

PGE 2026 Drive Change Fund Grant Recipients

Ant Farm Youth Services

AntFarm Youth Services serves rural and semi-rural communities across Clackamas County, with primary service locations in the cities of Sandy, Estacada and Molalla. AntFarm offers a wide range of programs including: Youth Hubs, Community Work Program, YouthCore, Community Wildfire Defense Program and Construction and Career Pathway Programs. Their Drive Change Fund project will allow them to install a publicly accessible charger and deploy one electric SUV to transport clients to services and programming.

Catholic Community Services Foundation

Catholic Community Services Foundation is a nonprofit organization that supports underserved communities with affordable housing, financial support and more programs. Their DCF project is for public and private chargers and an electric refrigerated box truck that will be used to support CCSF's services including community-based outpatient mental health, family shelter, food pantry, supportive housing, disability services, affordable housing and independent living for foster youth and crisis respite.

City of Gresham

City of Gresham, located in Multnomah County, is the second most populous city in the county and significant urban center in Oregon. Through their DCF project they will purchase EVs and install Level 2 chargers to support the City's homeless service outreach team and fire station staff members for critical services.

City of Wilsonville

City of Wilsonville is located in Clackamas and Washington counties. Their DCF project includes the purchase and acquisition of an electric transit bus to be utilized by the City's SMART public transit service.

Clackamas County

Clackamas County is Oregon's third-most populous county. The County's Social Services Division will purchase one electric ADA-accessible transit van for use with the Transportation Reaching People Program which provides rides to seniors and individuals with disabilities countywide to medical appointments and other essential life services.

Depave

Depave is a nonprofit organization that empowers underserved communities to remove underutilized pavement, replacing it with living, permeable design. Their DCF project is for the purchase and acquisition of one electric truck that will be used to transport tools and landscaping materials and assist in staff site visits. This truck will support Depave's focus on pavement-plagued

settings, and their work is often completed at schools and community hubs that serve Black, Indigenous and people of color, immigrant and other underserved communities.

Eloheh/Eagle's Wings

Eloheh Indigenous Center for Earth Justice focuses on developing, implementing and teaching sustainable and regenerative earth practices while teaching people to live in harmony with the whole community of creation. Eloheh seeks to be a model of regenerative agricultural, animal husbandry and wild-tending systems that support human needs while improving the earth and all creation inhabiting the web of life. DCF will support the purchase of one electric utility task vehicle for their daily operations as well as transporting elderly and limited-mobility visitors.

Emerging Unidos

Emerging Unidos is a nonprofit organization based in Portland, Oregon, that serves youth, young adults and farm workers. Its mission is to empower these individuals through various programs, including professional development, life skill building, mentoring and resource connections. The organization focuses on providing culturally sustaining support and resources, such as clothing, hygiene products and educational opportunities, particularly for underserved and marginalized communities. Their DCF project includes the acquisition of two EVs to support rural farmworker communities through delivery of tangible necessities and transportation support.

EVmath

EVmath is a nonprofit organization focused on promoting electric vehicle adoption, particularly in rural areas of Oregon. It aims to help rural drivers understand the financial benefits of switching to EVs, emphasizing cost savings and reducing reliance on gasoline. The initiative is backed by Portland General Electric and other regional partners, and it provides resources and calculators to assist drivers in estimating their savings from using EVs. Their DCF project will be an education campaign focused on increasing used EV adoption.

Feed'em Freedom Foundation

Feed'em Freedom is a nonprofit organization based in Oregon that focuses on food security and land stewardship. It aims to empower Black agriculturists and support the BIPOC communities by providing access to land, resources and education. The organization works to create resilient food systems, reduce food waste and promote sustainable agricultural practices. Additionally, Feed'em Freedom offers food distribution services and educational programs to help families grow their own food and improve food security. Their project includes adding an electric truck and delivery vans to the Feed'em Freedom fleet to facilitate the movement of food and other goods between farming locations. Vehicles will also be available for testing with a bidirectional charger installed on site.

Growing Gardens

Growing Gardens is a nonprofit that supports low income and BIPOC individuals in neighborhoods experiencing food insecurity and lack of access to fresh and culturally preferred foods. Their DCF project includes the installation of chargers and purchase of three electric vehicles to transport staff

and materials to continue their horticultural education, backyard garden program and other workforce development surrounding horticulture for four correctional facilities in central Oregon.

Habitat For Humanity Portland Region

Habitat for Humanity is a nonprofit organization that helps families build strength, stability and independence through affordable homeownership. Through DCF they will purchase one electric forklift and three electric pallet jacks for use in Habitat for Humanity ReStores within PGE's service area.

Just Compassion

Just Compassion is a nonprofit organization based in Oregon that provides support to individuals experiencing homelessness. The organization is a coalition of various service, civic and business organizations, aiming to create a safe and hospitable environment for those without homes. Just Compassion also focuses on eviction prevention and offers a range of services, including case management and community support. Their project consists of acquiring an electric passenger van and two chargers for providing services to the unhoused community.

Latino Network

Latino Network is a nonprofit organization that provides culturally specific education that lifts their youth and families to reach their full potential through programs and services. Their DCF project includes an electric vehicle and chargers at their new La Plaza Esperanza community center and preschool in the Rockwood neighborhood. The electric vehicle will support the onsite preschool students, provide educational services and other culturally specific wraparound services for the historically underserved communities. Their project includes the acquisition of an electric passenger van and a pilot e-bike program.

Loco Por La Aventura

Loco Por La Aventura is a nonprofit organization aimed at making outdoor activities more accessible to the Latino community and beyond. The organization aims to inspire the Latino Community to embrace outdoor activities equitably. Their initiative focuses on outdoor education, providing opportunities for camping, mountaineering and rafting, while fostering a sense of community and connection with nature. Their DCF project includes the purchase and acquisition of an EV to help meet growing service demand in underserved Latino communities.

LoveOne

LoveOne is a nonprofit community-based organization based in Clackamas County, Oregon. It is dedicated to serving neighbors in need by providing essential services such as clean laundry, showers, meals, personal care resources and community connections. Their project includes the installation of charging infrastructure and acquisition of three EVs to facilitate medical, mental health, food assistance, substance use treatment and court obligations for program participants.

MetroEast Community Media

MetroEast uses media to invigorate civic engagement, inspire diverse voices and strengthen community life in Gresham, Oregon. MetroEast is committed to addressing the inequity caused by systemic oppression, regardless of a person's race, ethnicity, faith, culture, language, disability, gender identity, sexual orientation, age, socioeconomic status, veteran or family status. DCF will support the purchase of an electric vehicle for a Mobile Media Lab which travels into communities to provide media education to youth and adults.

Neighborhood Health Center

Neighborhood Health Center is a nonprofit organization located in Canby, Oregon. NHC offers medical, dental, pharmacy, reproductive and behavioral health services. For their DCF project, Neighborhood Health Center will purchase and acquire two EVs to expand the organization's Community Dental Program.

Northwest Housing Alternatives

Northwest Housing Alternatives is a nonprofit organization dedicated to creating stable, affordable housing and offering social services to residents in Oregon. NHA's mission emphasizes housing for those most in need, including low-income families, seniors, people with special needs and homeless families with children. Beyond housing, NHA provides resident services such as educational programs, after-school initiatives and connections to community resources to ensure long-term stability. Their DCF project includes purchasing EVs to help meet critical food and supply needs of individuals facing housing insecurity.

Oaks Park Association

The Oaks Park Association is a nonprofit organization that operates Oaks Amusement Park in Portland, Oregon. Established in 1985, the OPA's mission is to preserve and perpetuate the historic amusement park as a family-friendly destination. The OPA also manages the park's real estate and maintenance, promoting its historical significance and community engagement. OPA will replace its propane train with an electric model with in-station train charging infrastructure and education displays.

Oregon Environmental Council

The Oregon Environmental Council is a statewide environmental policy nonprofit that pushes for solutions to Oregon's environmental problems. Their DCF project is for the purchase of four e-bikes for use by staff and to host e-bike trainings and test rides in underserved communities.

Oregon Humane Society

The Oregon Humane Society in Portland is a nonprofit organization dedicated to promoting the human-animal bond through various programs, including adoption, veterinary care, education and humane law enforcement. The organization will leverage DCF to purchase EVs and dual-port fleet charging stations for service delivery.

Oregon Rohingya Myanmar Muslim Society

The Oregon Rohingya Myanmar Muslim Society is a community-based nonprofit organization serving Rohingya, Myanmar, immigrant and refugee families across Oregon. ORMMS focuses on strengthening families through culturally grounded programs, youth leadership development, language access support, food distribution and community empowerment. Their project includes the purchase and acquisition of EVs and chargers to support food distribution, youth programs and services for low-income refugees, immigrants and families.

PDX Saints Love

PDX Saints Love is a nonprofit organization based in Portland, Oregon. The organization focuses on addressing social determinants of health, particularly in underserved neighborhoods, and aims to support individuals experiencing homelessness, substance use disorders and other challenges. They provide services such as food assistance, housing support and community events to foster connections and restore wellness in the community. Through DCF they will purchase an electric delivery van to support the meals program by transporting ingredients, food supplies and prepared meals to partner agencies and community events.

Portland Farmers Market

The Portland Farmer's Market is a year-round outdoor market located at Portland State University. It features up to 100 vendors selling a variety of fresh produce, meats, dairy, baked goods, and more, making it a popular destination for locals and visitors alike. They will purchase EVs for site operations and food recovery and redistribution to support underserved communities.

Portland YouthBuilders

Portland YouthBuilders is an organization dedicated to helping low-income young people aged 17-24 change their lives through a combination of education, vocational training, counseling and long-term support. PYB also provides comprehensive support, including job readiness training, career development and long-term job placement assistance. Their project includes acquisition of two electric passenger vans and installation of Level 2 chargers.

Potluck in the Park

Potluck in the Park is a community service organization that aims to nourish and enrich the lives of individuals in need by offering nutritious food and fostering social connections. The organization operates through volunteer efforts, serving approximately 300-400 guests each Sunday. Their DCF project includes the purchase of an electric van to support critical food recovery and weekly meal service.

Project Homeless Connect Washington County

Project Homeless Connect in Washington County aims to empower individuals experiencing homelessness by providing various services and housing assistance programs. They offer short-, medium- and long-term housing assistance, along with one-on-one case management to help individuals on their journey toward stability and self-reliance. Their project includes acquisition of

EVs and chargers to support PHC's outreach and client service efforts by facilitating street outreach to unhoused individuals.

Schoolhouse Supplies

Schoolhouse Supplies in Portland is a nonprofit organization dedicated to promoting educational equity by providing free school supplies to under-resourced students in local public schools. The organization aims to ensure that every child has access to the necessary tools for academic success, regardless of their family's income or background. They will be purchasing an electric walkie stacker and pallet jack to support distribution of free school supplies.

Silverton Fire District

The Silverton Fire District is a dedicated fire protection service provider located in Silverton, Oregon. The district focuses on ensuring public safety through services such as fire suppression, emergency medical response and fire prevention education. Through DCF they will purchase an EV that will be dedicated to their Community Risk Reduction programs across rural areas.

Snowcap Community Services

SnowCap Community Services is a philanthropic organization serving families facing hunger and hardship in East Multnomah County, Oregon. SnowCap aims to meet the basic needs of low-income families, individuals with disabilities, immigrants and refugees by distributing food, clothing and other essential items to those in need. The organization operates a food pantry, clothing program and community garden, among other services, to support its mission of offering hope and dignity for the community. Their project includes the acquisition of an EV and charger to support food recovery, distribution and community support services in eastern Multnomah County.

SOLVE

SOLVE is a nonprofit organization that restores and preserves Oregon's environment through litter cleanups. Their project includes acquisition of an EV and charger installation for an environmental stewardship program. This electric vehicle will help serve unhoused and low-income areas, waterways, greenspaces and neighborhoods in a more sustainable way.

The Clackamas Bookshelf

The Clackamas Bookshelf is a nonprofit organization that provides free books to low-income children in Clackamas County. The organization has distributed over 239,000 books to underserved children, emphasizing the long-term benefits of reading for children's education and success. Their DCF project includes the procurement of an electric Bookmobile for free book deliveries to students primarily from communities experiencing lower incomes.

The Nature Conservancy

The Nature Conservancy is a global nonprofit environmental organization. Its mission is to address the climate and biodiversity crises by conserving critical habitats, restoring ecosystems and supporting sustainable practices in collaboration with local communities, scientists and

policymakers. Their project will support the acquisition of one EV to help the organization expand access to community outreach events.

The Oregon Garden

The Oregon Garden is a large botanical garden spanning over 130 acres, located in Silverton, Oregon, showcasing the diverse plant life of the Willamette Valley and the Pacific Northwest. The garden also includes a working tree farm and the Gordon House, a Frank Lloyd Wright-designed home open to the public. Their project will support the transition of a substantial portion of the organization's landscaping equipment from gas-powered to electric and will educate visitors about the project.

The Street Trust

The Street Trust is a nonprofit that advocates for multimodal transportation centered around safety, accessibility, equity and climate justice. They provide marginalized community members first access to low carbon, affordable and effective tools for personal mobility. Their DCF project will support the purchase and acquisition of 25 e-bikes for community mobility access.

Virginia Garcia Memorial Foundation

The Virginia Garcia Memorial Foundation is dedicated to providing enduring support for the Virginia Garcia Memorial Health Center. Its mission focuses on funding, community relations and cultivating partnerships to enhance health care services in Washington and Yamhill counties. The foundation aims to deliver high-quality, comprehensive and culturally appropriate primary health care, particularly emphasizing care for migrant and seasonal farmworkers and those with barriers to receiving care. Their project includes the purchase of EVs and charging infrastructure at two sites to support mobile health programs.

Volunteers of America Oregon

Volunteers of America Oregon is an affiliate of the larger Volunteers of America nonprofit, specializing in family safety, substance use, behavioral health and reentry from the criminal justice system. Their project includes the acquisition of two EVs to support year-round community monitoring program services for justice-involved youth in Clackamas and Multnomah Counties.
