

814 Rescind Request Sample
(Based on v5.0 of the 814 EDI Standard, dated 1-1-09)

Data	Description
ST*814*000000001!	Header segment identifying the transaction set and control number.
BGN*13*0001*20020329!	Beginning segment identifying this as request #0001 created on 3/29/02.
N1*8S*Portland General Electric*9*0079090540000!	Identifies the Utility and its DUNS+4 number.
N1*RS*XYZ SCHEDULER*9*1067891230001!	Identifies the Scheduler and its DUNS+4 number.
N1*SJ*ABC SERVICE SUPPLIER*9*8723697020002!	Identifies the ESS and its DUNS+4 number.
LIN*01*SH*EL*SH*CC!	Identification segment indicating that this transaction involves a change to a request for enrollment of an electric service.
ASI*7*002!	Action or status indicator segment that identifies this as a rescind request.
REF*12*0007555500!	Specifies the PGE-assigned Customer account number. The account number is a 10-digit number. Leading zeroes must be used to format the account number.
REF*11*ESS9999!	Specifies the ESS-assigned Customer account number. The ESS account number can contain formatting characters like dashes if so desired by the ESS. The ESS account number will be returned in the format in which it is sent. PGE will send the REF11 on all information exchanges with the ESS.
DTM*007*20020330!	Specifies the requested effective date for the rescind.
NM1*MQ*2*****91*1732468759!	Specifies the SPID for the service whose enrollment is being rescinded.
REF*MG*AB12345678!	Meter ID is the concatenation of the meter manufacturer code and meter serial number.
NM1*MQ*1*Customer Name!	Identifies Customer name.
N3*1000 JOE CORP WAY!	Identifies Customer address.
N4*MEDFORD*OR*76542!	Identifies Customer address (extended information).
SE*16*000000001!	Ending transaction segment identifying the number of segments and the control number.

This EDI sample is based upon the 814 EDI Specification (Ver/Rel 004010) approved on 9-28-18.
