

AIDS FOR PEOPLE WITH REDUCED MOBILITY

WHAT AIDS MAY OR MAY NOT BE TAKEN ON THE BUS OR TRAM?

Manual and electric wheelchairs: **allowed**

Conditions:

- Maximum dimensions 80 cm wide and 130 cm long.

Rollators: **allowed**

Conditions:

- The passenger may not remain seated on the bike.

Pushchairs: **allowed**

Conditions:

- Maximum dimensions 80 cm wide and 130 cm long.
- Not enough space? Wheelchairs take priority over pushchairs.
- Wheelchairs and ordinary pushchairs take priority over dog strollers.

Orthopaedic tricycles: **allowed**

Conditions:

- Maximum dimensions 80 cm wide and 130 cm long.
- The passenger may not remain seated on the tricycle.
- Larger, foldable tricycles must be folded up before boarding.

Orthopaedic bikes: **allowed**

Conditions:

- Maximum dimensions 80 cm wide and 130 cm long.
- The passenger may not remain seated on the bike.

AIDS FOR PEOPLE WITH REDUCED MOBILITY

Attachment wheels / handbikes for wheelchairs: **allowed**

Condition:

- Dimensions of the wheelchair and the attachment wheel / handbike together: maximum 80 cm wide and 130 cm long.
- If the length of the wheelchair and the attachment wheel / handbike together is greater than 130 cm: the steering and seating sections must be disconnected from each other before the traveller boards the vehicle.

Foldable mobility scooters: **allowed**

Condition:

- Must be folded up before you board.

Mobility scooters: **not allowed**

This applies to both tricycles and quads.

Why?

- Safety reasons: we can't secure them properly on our vehicles.
- Manoeuvrability: most scooters have a turning circle that is too large for the manoeuvring space available on our vehicles.
