Early redemption
See "Taxation" and "Events of Default" in Element C.8 above for information on early redemption in relation to the Notes.
In addition, if the Issuer determines that performance of its obligations under the Notes or that any arrangements made to hedge its obligations under the Notes has or will become illegal in whole or in part as a result of compliance with any applicable present or future law (an " illegality "), the Issuer may redeem the Notes early and, if and to the extent permitted by applicable law, will pay an amount equal to the early redemption amount in respect of each calculation amount.

The maturity date is [●].
The "Final Redemption Amount" is $[par/[\bullet]\%$ of the aggregate principal amount].

The terms and conditions of the Notes contain provisions, as applicable, relating to events affecting the Reference Item, modification or cessation of the Reference Item and provisions relating to subsequent corrections of the level of the Reference Item and details of the consequences of such events. Such provisions may permit the Issuer either to require the calculation agent to determine a substitute level for the Reference Item by reference to the terms of a reference bond or by reference to the most recently published level of the Reference Item or to cancel the Notes and to pay an amount equal to the early redemption amounts as specified above.]

The terms and conditions of the Notes contain provisions, as applicable, relating to events affecting the Reference Item(s), modification or cessation of the Reference Item(s) and market disruption provisions and provisions relating to subsequent corrections of the level of the Reference Item(s) and details of the consequences of such events. Such provisions may permit the Issuer either to require the calculation agent to determine what adjustments should be made following the occurrence of the relevant event (which may include deferment of any required valuation or payment or the substitution of a substitute reference item) or to cancel the Notes and to pay an amount equal to the early redemption amount as specified above.]

Section D– Risks

Element	Title	
D.2	Key risks specific to the Issuer	In purchasing Notes, investors assume the risk that the Issuer may become insolvent or otherwise be unable to make all payments due in respect of the Notes. There is a wide range of factors which individually or together could result in the Issuer becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which

factors are most likely to occur, as the Issuer may not be aware of all relevant factors and certain factors which it currently deems not to be material may become material as a result of the occurrence of events outside the Issuer's control. The Issuer has identified in the Base Prospectus a number of factors which could materially adversely affect its business and ability to make payments due under the Notes. These factors include:
• the Group is exposed to a number of risks, the categories of which are credit risk, market risk, liquidity risk, operational risk, litigation and regulatory risk, insurance risk, pension risk and business risk;
• regulatory changes could materially affect the Issuer's business;
• the Issuer faces increased capital and liquidity requirements as a result of the Basel III Framework;
• the implementation of a bank recovery and resolution directive or the taking any action under it could materially affect the value of any Notes;
• the Group may have to pay additional amounts under deposit guarantee schemes or resolution funds; and
• the Group may be affected by general economic and geopolitical conditions.

D.[3/6] (D.3 applicable for Annexes V and XIII) (D.6 applicable for Annex XII)	Key information on key risks specific to the Notes	The Issuer believes that the factors summarised below represent the principal risks inherent in investing in the Notes, but the Issuer may be unable to pay amounts on or in connection with any Notes for other reasons which may not be considered significant risks by the Issuer based on information currently available to it and which it may not currently be able to anticipate.
		[Notes may involve a high degree of risk. There are certain factors which are material for the purpose of assessing the market risks associated with investing in the Notes, which include, without limitation, the following: an active secondary market in respect of the Notes may never be established or may illiquid and this would adversely affect the value at which an investor could sell its Notes, if an investor holds Notes which are not denominated in the investor's home currency, it will be exposed to movements in exchange rates adversely affecting the value of its holding and the imposition of exchange controls could result in an investor not receiving payment on those Notes, the market value of the Notes will be affected by a number of factors independent of the creditworthiness of the Issuer, credit ratings assigned to the Issuer may not reflect all the risks associated with an investment in the Notes, the Notes may not be a suitable investment for all investors, [because the global Notes are held by or on behalf of Euroclear Bank S.A./N.V. and Clearstream Banking S.A., investors will have to rely on the clearing system procedures for transfer, payment and communication with the Issuer/because the VP Systems Notes are dematerialised securities, investors will have to rely on the clearing system procedures for transfer, payment and communication with the
