

## Device control and monitoring made simple

### BENEFITS

PubNub enables you to quickly integrate real-time connectivity into your backend, mobile apps, and IoT devices that is fast, secure, and reliable. From smart home to consumer electronics, IT & telecom, agriculture, manufacturing, security systems, smart city, and more, PubNub will save your development time and accelerate your time to market.

Create remote access to in-home sensors: thermostats, entertainment systems, door locks, and more

Manage your industrial systems: sprinklers, climate monitoring, buildings, cities, and anything that you want connected.

Publish data on what is happening in real time for logistics and transportation.

### WHY PUBNUB?

Our robust APIs allow you to implement real-time functionality fast.

- 50+ SDKs
- <100ms latency
- 99.999% uptime SLA
- 65+ pre-built integrations
- ISO 27001, SOC 2 Type II, GDPR, and HIPAA compliant
- 24x7 technical support
- Free for POC development
- Global replicated PoPs
- Architecture reviews
- Supports millions of concurrent users

### FEATURES

- Device provisioning
- Streaming of smart sensor data
- Control commands
- Presence & state detection
- Real-time logs
- Live stats & dashboards
- Data-triggered alerts
- Mobile push notifications

“

*The actual implementation of PubNub's network was incredibly easy. It was up and working the first day. I would have had to hire several more developers and spend weeks or months to get the functionality, scalability, and security we have with PubNub.*

**Isaac Martin**  
CTO  
at Dwelo

### TRUSTED BY LEADING COMPANIES ACROSS THE GLOBE

Over 2000 companies worldwide choose PubNub because we provide a comprehensive set of core building blocks to easily create interactive and connected experiences that are secure, scalable, and reliable. Looking to learn more about building with PubNub? [Get in touch with our team.](#)
