

INFINITY U

A LIMITLESS YOU STARTS HERE.

Infinity University connects interns to meaningful work to solve real world problems with **Innovators. Entrepreneurs. Creators.®**

Solve tomorrow's problems today

Learn • Grow • Connect

Work alongside experienced engineers, technical leaders, and fellow interns while building relationships that extend beyond your internship.

Build your Skills

Gain hands-on experience with innovative technologies while contributing to real technical challenges. You'll contribute as an active member of the team—never watching from the sidelines.

Build your Confidence

Develop the skills that will help you stand out – from technical briefings and military terminology to communicating complex ideas with clarity.

Build your Future

Gain experience, make an impact, and explore a career in national defense. High-performing interns may have opportunities to continue their careers with Infinity Labs.

Capabilities to Explore

Software Development • Modeling & Simulation • Operations Research • Cyber-Physical Exploitation • Critical Infrastructure Cybersecurity

A culture that transforms

Real Work • Real Challenges • Real Mission

Our culture revolves around what's best for humans in the loop. Infinity Labs brings together talented people who want to build meaningful technology, advance important missions, and make an impact.

We seek those with the curiosity to investigate new ideas, the drive to create, and the determination to make what comes next better than what came before.

Our Core Values

Adapt Fearlessly

Embrace continuous learning and growth through shared experiences to address dynamic challenges

Forge Possibilities

Approach problems with the assumption that a solution exists, but the path to achieving it may be unorthodox or unintuitive

Thrive Together

Cultivate collaboration and active engagement to win inside and outside the company
