

PROHIBITION OF SALES TO UK RETAIL INVESTORS: The Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (as amended, the "EUWA"); (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (as amended, the "FSMA") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of UK domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 as it forms part of UK domestic law by virtue of the EUWA (as amended, the "**UK Prospectus Regulation**"). Consequently, no key information document required by Regulation (EU) No 1286/2014 as it forms part of UK domestic law by virtue of the EUWA (as amended, the "**UK PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to retail investors in the United Kingdom has been prepared and therefore offering or selling the Securities or otherwise making them available to any retail investor in the United Kingdom may be unlawful under the UK PRIIPs Regulation. Notwithstanding the above, if the Dealer subsequently prepares and publishes a key information document under the UK PRIIPs Regulation in respect of the Securities, then the prohibition on the offering, sale or otherwise making available the Securities to a retail investor in the United Kingdom as described above shall no longer apply.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

- At maturity, the Securities do not provide for the full scheduled payment of the face value of the Securities:** Depending on the performance of the Underlying, you may lose some or all (subject to a floor of 0.01 per cent. of the calculation amount) of your investment.
- Risks relating to certain features of the Securities:**
 - The ability to participate in any positive change in the value of the Underlying is limited, no matter how much the level, price or other value of the Underlying rises above the cap level over the life of the Securities. Accordingly, the value of or return on the Securities may be significantly less than if you had purchased the Underlying directly

<ul style="list-style-type: none"> • The coupon amount will only be paid if the reference level of the Underlying on the relevant coupon observation date either reaches or exceeds the coupon barrier level. If the reference level of the Underlying on the relevant coupon observation date does not reach or exceed the coupon barrier level, no coupon will be payable on the relevant coupon payment date. This means that the amount of coupon payable over the term of the Securities will vary and may be zero. The payment of coupon amount will be conditional on the value or performance of the Underlying. The coupon amount payable will be zero on a coupon payment date if the reference level of the Underlying on the relevant coupon observation date does not reach or exceed the coupon barrier level, although such payment will be deferred to the next coupon payment date. If the reference level of the Underlying on the relevant coupon observation date is equal to or greater than the coupon barrier level, the coupon payable will be an amount for the current coupon payment date plus any amounts deferred from previous coupon payment dates where coupon was not paid. Investors in the Securities will not be paid any coupon or other allowance for the deferred payments of coupon and it is possible that the Underlying never reaches or exceeds the coupon barrier level, meaning that investors will not receive any coupon at all for the lifetime of the Securities. • The final redemption amount is determined based on the performance of the Underlying on the Final Valuation Date only (rather than in respect of multiple periods throughout the term of the Securities), and therefore investors in the Securities will not benefit from any movement in level of the Underlying during the term of the Securities that is not reflected in the performance of the Underlying on the Final Valuation Date. • Risks relating to the Underlying: <ul style="list-style-type: none"> • Past performance of the Underlying is not indicative of future performance or the range of, or trends or fluctuations in, the level, price or other value of such Underlying that may occur in the future, and performance may be subject to unpredictable change over time. The Underlying may perform differently from the historical performance and you may not realise the returns which you expect to receive from investing in the Securities. • Investors will not have any legal or beneficial rights of ownership in the Underlying, and no claim against the index sponsor or any other third party in relation to the Underlying; such parties have no obligation to act in investors' interests. • The market value of and the return on the Securities depends on the performance of the Underlying and its component and other macroeconomic factors. The index sponsor (and the Issuer of the Securities) may be subject to regulatory changes regarding the publication and use of the Underlying during the life of the Securities which may negatively impact the performance of the Underlying. The Issuer and/or the Calculation Agent may adjust the terms of the Securities in respect of the Underlying referenced in order to comply with statutory requirements and such adjustments may affect the value of and return on the Securities and may even result in the early redemption of the Securities (the early redemption amount of which may be less than the initial investment amount or zero). The performance of the Underlying is calculated by the reference source by reinvesting all dividends paid by the constituent component of the Underlying and reducing the resulting performance of the Underlying by the pre-defined dividends. If the actual dividends paid by the constituent component of the Underlying are lower (respectively higher) than the pre-defined dividends, the performance of the Underlying will be penalised (respectively improved) compared to the corresponding "price return" index. In addition, the pre-defined dividends are a fixed number independent of the level of the constituent component of the Underlying and therefore will increasingly penalise the performance of the underlying in a falling equities market. • No or limited liquidity: The Securities may have no liquidity or the market for such Securities may be limited and this may adversely impact their value or your ability to dispose of them. • Secondary market value: The market value of the Securities prior to maturity may be significantly lower than their original purchase price. Consequently, if you sell your Securities before their scheduled maturity (assuming you are able to), you may lose some of your original investment. • Early redemption: The Securities may be redeemed prior to their scheduled maturity in certain extraordinary circumstances and in such case, the early redemption amount paid to investors may be less than their original investment. In such case, you may only be able to reinvest the proceeds on less favourable market terms compared to when the Securities were purchased.
