

## Canvas Shoes

Canvas sneakers never go out of style. This casual and comfortable footwear is a go – to look that goes great with almost any outfit. So fittingly, there's no better canvas for creating personalized design creations than classic white canvas slip – ons or tie – ups.

What you need:

- A fresh pair of bright white canvas sneakers
- Sharpie Permanent Markers
- Rubbing alcohol
- Eye dropper

STEP 1 – Practice on paper first to perfect your personalized design before applying it to your new shoes.

STEP 2 – Choose a design that fits your individual style and that you'll want to wear often.

STEP 3 – Transfer your paper sketches to your canvas sneaks using a pencil. Pencil lines neatly erase from canvas if you make a mistake. If light smudges are left over, don't worry, your Sharpie markers will cover them up.

STEP 4 – You're now ready to make your design pop in bold, brilliant colours using your STAINED BY SHARPIE markers.

STEP 5 – If you desire a blended effect in your design, use rubbing alcohol to subtly swirl your Sharpie colours together. Using an eyedropper, simply add several drops of alcohol to the areas you want to blend, then let soak in and watch the colours spread and mingle. The more drops you add, the greater the blurring effect will be. Allow to dry when done.
