

Quickly build key features for on-demand transport and delivery services

BENEFITS

From ride sharing to food delivery apps and beyond, PubNub enables you to optimize dispatch and delivery with real-time proximity matching, location tracking, chat, time-sensitive alerts/notifications, and live dashboards.

Keep business running smoothly between dispatch, drivers, and customers through in-app alerts or SMS triggered by orders, locations, and events

Keep drivers and customers informed by leveraging location data for visual tracking on maps or for provisioning with drivers through real-time maps

Streamline communications between driver-customer or dispatch-driver through in-app chat to reduce customer support costs and enhance user experience

WHY PUBNUB?

Our robust APIs allow you to implement real-time functionality fast.

- 50+ SDKs
- <100ms latency
- 99.999% uptime SLA
- 65+ pre-built integrations
- ISO 27001, SOC 2 Type II, GDPR, and HIPAA compliant
- 24x7 technical support
- Free for POC development
- Global replicated PoPs
- Architecture reviews
- Supports millions of concurrent users

FEATURES

- Time-critical alerts
- In-app chat
- Geo-triggered events & location tracking
- Data streaming
- Presence & state detection
- Mobile push notifications
- Access controls
- Enterprise-grade security & compliance

PubNub is the driving force in our mobile app. If we turned off PubNub right now, carriers would not be able to use our app to service shipments on a daily basis.
