Re.volt to Revolutionize Czech Vehicle Sharing with Straal Payments On Board

- [Re.volt](#) – a new vehicle sharing company from Prague – selects [Straal](#) for the exclusive provider of payment, optimization and fraud prevention solutions.
- Re.volt users can now pay for their rides by credit and debit cards of all major organisations, while the system administrator keeps full control over the company's financial condition.
- Re.volt is yet another Mobility-as-a-Service (MaaS) company in the CEE region leveraging Straal solutions to monetize its business with maximum effectiveness.
- The newly-signed contract aligns with Straal's long-term strategy aimed at becoming the first-tier provider of payment solutions for MaaS operators in Europe.

[Re.volt](#) – a new vehicle sharing brand from Czechia – has established cooperation with [Straal](#) – an international provider of payment, optimization and fraud prevention solutions. Thanks to Straal, Re.volt users can pay for their rides automatically and securely, using credit and debit cards of all major organizations. The partnership includes providing Re.volt with a smart card-on-file payment gateway, a set of proprietary optimization and fraud prevention algorithms, and access to Straal Kompas – a powerful and intuitive management panel.

The suite of solutions crafted for Re.volt combines friction-free payment experience with top-grade transaction security and maximum effectiveness of payment collecting.

Founded in 2017, Re.volt seeks to revolutionize the Czech Mobility-as-a-Service market with a fleet of compact, environmentally-friendly and affordable shared vehicles. Their network of electric cars and motorcycles is meant to make moving across Prague easier, faster, and emission-free.

While making the crucial decision of choosing our PSP, we had to keep in mind the uniqueness of the MaaS market. Vehicle sharing is based upon mobile technology and truly frictionless user experience – says Pavel Kuchta, CEO, Re.volt. We have chosen Straal due to their rich experience in the Mobility-as-a-Service sector and well-established presence on the CEE market. Another deciding factor lies in the product itself: it gives us full control over our transactions – adds Mr. Kuchta.

Cooperating with companies such as Re.volt plays an important role in Straal's development strategy.

*Mobility-as-a-Service is among the pillars of the modern-day digital economy. Our mission is to provide digital innovators with monetization solutions that meet their future-oriented paradigm, both technology and philosophy-wise – explains **Michał Jędraszak, CEO, Straal**. We are thrilled to have Re.volt among our clients. I firmly believe that this cooperation will be mutually fruitful. Our goal is to become the first-tier payment service provider for European MaaS companies, and this contract is an important step towards it – adds **Mr. Jędraszak**.*

In 2018, Straal announced a partnership with blinke.city – a Poland-headquartered network of shared electric mopeds and scooters, operating on seven European markets. In May 2019, the PSP announced a partnership with Quick – a Polish operator of electric kick scooters, active in Tricity.

Straal is an international provider of payment, optimization and fraud prevention solutions for future-minded businesses. The company offers a comprehensive suite of products that make accepting digital payments easier, as well as more effective and secure. Straal enables accepting one-off and recurring payments carried out by customers with credit and debit cards of all major organizations, initiating SEPA Direct Debit cycles and more. Thanks to Straal, customers can pay in currencies of their choice (over 150 options), using their preferred desktop and mobile platforms, while merchants can effectively maximise their transaction approval rate and mitigate risk. Founded in 2017, the company is headquartered in Warsaw, Poland. www.straal.com
