PubNub

FOR ENTERPRISE SOFTWARE

Quickly add real-time features that streamline communication and boost productivity

BENEFITS

PubNub enables you to quickly integrate real-time interactivity into your enterprise applications, regardless of scale. With PubNub, you will drive more efficient communication and collaboration for your users without using valuable engineering time, ultimately leading to increased business value and stickiness of your product.

Streamline communication with direct & group chat, in-app alerts, and push notifications

Increase productivity with multi-user collaboration tools

Build data-driven experiences with PubNub's real-time data streaming

FEATURES

- Direct & group chat
- Data streaming
- Time-critical alerts/reminders
- Push notifications
- Virtual canvas & whiteboards
- Presence & state detection
- Live dashboards
- Triggering chatbots
- Orchestrating voice/video calls

> With PubNub, we know that we get a quality, robust solution and a mature platform that solves all of our problems.

**Mark Waldron
Senior Engineering Manage
at Kustomer**
