

More Slime Recipes

With Elmer's, the slime possibilities are endless

Tie Dye Slime

Supplies Needed:

- 147 ml (5 fl oz) Elmer's Orange Glow-in-the-Dark Glue
- 147 ml (5 fl oz) Elmer's Purple Glow-in-the-Dark Glue
- 147 ml (5 fl oz) Elmer's Clear Glue
- 1/2 tsp of baking soda
- 1 1/4 tsp of contact lens solution

Instructions:

1. Pour out 147 ml (5 oz) of Elmer's Orange Glow-in-the-Dark Glue into a bowl.
2. Add 1/2 tsp of baking soda and mix thoroughly.
3. Add 1 1/4 tsp of contact lens solution.
4. Mix until mixture gets harder to mix and slime begins to form.
5. Take the slime out and begin kneading with both of your hands.
6. If needed, add 1/4 tsp of contact lens solution to make the slime less sticky.

Repeat steps 1 – 6 to make the next two Slime batches, Purple Glow and Clear slime. Once all colours are created, lay them on top of each other and then swirl and twist! If you knead too much, the colours will eventually mix and become one. Have fun playing with your snow indoors, snow slime that is!

*Adult supervision is required; This project is not appropriate for children under the age of 3 years. Always wash your hands before and after making and playing with slime. Warning: If large quantities of contact lens solution are accidentally ingested (greater than a tablespoon), get medical attention immediately.

Tinsel Slime

Supplies Needed:

- 177 ml (6 fl oz) Elmer's Silver Glitter Glue
- 147 ml (5 fl oz) Elmer's White Glue
- 1/2 tsp of baking soda
- 1 1/4 tsp of contact lens solution

Instructions:

1. Pour out 147 ml (5 oz) of Elmer's Silver Glitter Glue into a bowl.
2. Add 1/2 tsp of baking soda and mix thoroughly.
3. Add 1 1/4 tsp of contact lens solution.
4. Mix until mixture gets harder to mix and slime begins to form.
5. Take the slime out and begin kneading with both of your hands.
6. If needed, add 1/4 tsp of contact lens solution to make the slime less sticky.

Repeat steps 1 – 6 to make the next white Slime batch. Once created, lay them on top of each other and then swirl and twist! If you knead too much, the colours will eventually mix and become one.

*Adult supervision is required; This project is not appropriate for children under the age of 3 years. Always wash your hands before and after making and playing with slime. Warning: If large quantities of contact lens solution are accidentally ingested (greater than a tablespoon), get medical attention immediately.

Colour Changing Slime

Make slime that goes from blue to purple to blue again with Elmer's Colour Changing Liquid Glue! That's because this craft glue changes colours when exposed to sunlight. It's a specially formulated washable glue that's safe and nontoxic, making it an ideal choice for kids. And while it's great for creating playful glow slime, it also adds a transformative touch to arts and crafts. Watch the glue change colour when decorating, painting, and gluing for endless creativity.

Supplies Needed:

- 1/2 tsp of baking soda
- 1 1/4 tsp of contact lens solution
- 147 ml (5 oz) Elmer's Colour Changing Glue

Instructions:

1. Pour out 147 ml (5 oz) of Elmer's Colour Changing Glue into a bowl.
2. Add 1/2 tsp of baking soda and mix thoroughly.
3. Add 1 1/4 tsp of contact lens solution.
4. Mix until mixture gets harder to mix and slime begins to form.
