACE!
There are 20 grandchildren in the Hillenbrand family. This year for Thanksgiving, they decided to walk for clean water and raised $40,000, enough to give 2,000 people clean water.

SUSQUEHANNA UNIVERSITY
The Susquehanna University students threw their own charity ball - although they added foam. While they partied, they educated guests on the water crisis and raised money by selling charity:water wristbands and raffle tickets.

Bad games suck, but having to live without clean drinking water sucks more. This crew played their way through the worst video games ever created and broadcast the whole thing. On the way, they raised more than $10,000.

MUSIC FOR HUNGRY CHILDREN
Great things come in small sizes. Herbert is only seven years old. But after hearing nine year old Rachel’s story, he was inspired to play his violin and piano on the street to raise money to give clean water for people in need.
DOLLARS TO PROJECTS

We’re serious about connecting the people who fundraise and donate to the water projects they helped fund. Dollars to Projects ties every donation made on mycharity: water to a completed water project in a developing country. Whether you give $1 or $5,000, you’ll see exactly where your money goes and how you make a difference.

1. YOU FUNDRAISE OR DONATE.

Okay, so maybe you didn’t jump out of an airplane. But your crazy friend did and you donated $20 to her campaign. Or maybe you donated $35 on your friend’s 35th birthday, even though you weren’t going to buy him a gift.

Or maybe you gave up your own birthday or ran a race to raise money on mycharity: water. Clearly, you crushed your goal.

2. WE SEND YOUR MONEY TO THE FIELD.

We work closely with our local partners to assess which communities have the greatest need. Then, we pool your funds with money raised by other folks during the same time period and send 100% of it to our partners on the ground.

3. OUR PARTNERS START THE WORK.

We use the right technology. charity: water and our partners select from a variety of water solutions, depending on the region’s water availability, culture, and economic conditions.

The village takes ownership. The community elects a Water Committee to oversee the project. Then, they’re trained on how to manage and maintain it.

Our partners know how to roll with the punches. The water field is a complicated business that includes some risks we can’t control. Since our partners know the options inside and out, they can adjust on the fly to keep our projects moving.
4. OUR PARTNERS COLLECT GPS, PHOTOS AND DATA.

When the water project is complete, our partners send their field teams out by motorbike, truck, or foot, depending on how hard the new system is to reach. They collect GPS coordinates and take photos of the finished project in its environment, and send all that data to us.

5. WE ASSIGN YOUR DOLLARS TO PROJECTS.

We verify all our partners’ data to make sure it’s correct: the technology used, the population served, the cost per project, the GPS coordinates, and the photos. We enter it into our system and use a custom-built Assignment Tool to match your money with the projects you helped fund.

6. YOUR COMPLETION REPORT.

We create your Project Detail Report which shows GPS coordinates, photos, and other information about the community you helped, and we publish this on your My Projects page. This page is public, so you can easily share it with all your friends.

SEE A REAL EXAMPLE »
WATERFORWARD

In 2011, angel donor Michael Birch and his team at Monkey Inferno created Waterforward -- an online pay-it-forward movement. It’s a very simple way to take a bite out of the water crisis.

There were almost a billion people in the world without clean water, and almost a billion people using social media. So we had an idea: let’s connect them.

Waterforward is a digital book filled with faces of people donating to the clean water cause.

You can’t put yourself in the book. Someone who’s already in must donate $10 to invite you. 100% of the money raised goes directly to water projects.

When you’re in, you’re asked to pay it forward and invite someone else. Each new face represents more clean water for those who still need it.
Rachel Beckwith didn’t want presents when she turned nine. She wanted to raise $300 and give clean water to 15 people in need. On July 23, just five weeks after her birthday, Rachel was riding in the back seat of her family’s car when two tractor trailers collided on I-90, resulting in a pile-up near her home in Bellevue, Washington. Although the rest of her family escaped without serious injury, Rachel was put on life support and passed away two days later.

While grieving, friends and family wanted to donate on Rachel’s mycharity: water campaign to honor her memory. Members of the family’s EastLake Community Church began contributing, too, and the total rose to $200,000 within just a few days of Rachel’s death. Then Seattle began to rally around Rachel’s wish, and news of her powerful story spread even farther.

The New York Times, CNN, CBS, NBC... Media outlets around the country re-told Rachel’s story in the following weeks. Strangers around the globe responded with donations of $9, $19, and $99, in honor of her birthday. Letters and emails poured in, too, expressing gratitude for her unselfish example.

Rachel’s campaign became the biggest in mycharity: water’s history, collecting more than $1.2 million. That’s enough to give clean drinking water to 60,000 people. And although she isn’t here to see this amazing outcome, this little girl’s wish inspired thousands to take up her cause.

Thank you to the family of Rachel Beckwith, for sharing her life and legacy with the world. I am forever grateful for her testimony of love and faith.

The power of one touches all of us. Thank you, Rachel, for teaching us kindness.

I wish Rachel were the rule, rather than the exception.

I know it’s not much, but hearing this story makes my heart ache and there needs to be more people like Rachel in this world.

A FEW OF THE 32,072 MESSAGES FROM RACHEL’S CAMPAIGN

In hopes we someday have a child as giving and sweet as Rachel. Thank you for reminding us all what is truly important in life and inspiring people to ‘pay it forward’ for years to come!

I'm a 42 year old single and this story brought tears to my eyes. The world will be a better place because you were here Rachel—wish we could have enjoyed you a little longer. Keep smiling down on us—we will smile when we think of you.

I'm hoping that Rachel’s spirit and heart continue to bring joy into the lives of her family even though she is no longer with them. That Rachel will enhance the lives of countless families for generations to come is remarkable and truly inspiring.

The world will be a better place because you were here Rachel—wish we could have enjoyed you a little longer. Keep smiling down on us—we will smile when we think of you.

I'm a 42 year old single and this story brought tears to my eyes. The world will be a better place because you were here Rachel—wish we could have enjoyed you a little longer. Keep smiling down on us—we will smile when we think of you.

I don't know you personally—but you have brought out the best in all of us.

Our family has been deeply touched by Rachel’s story. My daughters, Katie and Chrissy turned 11 on Monday and wanted to donate some of their birthday money to help Rachel’s cause. She is an inspiration to all of us.

Another life saved on Rachel’s behalf. Thanks for the inspiration, Rachel!

Thanks for reminding us what is truly important in life.

Thank you Rachel for your giving heart that has already and will continue to touch the lives of so many.

Thank you Rachel for your giving heart that has already and will continue to touch the lives of so many.

We are in awe of you and your giving heart! You are an example of how we should give more of ourselves to others. Thank you for being so inspiring.

We are in awe of you and your giving heart! You are an example of how we should give more of ourselves to others. Thank you for being so inspiring.

In honor of a little girl that gave more in her too brief 9 years than many of us will in our entire life. Rest in peace young lady.

In hopes we someday have a child as giving and sweet as Rachel. Thank you for reminding us all what is truly important in life and inspiring people to ‘pay it forward’ for years to come!

Have been following this since July. It’s been kind of a ‘we-are-the-world’ past few months. Here’s hoping Rachel knows about all this. Her family is in my thoughts.

I'm a 42 year old single and this story brought tears to my eyes. The world will be a better place because you were here Rachel—wish we could have enjoyed you a little longer. Keep smiling down on us—we will smile when we think of you.

I'm hoping that Rachel’s spirit and heart continue to bring joy into the lives of her family even though she is no longer with them. That Rachel will enhance the lives of countless families for generations to come is remarkable and truly inspiring.

Thank you for opening our eyes to what life is truly about. I hope that we can raise our children to be as selfless and loving. Rest in peace sweet Rachel, we think of you and your family often.

When I heard this story, a tear came to my eye. Such a young, blessed little girl and such a sad ending to such a wonderful soul. I am sure she is in heaven cheering for joy at what has happened with her birthday campaign.

Our family has been deeply touched by Rachel’s story. My daughters, Katie and Chrissy turned 11 on Monday and wanted to donate some of their birthday money to help Rachel’s cause. She is an inspiration to all of us.

Another life saved on Rachel’s behalf. Thanks for the inspiration, Rachel!

ON EARTH DAY,

WATER CHANGES EVERYTHING

This Earth Day, we put a video together that shows how water changes everything. It features our friends Jonathan Jarvis (the brain behind The Crisis of Credit), actress Kristen Bell, and musician Douglas Kaufman, and got quite a lot of attention.

A SHOUT OUT FROM THE PRESIDENT

We were honored when President Obama told the nation about our work in his National Prayer Breakfast speech. The Washington Post’s On Faith blog noticed, too. Read the brief message from Scott called “Faith and the Waters of Change” in WaPo here »

JADEN SMITH GIVES ELLEN A BIRTHDAY PRESENT

Jaden Smith - Will and Jada’s twelve year old son - presented Ellen with a pretty awesome birthday gift on her show. Check out her reaction in this video here »
FINANCIAL RECAP

Our 2011 financial position is the strongest to date. As a result, we really increased our capacity to invest in new and exciting ways of tackling the water crisis. We also got better at doing things bigger and faster. And we started 2012 with a renewed confidence in the strength of our model and vision for the future.

CHARITY: NAVIGATOR - HIGHEST RATING

Charity Navigator is a large watchdog group that rates non-profit organizations and currently covers 5,000 charities. In 2011, they rated us. See our profile here »

CHARITY: WATER FINANCIAL SUMMARY
100% WATER

In 2011, we sent $17,646,927 to 2,406 water projects in 15 developing countries. That’s 100% of every dollar raised by the public. Here’s where the money went:

$17,646,927
100% of all public donations directly funded water programs

100% OPERATIONS

In 2011, we invested $3,403,359 of private donations in our own infrastructure, including competitive staff salaries and benefits, technologies, water program development, trips to the field, special events and office operations. Here’s where the money went:

$3,403,359
100% of our staff and operating costs were funded by private donors and events
TOTAL SUPPORT

- **INDIVIDUALS (74%)**
- **FOUNDATIONS & ORGANIZATIONS (13%)**
- **CORPORATIONS (6%)**
- **SPECIAL EVENTS* (7%)**

* includes individual contributions

65% of donations for water were raised online.
78% of all contributions came from individual donors.

ORGANIZATIONAL EFFICIENCY

- **PROGRAM SERVICES (87%)**
- **DEVELOPMENT (7%)**
- **MANAGEMENT & GENERAL (6%)**

It costs us just 6¢ to raise $1.
