

DISPATCHABLE STANDBY GENERATION

It pays to be prepared

Energy you can count on.

Reliable, predictable access to power is critical to operating your business. With PGE's Dispatchable Standby Generation (DSG) onsite generation or battery storage solutions, you'll have the peace of mind that comes with a backup resource.

Participating in PGE's Dispatchable Standby Generation program makes a big impact. Not only does PGE provide financial support to help prepare qualifying resources for participation, but you'll help keep the lights on in times of need. You'll even receive post-event notifications to let you know how your participation in the program helps provide reliable power to our community.

When you partner with PGE:

- Your resource remains available for backup power during utility outages. PGE only uses the generator when you have full power.
- Our DSG program provides an upfront allowance of \$94.80 per kW for each year of the contract. The first dollars are used to sync the generator with the grid. Anything leftover is paid directly to the customer once the generator is active in the program.
- PGE will pay for and perform routine maintenance, monitor health and performance of the system, and keep your generator fueled, even during an outage when you enroll.
- PGE contributes to any necessary repairs on the generator, up to \$19 per KW of enrolled capacity per year.
- Our team can help you navigate regulations and requirements with the Oregon Department of Environmental Quality, plus be there to help answer any questions you have.

Get financial help with upfront costs and reduce ongoing O&M for your power backup.

Prepare for the unpredictable with onsite power backup.

Make strides toward reaching your business' sustainability goals.

Our commitment. Your energy.

We're committed to serving your business with energy you can count on. Contact your PGE account rep or sign up to have a PGE Energy Expert help you get started today at portlandgeneral.com/dsgconsult.

DISPATCHABLE STANDBY GENERATION

Backup power when you need it.

With PGE's Dispatchable Standby Generation (DSG) program, we'll work with you to provide the support and funding you'll need for your generator or energy storage solution.

Whether you enroll with a diesel or natural gas generator, or a battery, we'll pay you for the shared access to your system.

- For generators, we pay **\$94.80 per kW**.
- For batteries, PGE contributes **\$137.40 per nominated kW per year**.

Generator example

A manufacturing company who enrolls a **1 MW generator** in Dispatchable Standby Generation with a 10-year term.

$$\begin{array}{r} \$94.80 \text{ per kW} \\ \times \quad 1,000 \text{ kW} \\ \times \quad 10 \text{ year term} \\ \hline = \text{\textbf{\$948,000 upfront incentives}} \\ - \text{\$200,000 estimated PGE} \\ \text{\hspace{10em} construction costs} \end{array}$$

\$748,000 estimated net pay out

Battery example

A manufacturing company who enrolls a **1 MW battery** in Dispatchable Standby Generation with a 10-year term.

$$\begin{array}{r} \$137.40 \text{ per kW} \\ \times \quad 1,000 \text{ kW} \\ \times \quad 10 \text{ year term} \\ \hline = \text{\textbf{\$1,374,000 upfront incentives}} \\ - \text{\$70,000 estimated PGE} \\ \text{\hspace{10em} construction costs} \end{array}$$

\$1,304,000 estimated net pay out
