PubNub

FOR GEOLOCATION & DISPATCH

Delivery, provisioning, and customer support for your geolocation and dispatch services.

BENEFITS

PubNub's geolocation APIs can be used to track your fleets of cars, check on your deliveries, provision orders, or even for matchmaking in dating apps.

Map real-time location of any asset.

Provision or match based on location.

Optimize routes by enhancing geolocation with third-party data.

FEATURES

- Time-critical alerts
- In-app chat
- Geo-triggered events & location tracking
- Data streaming
- Presence & state detection
- Mobile Push Notifications
- Access Controls
- Enterprise-grade security & compliance

WHY PUBNUB?

Our robust APIs allow you to implement real-time functionality fast.

- 50+ SDKs
- <100ms latency
- 99.999% uptime SLA
- 65+ pre-built integrations
- ISO 27001, SOC 2 Type II, GDPR, and HIPAA compliant

- 24x7 technical support
- Free for POC development
- Global replicated PoPs
- Architecture reviews
- Supports millions of concurrent users

"

PubNub is the driving force in our mobile app. If we turned off PubNub right now, carriers would not be able to use our app to service shipments on a daily basis.
