

turboQSA

THE BEST SOLUTION FOR PCI-DSS ASSESSMENTS AND REPORTING

TurboQSA

TurboQSA is the leading solution for PCI-DSS assessments. With numerous productivity minded features, QSAs can work faster, smarter and with greater accuracy. Productivity will increase by 30% to 40% resulting in higher profits for your QSA company.

Empower Your Professionals

Attract and retain the industry's best QSAs by providing them a powerful tool that makes difficult work far easier to manage.

Delight Your Customers

It's no secret that most customers undergoing a PCI-DSS assessment do not like the process. TurboQSA enhances the customer experience. Your customers will look forward to the assessment year over year.

Increase Your Company's Value

High-Tech productivity enhancements provide a tech multiplier to your company's valuation. TurboQSA will set your company apart from the competition.

Work Smarter & Faster

Automatic tracking of sample sets, interviews, evidence and many more enhancements allow your QSAs to focus on what really matters: getting it right.

Schedule Smarter Interviews

TurboQSA provides an intelligent interview scheduling engine that cuts down on wasted time and repeat interviews with the same stakeholders.

Rock Solid Project Visibility

Executive management and project managers will love the visibility into each assessment that TurboQSA provides. Audit reports keep everyone accountable.

Upskill Your Talent

Solid support for Associate QSA personnel. Lead QSAs maintain full control of the project, but can easily mentor Associate QSAs along the way.

Better Assessment Process

ROC / AOC REPORT

- Accurate Reporting for all Payment Channels
- Automatic Tracking of Documents Reviewed
- Automatic Tracking of Persons Interviewed
- Inline Creation and Tracking of Compensating Controls Worksheets
- Online Evidence Submission
- Automatic Project Status Reporting
- Smart Interview Planning
- Easy Creation and Tracking of Sample Sets
- More Engaging and Easy to Use Peer Review Process
- Much More!

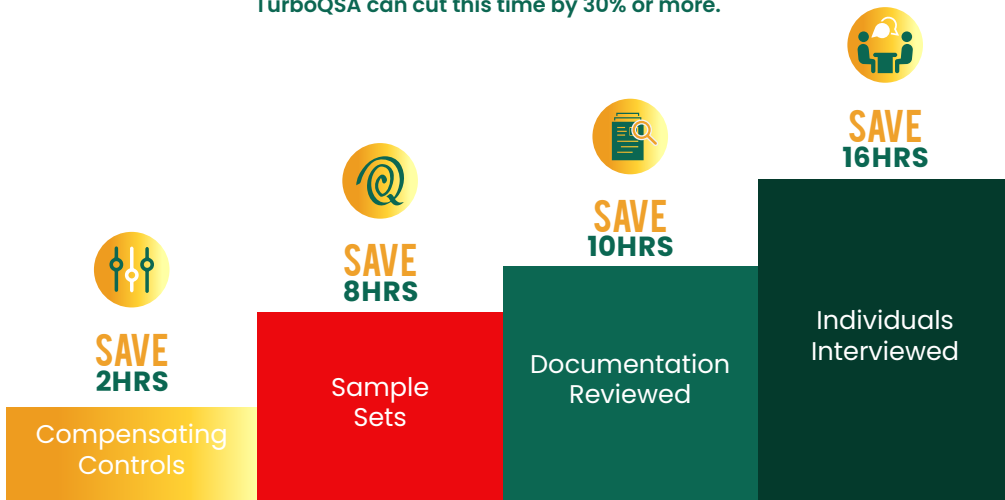

UP TO 40%

EFFORT REDUCTION ON PCI-DSS ASSESSMENTS

WORK SMART SAVE TIME

A typical PCI ROC Project takes a minimum of 160 hours. TurboQSA can cut this time by 30% or more.

QSAs can perform 40% more ROCs in 1 year with more accuracy and less stress. For example, instead of 10 ROCs per QSA per year, they can complete 14 assessments with higher quality.

- Better Client / QSA collaboration
- More consistent and accurate outcomes
- Sensible workflows for completing ROC assessments
- QSAs can conduct more assessment projects in a year with better organization and tracking
- Higher profit margins from improved productivity
