

Securely send, sign, and notarize critical agreements remotely

Notarization is a vital process for ensuring your critical documents are authentic and trustworthy. But let's face it—traditional notarizations can be a hassle. They're often in-person, paper-based, and time-consuming processes. This slows the pace of business, harms the signer experience, elevates the risk of identity fraud, and increases cost for the organization.

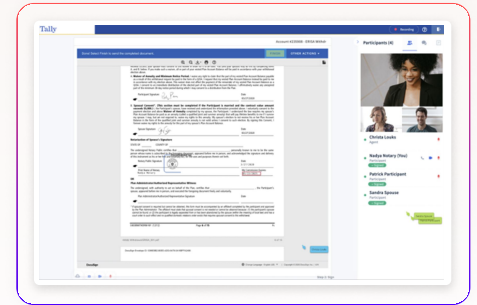

As part of our Intelligent Agreement Management portfolio, Docusign Notary and Notary Connect empower notaries public with secure, digital tools to conduct remote online notarizations.

Notary Connect is the trusted way to remotely and electronically notarize agreements anytime, from virtually anywhere. Built on the #1 e-signature solution, it makes sending, signing, and notarizing agreements remotely effortless.

- Close deals faster with 24/7 on-demand remote online notarization (RON), providing signers with round-the-clock access to a pool of trained notaries public
- Give your signers a convenient experience, allowing them to remotely sign and notarize agreements without being in the physical presence of a notary public
- Reduce the risk of identity fraud and increase confidence in signers' identities with secure verification technologies
- Access a robust audit trail with our tamper-evident Certificate of Completion, audio-visual recording, and electronic journal
- Empower nationwide notarization with interstate recognition for valid notarization acts across all 50 U.S. states

Have your own in-house notaries?

Notary empowers in-house notaries public with the digital tools they need to securely conduct RON transactions.

#1 e-signature solution

integration

Sign from virtually anywhere

Customer Success experts

“Now, members can get their documents notarized from the convenience of their home—without having to battle traffic or take time off work to travel.”

Business Analysis Manager
Neighborhood Credit Union

Do business more efficiently

Save time and money by digitizing your notarial processes, reducing errors, and accelerating the speed of business.

24/7 access to a pool of notaries

With Notary Connect, you can eliminate costs and effort required to manage your own notaries. Speed up agreement completion by delivering trusted notarization anytime, with a pool of on-demand notaries public.

Built on Docusign eSignature

Benefit from the same eSignature experience you know and trust. Send, sign, and manage all agreements in one place using your existing eSignature login.

Notary-specific fields

Drag and drop notary-specific fields (e.g. county of commission) to ensure proper document execution. The information is automatically pulled from the digital notarial seal, reducing the risk of errors.

Reusable templates

Easily create templates for frequently used agreements that need to be notarized. Save time, reduce errors, and automate processes for your commonly notarized agreements.

Integrate through APIs

Seamlessly integrate with the everyday tools and systems using Notary or Notary Connect APIs. Automate repeatable workflows, such as triggering a notarial session.

Flexible and convenient customer experience

Delight your customers with a convenient, intuitive experience that saves time and the hassles of meeting a notary public in person.

Do business anywhere

Conduct digital notarizations using interstate recognition for valid notarization acts across all 50 U.S. states using Notary Connect.

Multi-device support for multiple signers in a single session

Add up to four signers in a single remote notarial session, with the ability for each signer to sign from their own device. This saves time and reduces hassle for everyone involved.

Mitigate risk and reduce fraud

Conduct encrypted notarial sessions with a detailed audit trail. Use secure identity-proofing technologies to reduce the risk of fraud. Docusign's platform security for notarized documents meets (and often exceeds) state regulations on digital certificates and notarization security.

Identity-proofing technologies

Authenticate signers' identities with ID verification and knowledge-based authentication before they access an agreement, reducing the risk of identity fraud.

Robust audit trail

Access a detailed audio-visual audit trail for each notarial session with a tamper-evident Certificate of Completion.

Digital certificates

Maximize trust and identity assurance of notaries public with digital certificates that attach to each notarial transaction and render the document tamper-evident. Docusign-issued digital certificates simplify the onboarding process for notaries public and provide a higher bar for legitimate, trusted notarizations—with no additional cost.

Remotely notarize your most critical agreements, including:

Powers of attorney	Deeds
Spousal consents	Life and annuity claims
Affidavits	Acknowledgments
Trust certifications	Waivers
Lien releases

About Docusign

Docusign brings agreements to life. Over 1.5 million customers and more than a billion people in over 180 countries use Docusign solutions to accelerate the process of doing business and simplify people's lives. With intelligent agreement management, Docusign unleashes business-critical data that is trapped inside of documents. Until now, these were disconnected from business systems of record, costing businesses time, money, and opportunity. Using Docusign IAM, companies can create, commit, and manage agreements with solutions created by the #1 company in e-signature and contract lifecycle management (CLM).
