## **Fire-Roasted Marshmallow Strawberries**

### **Ingredients**

Fresh strawberries

1 container marshmallow fluff

### **Directions**

While you can make these inside — over a gas stove flame or with a cooking torch — if you can make them over a campfire, do!

Once your fire is crackling away, gather a bowl of clean, dry strawberries and a container of marshmallow fluff. You'll also need a spoon and several skewers or marshmallow roasting sticks.

Now, skewer a strawberry and use the spoon to help dip and coat it in marshmallow fluff. Roast the strawberry over the fire, rotating it until the marshmallow coating is browned or blackened to your liking. Let the strawberry and fluff cool for about ten seconds before eating them right off the skewer.
