

Sign It!

☞ There are signs with numbers on them almost everywhere you look! They're on street corners and on highways. What if those numbers were written out as words?

Take a look at the street signs below. They all have numbers on them. Each sign has a blank sign next to it. Write the numbers as words on each blank sign. We've done the first one for you.

	1. 		2. 
	3. 		4. 
	6. 		5. 
			7. 

Try writing other numbers as words, such as your address, area code, age, or shoe size.
