

# PubNub

## Powering real-time user experiences

### A Platform for Real-Time Interactivity

PubNub delivers a platform for building and operating real-time interactive apps for mobile, web, and IoT devices that are lightning fast, reliable, and scalable. Whether you are looking to add chat, notifications, streaming, user/app synchronization, or even edge messaging, we help bring it to life easily, securely, and seamlessly. Over 2000 companies worldwide choose PubNub because of our real-time technology expertise along with our ability to help their customers feel more connected to one another, the brand, and product experience.

### PubNub Use Cases:

- Chat
- Live Audience Engagement
- Multi-User Collaboration
- IoT Device Control
- Data Streaming
- Geolocation & Dispatch
- and more

### The Advantages of Building with PubNub

#### Flexibility

PubNub offers SDK support for over 50+ mobile, web, server, and IoT environments and over 65 pre-built integrations with external and 3rd party APIs.

#### Scale & Reliability

PubNub has no concurrency or channel limits and powers thousands of apps and millions of people across the globe every day.

#### Security & Compliance

PubNub offers enterprise grade security and is compliant with the most stringent regulations around the world, so you always have peace of mind.

#### Support

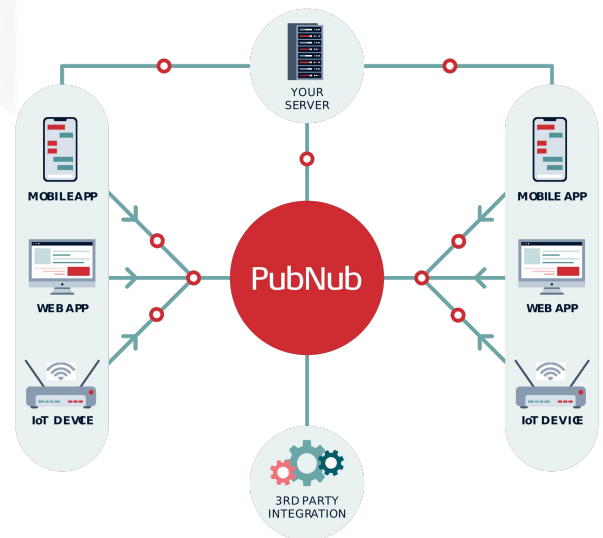

PubNub is here for you from design through testing, launch, and post launch. We offer 24/7 support across the globe, operational dashboards, and a dedicated solutions architect team.

# PubNub

## About Our Platform

Our platform delivers a suite of purpose-built real-time APIs, SDKs, Solution Kits, and integrations. The foundation of our platform is the industry's largest and most scalable real-time edge messaging network.

With over 15 points-of-presence worldwide supporting 800 million monthly active users, and 99.999% reliability, you'll never have to worry about outages, concurrency limits, or any latency issues caused by traffic spikes.

## PubNub Benefits

- ✓ Launch faster
- ✓ Increase retention, monetization, and engagement
- ✓ Keep users in your app
- ✓ Securely capture and retain user data
- ✓ Customized real-time features

“

*PubNub is reliable. It's efficient. It's fast. It's everything we were looking for. In the EMS/911 space, efficiency is key because how quickly the first responders and public safety agencies respond determines life or death. PubNub has all of that.*

**Jason Brock**  
Director of Software Development at Zoll

## Why PubNub?

Our robust APIs allow you to implement real-time functionality fast.

- 50+ SDKs
- <100ms latency
- 99.999% uptime SLA
- 24x7 technical support
- ISO 27001, SOC 2 Type II, GDPR, and HIPAA compliant
- 65+ pre-built integrations
- Global replicated PoPs
- Free for POC development
- Architecture reviews
- Supports millions of concurrent users

## About PubNub

PubNub is transforming how people live, work and play within virtual environments. Our platform enables teams to build and operate real-time interactivity for mobile, web, and IoT. PubNub powers thousands of apps and millions of people across the globe every day. Founded in 2010, over 2000 companies worldwide choose PubNub because we deliver a comprehensive set of core building blocks to easily build amazing live experiences that are secure, scalable, and reliable.
