

Quickly deliver high-quality patient experiences and care with real-time HIPAA-compliant features

BENEFITS

PubNub allows you to create high-quality digital health experiences that result in happier staff, healthier patients, and more profitable organizations. From telehealth platforms to EHR solutions, remote patient monitoring, and medical transportation, PubNub helps improve care, patient communication and clinical collaboration. PubNub can also be used to quickly build connected fitness experiences that engage and motivate participants.

Streamline patient communication with HIPAA-compliant chat and push notifications

Provide top-notch telehealth experience with virtual waiting rooms and sensor data streaming

Boost medical staff productivity with real-time updates and multi-user collaboration
