

PGE awarded grant for grid services demonstration project

A \$4.5 MILLION GRANT FROM THE U.S. DEPARTMENT OF ENERGY WILL SUPPORT THE DEVELOPMENT OF A DEMONSTRATION PROJECT AT THE WHEATRIDGE RENEWABLE ENERGY FACILITY

The project demonstrates mixed grid-forming (GFM) and grid-following (GFL) technologies at the Wheatridge Renewable Energy Facility, fostering collaboration between grid engineers and inverter vendors to encourage utilities to adopt grid-forming capabilities. These technologies help support the stability of the electric grid.
