

# Crystal Turf<sup>®</sup>

Crystal Turf<sup>®</sup> is a high-quality potassium chloride product consisting of natural crystals. It is produced by a unique heavy media process that leaves Muriate of Potash (MOP) crystals in their natural state. It is an excellent blending-grade turf, lawn and garden MOP product and the ideal source for all potash fertilization needs.

## Benefits:

- High-quality crystals have a guaranteed analysis of 60 percent K<sub>2</sub>O
- Crystals are light in color with a glass-like appearance
- Crystals have a long storage life
- Crystals are less prone to bin set
- Crystal SGN was made specifically for turf, lawn and garden industries
- Screening process increases crystal uniformity
- Consistent supply from one of the world's leading producers and marketers of concentrated phosphate and potash
- Available via bulk railcar

## CHEMICAL COMPOSITION

Component	Typical (%)
Potassium Oxide Equivalent (K <sub>2</sub> O)	61.2
Potassium Chloride (KCl)	96.9
Sodium Chloride (NaCl)	2.45
Chloride (Cl)	47.6

## SIZING CHARACTERISTICS\*

Sizing Guide Number	220
Uniformity Index	55

\*Product analyses are typical as tested at minesite. Handling and transportation may affect the analysis of the delivered product.
