

Chief Operations Officer

Shannon Oldfield was appointed Chief Operations Officer of the Cincinnati/Northern Kentucky International Airport (CVG) in November 2019. Shannon joined CVG in 1992 as a maintenance intern and has more than 30 years of airport operations and maintenance experience. He provides leadership to more than 300 personnel in his division, which spans the airport's police, fire, safety, emergency management, operations, planning and development, and maintenance teams, as well as the Airport Operations Center (AOC). In this role, Shannon is responsible for meeting federal, state, and local regulatory requirements, delivering impeccable customer service, developing and revitalizing infrastructure, and providing the highest level of on-site safety.

Shannon leads efforts to manage infrastructure; develop the airport's operational, maintenance, and utility budgets; direct snow removal operations; provide guidance for future developments, including the airport's multi-year Terminal modernization program—Elevate CVG; and manage a highly technical team for a safe, compliant, and efficient airport. A strong believer in ensuring efficiencies in order to deliver positive results, Shannon works closely with the CEO and CVG executive team to keep abreast of the latest policy issues and regulations pertaining to airport operational management.

He is also active in the community and industry, having been appointed to the Northern Kentucky Chamber of Commerce board of directors in 2023. Shannon was born in Winchester, Kentucky, and currently resides in Florence, Kentucky, with his wife, Lynn.
