

Patrick Reynolds, PhD is the National Security Innovation Network's (NSIN) University Program Director for Georgia Tech. NSIN's mission is to build networks of innovators that generate new solutions to national security problems. Patrick scouts the Atlanta ecosystem to find and connect top university talent, technologies, and startups with Department of Defense leadership and resources to solve big problems and challenges. He spent the prior ten years commercializing university technologies (medical devices, therapeutics, diagnostics, software) at Emory University's Office of Technology Transfer (Assistant Director) and the University of Tennessee Research Foundation (Licensing Associate), in addition to serving as Director of Business Development for a music tech startup company (Street Jelly Media). Patrick obtained his PhD from the University of North Carolina at Chapel Hill (cancer biology) and received his BA from the University of Colorado-Boulder (molecular and cellular biology). He serves on the Public Policy Advisory Committee for AUTM. Patrick fills his spare time with writing music and performing as a musician around town.
